

Learning Objectives:

- To improve the knowledge of healthcare professionals (sonographers, obstetricians and fetal medicine specialists) of routine evaluation of infertile patients, early pregnancy and first trimester screening
- To promote evidence-based practice in the diagnosis, counselling and management of gynaecological and early pregnancy issues as well as first trimester anatomy and prediction of pregnancy complications
- To update their knowledge in line with the recommendations of the published ISUOG Clinical Standards

Scheduled Talks:

Reproduction

- Ultrasound diagnosis of adenomyosis: MUSA update
- Use of 3D ultrasound to classify uterine anomalies
- IDEA Consensus for the classification of endometriosis
- IETA terms to define endometrial pathology: relevant or not to every day clinical practice?
- Simple ultrasound-based rules for the diagnosis of ovarian cancer.
- Ultrasound based endometriosis staging system (UBESS) to predict complexity of laparoscopic surgery

Early pregnancy

- Miscarriage diagnosis: are the new ultrasound cut-offs conservative enough?
- Caesarean section scar pregnancy: diagnosis and management
- How to classify non-tubal ectopic pregnancy
- Tubal ectopic pregnancies: what benchmark detection rate is acceptable?
- Pregnancy of unknown location: classification and rationalizing follow up
-

First trimester morphology

- Early first trimester detection of fetal malformation (7-11 weeks): are we ready?
- Debate: Routine colour Doppler assessment of the fetal Heart 11-14 weeks: for/ against
- First trimester diagnosis of fetal facial anomalies: Benefits and limitations
- Advances in ultrasound diagnosis and genetics of first trimester skeletal malformation
- Examination of the normal fetal brain 11-14 weeks
- Fetal brain malformation at 11-14 weeks : Old and New
-

First trimester screening

- First trimester screening for aneuploidy
- cfDNA consensus statement from ISUOG
- Current issues with NIPT
- Pre-eclampsia screening after the ASPRE trial
- Prevention of pre-eclampsia
- Screening for major pregnancy syndromes: GDM, FGR and preterm delivery
