

Imaging approaches to paediatric gynecology

Chaired by Prof. Maya Al-Memar & A/Prof. Simone Ferrero

Wednesday 26th November 2025

GMT (UTC +0)	Mins	Lecture	Faculty
12:00	5	Welcome and introduction	Prof. Maya Al-Memar (UK) and A/Prof. Simone Ferrero (Italy)
12:05	20	Imaging in PAG	Prof. Maya Al-Memar (UK)
12:25	20	Adnexal masses in the young patient	Prof. Tom Bourne (UK)
12:45	20	Pelvic pain in adolescents - the normal scan, adenomyosis and endometriosis	A/Prof. Caterina Exacoustos (Italy)
13:05	20	Cases – adnexal masses, endometriosis/adenomyosis in adolescents	Dr Nina Cooper (UK)
13:25	30	Live Q&A and panel discussion	All faculty
13:55	5	Feedback and close	Prof. Maya Al-Memar (UK) and A/Prof. Simone Ferrero (Italy)

Learning objectives

- 1. Recognize** the imaging approach to paediatric and adolescent gynecology (PAG), with emphasis on age-appropriate techniques and safety considerations.
- 2. Differentiate** the imaging characteristics of common adnexal masses in young patients and outline appropriate diagnostic pathways.
- 3. Interpret** ultrasound findings in adolescents presenting with pelvic pain, including normal pelvic anatomy, features of adenomyosis, and endometriosis.
- 4. Apply** diagnostic reasoning through case-based learning to evaluate adnexal masses and endometriosis/adenomyosis in adolescents using imaging.

Dr Maya Al-Memar (UK)

EDUCATION COMMITTEE CHAIR, NGEN COMMITTEE MEMBER, HONOURS COMMITTEE MEMBER

A/Prof. Simone Ferrero (Italy)
