

Beyond ultrasound: MRI in gynecological imaging

Chaired by A/Prof. Ligita Jokubkiene and Dr Gabor Szabó

Livestream

Sunday 6th December 2026

UK GMT (UTC+0)	Mins	
08:00	5	Welcome and overview of the day
08:05	25	Sonographic anatomy of the female pelvis: a systematic approach
08:30	25	MRI anatomy of the female pelvis: sequences and landmarks
08:55	25	The adolescent pelvis: when is ultrasound enough, and when do you need MRI?
09:20	20	Imaging methods for pelvic congestion
09:40	25	Q&A
10:05	20	Refreshment Break
10:25	20	Adenomyosis: ultrasound or MRI — does the choice change the management?
10:45	20	Mapping endometriosis with ultrasound: what can we tell the surgeon
11:05	20	MRI in endometriosis: what it adds beyond ultrasound
11:25	30	Case presentations – US meets MRI
11:55	30	Live Q&A and panel discussion
12:25	60	Lunch Break
13:20	20	Fibroid or sarcoma? Ultrasound features that should raise concern
13:40	20	Fibroid or sarcoma? MRI as a problem-solving tool
14:00	30	Case presentations - US meets MRI
14:30	20	Live Q&A and panel discussion
14:50	10	Refreshment Break
15:00	20	Do we need to do MRI to assess adnexal masses?
15:20	20	Ultrasound staging of gynaecological tumors: a step-by-step approach
15:40	20	Whole-body MRI for staging gynaecological tumors: when and why
16:00	20	Fusion imaging: synthesis of Us and MRI in gynecology
16:20	30	Case presentations - US meets MRI
16:50	30	Final live Q&A and panel discussion
17:20	10	Feedback and close
17:30		Finish
