

	Sunday	Monday	Tuesday	Wednesday	Thursday								
07:30-08:15	Registration	All you ever wanted to know sessions											
		Systematic approach in early fetal anomaly scan - R. Chaoui		Fetal cardiac anatomy - A. Abuhamad	Abnormalities of the venous system - S. Yagel	Current issues in IUGR management - A. Baschat							
		First trimester fetal echocardiography - J. Carvalho		Getting the most out of 3D volumes - L. Platt	Fetal face anomalies, 2D and 3D - B. Benacerraf	Fetal syndromes - G. Pilu							
		Selective IUGR in monochorionic twins - E. Gratacos		New achievements in fetal MRI - D. Prayer	When to use Doppler and when not to - C. Brezinka	Diagnosis of heterotaxy - C. Berg							
		Managing early pregnancy complications - G. Condous	Ultrasound in reproductive medicine - N. Raine-Fenning	Assessing cervical pathology - A. Testa	Evaluating the endometrium - T. Van den Bosch								
08:30-09:00	Pre-congress courses 1. Pelvic floor ultrasound 2. 11-14 week scan												
09:00-10:00		Live scan	Short term outcome in fetal growth restriction	Early pregnancy	Live scan	The assessment of pelvic pain	New imaging techniques	Live scan	Diagnosis and management of ovarian pathology	In-utero interventions	OP & P - OBS	OP & P - OBS	
		Congenital heart disease									OP & P - OBS	OP & P - GYN	Fetal cardiac function
10:00-10:40		OP & P - OBS	OP & P - OBS	OP & P - GYN	OP & P - OBS	OP & P - OBS	OP & P - GYN	OP & P - OBS	OP & P - GYN	OP & P - OBS	OP & P - OBS		
10:30-11:00		COFFEE & POSTER VIEWING											
11:00-12:30		Advanced fetal echocardiography (heterotaxy)	Identifying risk in monochorionic twin pregnancy	Ultrasound and the acute gynecology patient	Outreach	Live scan	Reproductive medicine	Obstetric management	Fetal surveillance	Scanning asymptomatic women - cancer screening	Ultrasound in labour	OP & P - OBS	OP & P - OBS
						CNS imaging in early pregnancy						OP & P - OBS	OP & P - GYN
12:30-14:00		LUNCH & POSTER VIEWING (12:30-14:00)											
		& SATELLITES (12:45-13:45)											
14:00-15:00			Live scan	Twin-twin transfusion syndrome	Abnormal uterine bleeding		Live scan	Using ultrasound to assess urogynecology patients	Preterm labour	Live scan	Mathematical models and new second stage tests to assess the ovary		Closing
	First trimester		Multiple pregnancy				Long term outcome in fetal growth restriction						
15:00-15:40		OP & P - OBS	OP & P - OBS	OP & P - OBS		OP & P - OBS	OP & P - OBS	OP & P - OBS	OP & P - OBS	OP & P - GYN	OP & P - OBS		
15:40-16:10	Plenary lectures	COFFEE & POSTER VIEWING											
16:10-17:40		Special interest workshops											
		Advanced fetal neurosonography			Molecular vs ultrasound screening for T21			How fetal conditions affect the heart					
		Early pregnancy complications			Fertility: assessing the ovarian reserve and the uterus			Use of ultrasound in gynecological oncology					
		Practical new tools in fetal echocardiography			Screening in Doppler			The spectrum of 3D/4D ultrasound in prenatal diagnosis					
		Doing it safely			The borderline fetus								
17:50-18:35	Welcome reception	Inverting the pyramid of care - K. Nicolaidis					All you ever wanted to know sessions						
		Fetal cardiac function, including automated assesment of the fetal heart - B. Tutschek					Sonography in prenatal CMV infection - Y. Ville						
		Levator trauma - H.P. Dietz					Treatment of fetal diaphragmatic hernia - J. Deprest						
							How to scan the entire abdomen and pelvis - D. Fischerova						

Key	
All you want to know sessions	Plenary
Gynecology sessions	Pre-congress courses
Live scan (obs)	Workshops
Obstetrics sessions	Satellite symposium
Oral posters	View only posters

Congress Party
