

ULTRASOUND

in Obstetrics & Gynecology

isuog.org

The leading international peer-reviewed journal in the field of imaging in obstetrics and gynecology

Key features:

- Impact Factor 5.571: ranked 5th of all OBGYN journals
- Over 4 million downloads in 2019
- Bimonthly video abstracts on key research papers
- Includes the latest, most clinically relevant research from international experts
- Contains guidelines, consensus statements and expert commentaries
- Includes monthly systematic reviews and meta-analyses
- Manuscripts published online and citable within 2 weeks of acceptance
- Virtual Issues - including an issue on COVID-19 in the obstetric and gynecological settings

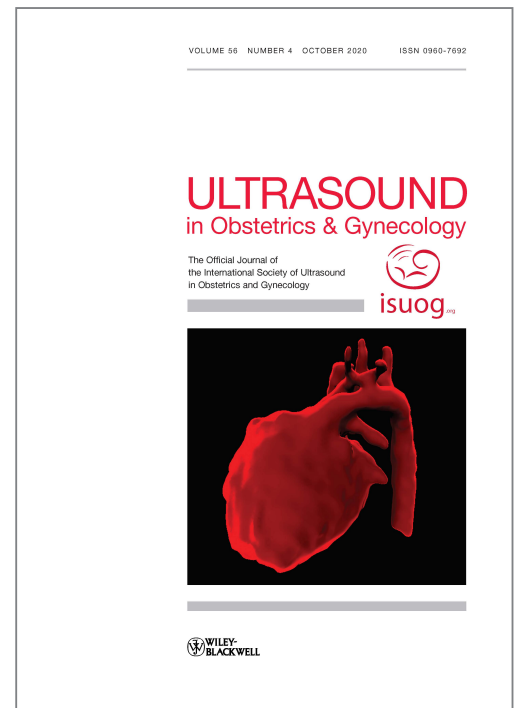

Topics covered include:

- Maternal-fetal medicine: prenatal diagnosis, fetal growth, development, treatment and wellbeing, placenta, preterm labor and pregnancy complications
- Gynecology: screening and diagnosis of cancer, infertility, menopause, the cervix and urogynecology
- Imaging techniques: grayscale, Doppler, 3D ultrasound and MRI

Submit your research to UOG:

- Author Guidelines
- Submit your research here

To browse a FREE issue of UOG click here.
