

ISUOG Newsletter

May 2020

We feel very grateful and proud with the rapid response the ISUOG community has achieved during this uncertain time. ISUOG's mission has been to assist you in your daily work. While dealing with this pandemic: We have organised a [series of webinars](#), produced [Patient Information leaflets](#) and published [guidance and research](#) in our journal, [Ultrasound in Obstetrics and Gynecology](#). Many of these resources are already [available in different languages](#).

We would also like to highlight the rest of the resources on ultrasound in obstetrics and gynecology available for the community, from the [free-access guidelines](#), [basic-training curriculum](#), [journal club](#) and [free 2-year trainee membership](#).

Support the work we do and become a member to have access to our Journal, [Ultrasound in Obstetrics and Gynecology \(UOG\)](#), our [CME platform](#), [online learning opportunities](#) and [recordings from previous congresses](#).

Finally, we are looking forward to being able to deliver [ISUOG's Outreach program](#) plan to build a sustainable health structure for the provision of OBGYN ultrasound for all women in under-served regions of the world.

We are passionate about who we are and about what we do, with our members at the heart of the ISUOG community.

Warm wishes,

The ISUOG Team

ISUOG's 30th World Congress

There is still time to submit your abstract and register for ISUOG's 30th World Congress on Ultrasound in Obstetrics and Gynecology.

Come join us in October, at the Congress and help us celebrate our 30th anniversary. Visit the ISUOG website for more information on our virtual Congress plans for 2020.

[Learn more](#)

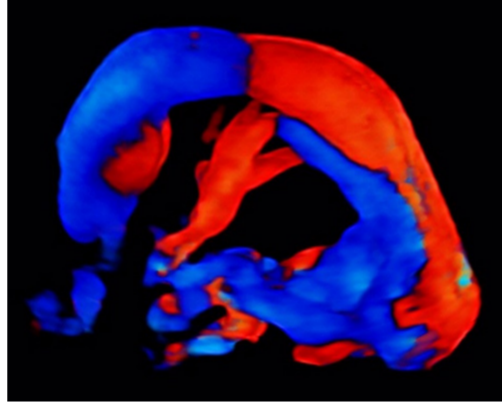

Online Learning Opportunities

Become a member to access all of our comprehensive, innovative education programs to improve clinical care: access lectures from the [29th World Congress on Ultrasound in Obstetrics and Gynecology in Berlin](#) and previous ones on our [On Demand platform](#), explore our [online learning modules](#) and our visual encyclopedia on the clinical use of ultrasound in obstetrics and gynecology, [VISUOG](#).

[Start learning](#)

Upcoming ISUOG Event Livestreamed

Interested in learning more about the two important imaging themes: maternal and fetal Doppler, and maternal cardiovascular function? Then livestream our problem-based course, ["Doppler and maternal vascular imaging"](#), on July 24th.

Learning objectives:

- Understand the basic principles for a Doppler ultrasound
- Investigate the management of FGR
- Explore the methodology of vascular imaging
- Learn the clinical relevance of maternal vascular imaging

View the [provisional program](#) for more information. [View more ISUOG education courses](#).

UOG in May

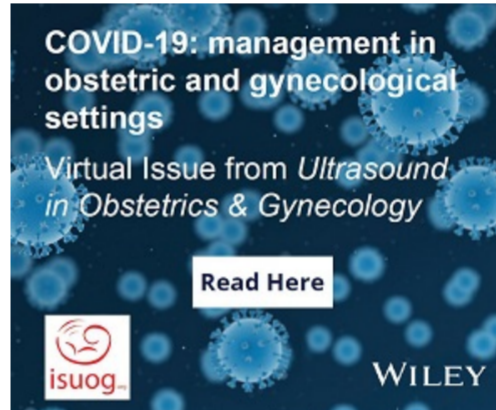

The May issue of [Ultrasound in Obstetrics & Gynecology](#) includes an Opinion presenting ultrasound images of [fetal abnormalities before 11 weeks](#), a 'How to' article on [performing lung ultrasound in pregnant women](#) with suspected COVID-19, a study assessing the impact of the [Growth Assessment Protocol program on stillbirth](#) rate in over 11 million births, and a study on [whether cell-free DNA testing should be used in pregnancy](#) with increased fetal nuchal translucency.

Also online this month is the [updated Interim Guidance on COVID-19](#) infection during pregnancy and puerperium, and coming soon are new ISUOG Practice Guidelines on the role of ultrasound in the diagnosis and management of congenital infection.

Your support of the White Journal is crucial to its success so [become an ISUOG journal member](#) and access all of the content today!

Obituary

ISUOG Founding member

It is with great sadness that we report the passing of Jean Hollingsworth on the 15th April 2020. Jean was the first ultrasound superintendent in Obstetrics at the historic Queen Charlotte's hospital in London, arriving in 1984 to develop the service. Jean was also involved in supporting Professor Charles Rodeck who set up the first fetal medicine unit at the hospital in 1986. Jean is remembered for her sharp wit and generosity of spirit, and most of all for being a skilled mentor and teacher. Jean taught clinicians and sonographers alike with an uncompromising approach towards technical excellence and patient care. She advanced the field of obstetric scanning and improved the craft of all under her leadership.

Jean will be greatly missed.

Supporting the community of health professionals fighting **COVID-19**

[ACCESS RESOURCES](#)

Help us disseminate COVID-19 resources and translations, to support us in our goal towards protecting health professionals around the world.

Share this content on social media by forwarding this email or linking to the [COVID-19 resources page](#) (or [translated resources](#)), from the resources library on your national institution webpage. Thank you.
