

Ultrasound excellence in gynecological malignancies

Chaired by Prof. Lil Valentin and A/Prof. Ligita Jokubkiene

Livestream

Sunday 11th October 2026

Learning Objectives:

- Recognize typical sonographic features of benign, borderline, and malignant lesions in the ovary, uterus and cervix
- Systematically evaluate the extent of disease in patients with gynecological cancers (“ultrasound staging”)
- Integrate ultrasound findings into clinical decision-making in gynecological malignancies
- Recognize diagnostic challenges in gynecological oncology ultrasound and apply strategies to improve diagnostic accuracy.
- Interpret complex clinical cases by combining ultrasound findings with clinical history

UK BST (UTC+1)	Mins	
SESSION 1: Ovarian malignancy		
<i>Chairs: Prof. Lil Valentin and A/Prof. Ligita Jokubkiene</i>		
08:00	10	Welcome and overview of the day
08:10	30	When to suspect ovarian malignancy?
08:40	30	IOTA methods to discriminate between benign and malignant ovarian masses
09:10	20	Borderline ovarian tumours
09:30	30	Primary epithelial invasive and metastatic ovarian tumours
10:00	20	Live Q&A and panel discussion
10:20	20	Refreshment Break
SESSION 2: Ovarian malignancy		
<i>Chairs: Prof. Lil Valentin and A/Prof. Ligita Jokubkiene</i>		
10:40	30	Rare malignant ovarian tumours
11:10	30	Assessing the extent of ovarian cancer (“staging”)
11:40	20	Lymph node assessment – signs of metastases, differential diagnoses
12:00	30	Case presentations – ovarian masses
12:30	20	Live Q&A and panel discussion
12:50	40	Lunch Break
SESSION 3: Endometrial and cervical cancer		
<i>Chairs: Prof. Lil Valentin and A/Prof. Ligita Jokubkiene</i>		
13:30	30	Detection and “staging” of endometrial cancer
14:00	20	How to recognize cervical malignancy on ultrasound
14:20	20	Assessing the extent of cervical cancer (“staging”)
14:40	30	Case presentations - endometrial cancer, cervical cancer
15:10	20	Live Q&A and panel discussion
15:30	30	Refreshment Break

SESSION 4: Uterine and retroperitoneal masses Chairs: Prof. Lil Valentin and A/Prof. Ligita Jokubkiene		
16:00	30	Uterine sarcoma – when to suspect and how to diagnose?
16:30	20	Interventional diagnostic tool in gynecology: Tru-cut biopsy
16:50	20	Retroperitoneal and non-gynecological pelvic masses – differential diagnoses
17:10	25	Ovarian tumors in pregnancy
17:35	20	Final live Q&A and panel discussion
17:55	5	Feedback and close
18:00		Finish
