

Advanced Course in Gynecological 3D Ultrasound

29-30 January 2026

UL-Meas.Th: 7.2mm
UL-Meas.Th: 11.4mm
UL-Meas.Th: 11.2mm
UL-Int.Median Ind: 21.4mm
UL-Fund.Int.Angle: 40.6°

PROGRAM

DAY 1

 Wednesday, January 29, 2026

Morning

09:00 – 09:20 | Registration with coffee and a light breakfast

09:20 – 09:30 | Welcome and today's program - Attila Botházi

09:30 – 10:00 | 2D/3D Basics - Heidi Sørensen

10:00 – 10:20 | Why and when can gynecological 3D ultrasound be used? Gynecological 3D ultrasound and saline sonohysterography - Attila Botházi

10:20 – 10:40 | Coffee break

10:40 – 11:15 | Optimal 3D image acquisition – Tips & Tricks - Hands-on - Mathias Gottschack

11:15 – 11:30 | The most important buttons and systematic 3D image optimization - Attila Botházi

11:30 – 12:15 | The normal uterus – Render and Z Technique - Hands-on - Sarah Berg

12:15 – 13:00 | Lunch

Afternoon

13:10 – 13:30 | Classification of uterine malformations - Attila Botházi

**13:30 – 14:30 | Advanced Hysteroscopic Metroplasty:
Managing Uterine Septum and T-shaped Uterus - Ursula Catena**

14:30 – 14:50 | Coffee break

14:50 – 16:00 | Uterine malformations - Z Technique and OmniView Technique - Hands-on - Attila Botházi

16:00 – 16:10 | Evaluation

**18:30 | Social event,
 Restaurant Brygger Bauers Grotter,
Sct. Mathias Gade 61, 8800 Viborg**

RENDER Technique
Using the X-, Y-, and Z-Buttons
Voluson Expert 10

A Practical Demonstration of
How to Use
3D Gynecological Ultrasound

OmniView Technique
Voluson Expert 10

A Practical Demonstration of
How to Use
3D Gynecological Ultrasound

RENDER Technique
Voluson Expert 22

A Practical Demonstration of
How to Use
3D Gynecological Ultrasound

PROGRAM

DAY 2

 Thursday, January 30, 2026

Morning

08:00 – 08:20 | Coffee and a light breakfast

08:20 – 08:35 | Warm-up – 3D image optimization technique repetition

08:35 – 09:15 | 3D Ultrasound Evaluation of IUD

Positioning and Malposition - Hands-on

09:15 – 10:15 | Let's talk about MUSA – Morphological Uterus Sonographic Assessment

- Thierry Van den Bosch

10:15 – 10:30 | Coffee break

10:30 – 11:15 | Adenomyosis with 3D ultrasound - Hands on

11:15 – 12:00 | Ultrasound appearance and classification of adenomyosis

- Ligita Jokubkiene

12:00 – 12:45 | Lunch

Afternoon

12:45 – 13:20 | 3D Ultrasound of Uterine Fibroids and AI-Assisted Fibroid Mapping - Hands-on

- Mathias Gottschalck

13:20 – 14:30 | Challenges in 3D image optimization – Is it me, the machine, or the patient?

Difficult and exciting cases - Hands-on - Attila Botházi

14:30 – 14:45 | Coffee break

14:45 – 15:00 | Evaluation and conclusion

**Z Technique
in Multiplanar View**

Voluson Expert 22

A Practical Demonstration of
How to Use
3D Gynecological Ultrasound

**OmniView Technique
with xTouch**

Voluson Expert 22

A Practical Demonstration of
How to Use
3D Gynecological Ultrasound

Speakers and instructors:

Attila Botházi, MD – Consultant in Obstetrics and Gynecology, Regional Hospital Viborg, Denmark

Thierry Van den Bosch – Professor, KU Leuven – Specialist in gynecological ultrasound and MUSA
KU Leuven, Belgium

Ligita Jokubkiene, MD, PhD – Associate professor at Obstetric,
Gynaecological and Prenatal Ultrasound Research, Sweden

Ursula Catena, MD, PhD – Associate Professor, Obstetric, Gynaecological and Prenatal
Ultrasound Research – Fondazione Policlinico Universitario A. Gemelli IRCCS, Rome, Italy

Sarah Berg, MD – Consultant in Obstetrics and Gynecology, Denmark

Mathias Gottschalck, MD – Senior Consultant in Obstetrics and Gynecology, Regional Hospital Viborg, Denmark

Emi Rosén – Advanced Application Specialist, Women's Healthcare Nordic, GE Healthcare, Sweden

Heidi Sørensen – Ultrasound Application Specialist, GE Healthcare, Denmark

Mette Skovgaard Eriksen – Ultrasound Application Specialist, GE Healthcare, Denmark

Practice makes perfect.
