

Acute pelvic pain in emergency department

Chaired by A/Prof. Ligita Jokubkiene (Sweden) and Prof. Davor Jurkovic (UK)

Friday 10th July 2026

BST (UTC +1)	Mins	Lecture	Faculty
12:00	5	Welcome and introduction	A/Prof. Ligita Jokubkiene (Sweden) and Prof. Davor Jurkovic (UK)
12:05	20	When to suspect ovarian torsion?	A/Prof. Ligita Jokubkiene (Sweden)
12:25	20	Pelvic inflammatory disease on ultrasound: acute findings, chronic damage and differential diagnosis	A/Prof. Tina Tellum (Norway)
12:45	20	Intrauterine device related complications	Prof. Davor Jurkovic (UK)
13:05	20	Pelvic pain related to non-gynecological pathology	TBC
13:25	30	Live Q&A and panel discussion	All faculty
13:55	5	Feedback and close	A/Prof. Ligita Jokubkiene (Sweden) and Prof. Davor Jurkovic (UK)

Learning objectives

1. Recognise the clinical and ultrasound features that raise suspicion of ovarian torsion, enabling timely diagnosis and management.
2. Differentiate the ultrasound findings of pelvic inflammatory disease, including acute presentations, chronic sequelae, and key differential diagnoses.
3. Identify common intrauterine device (IUD)-related complications and interpret their appearance on ultrasound.
4. Evaluate pelvic pain arising from non-gynaecological causes and distinguish these from gynaecological pathologies on imaging.

A/Prof. Ligita Jokubkiene (Sweden)

COURSES SUB-COMMITTEE CHAIR

Prof. Davor Jurkovic (UK)

IAN DONALD GOLD MEDAL, 2020; ISUOG FELLOWSHIP, 2006

A/Prof. Tina Tellum (Norway)
