

## Ultrasound in uterine malformations

Course chairs: A/Prof. Ligita Jokubkiene and Prof. Simon Meagher

Saturday 28th February 2026

### Learning Objectives:

- Understand embryology and classification of uterine malformations.
- Identify uterine anomalies using 2D and 3D ultrasound.
- Differentiate between different types of uterine anomalies.
- Correlate ultrasound findings with MRI and clinical implications.
- To learn apply knowledge to infertility, obstetric outcomes, and management decisions.
