

**Learning Objectives:**

1. Hear more about ultrasound pelvic anatomy
2. Discover the risks of malignancy in endometriotic lesions
3. Ensure whether it's possible to preoperatively discriminate between malignancy and deep endometriosis in the pelvis?
4. Learn how to discriminate between decidualized endometriomas and malignant ovarian tumors during pregnancy?

Friday 29 th November		
08:30-09:00	Registration opens	
09:00-09:10	Welcome and introduction	
09:10-09:15	Presentation of the course	A. Testa L. Valentin
09:15-10:30	Ultrasound pelvic anatomy	L. Savelli A. Testa L. Valentin J. Yazbek
10:30-11:00	Round table discussion with all speakers and with remarks of the pathologist	G. Zannoni
11:00-11:30	Coffee Break	
11:30-12:00	Endometriosis from the pathologist's point of view	G. Zannoni
12:00-12:30	Endometriosis. "Hard markers and soft markers"	L. Savelli
12:30-13:00	International Deep Endometriosis Analysis (IDEA) consensus	S. Guerriero
13:00-14:00	Lunch	
14:00-14:30	Atypical endometriomas or cancer in endometriomas?	J. Yazbek
14:30-15:00	Evidence-based management of patients with endometriomas	L. Valentin
15:00-15:30	Decidualized endometriomas and malignant ovarian tumors during pregnancy	A. Testa
15:30-15:45	Coffee Break	
15:45-16:30	Deep endometriosis in the pelvis and cancer in the pelvis	S. Guerriero J. Yazbek
16:30-17:00	Interactive test - case videos <ul style="list-style-type: none"> • on the nomenclature of pelvic structures on ultrasound • on the localization of pelvic endometriotic nodules and cancer in the pelvis • on the discrimination between pelvic endometriotic nodules and cancer in the pelvis • on the discrimination between benign and malignant ovarian masses during pregnancy 	C. Landolfo
17:00	End of the course	

Please note that this is a provisional schedule which may change
