

ISUOG Education 2010: Congenital Anomalies and Fetal Echocardiography

Delegate evaluation results

	Average Score: Low 1 -- 7 Highest
The topics were relevant to the program	6.28
The course was well organised	6.25
The course fulfilled my educational requirements	6.15

Congenital anomalies - Friday 5 February	
Agenesis of the corpus callosum & septum pellucidum	5.61
Anomalies of the posterior fossa	6.21
Neural tube defects	6.41
Destructive cerebral lesions	5.93
Cerebral anomalies diagnosable at 11-13 weeks	6.06
Urinary tract abnormalities	6.22
Diagnosis & management of diaphragmatic hernia	5.7
Cystic lungs	5.56
Diagnosis & management of pleural effusion	5.97
Clinical cases	5.91

Fetal echocardiography - Saturday 6 February	
Beyond ISUOG guidelines	6.2
Hypoplastic left heart syndrome & critical aortic stenosis	5.86
Aortic coarctation	6.28
Current outcome for LVOT obstructions & rationale for in utero intervention	5.93
The heart in the right chest	5.77
Moderate ventricular disproportion	6.21
The univentricular heart	6
The overriding aorta	5.87
VSD or not VSD	5.48
Performing first trimester fetal echo	6.12
Cardiac anomalies associated with increased NT	5.54
Early detection of extra cardiac anomalies	5.78
Sequential anatomy & situs abnormalities	6.29
How to study pulmonary & systemic returns in the fetus	5.8
Abnormal pulmonary & systemic returns in the fetus	5.84
Deletion 22q11 in the fetus (CATCH-22)	6.13

Overall were you happy with the quality of the speakers and presentations	100% Yes
Online	6.38
On-site	6.12
Overall	6.01
Catering	5.04
AV Services	5.67
Meeting room	5.27
Value for money	5.61

Overall score for course	6.03
