### Learning Objectives:

- Be up-to-date with new advances in the prenatal diagnosis and management of fetal anomalies
- Promote a multidisciplinary approach to the management of pregnancies complicated with fetal anomalies
- Gain expertise and confidence in the counselling of parents whose pregnancies are complicated by fetal anomalies
- Discuss the postnatal management of cases with fetal anomalies
- Establish the role of fetal therapy in fetal anomalies

| 08.30 – 09.00 | **Fetal hydrops**  
  - Prenatal diagnosis and assessment  
  - Genetic investigations  
  - Indications for prenatal intervention  
  - Postnatal neonatal management and prognosis |
| 09.00 – 09.30 | **Congenital diaphragmatic hernia**  
  - Prenatal diagnosis and assessment  
  - Fetal therapy  
  - Postnatal surgical management and outcome |
| 09.30 – 10.00 | **Pleural effusion**  
  - Prenatal diagnosis and assessment  
  - Indications for prenatal intervention  
  - Postnatal neonatal management and prognosis |
| 10.00 – 10.30 | Refreshment Break |
| 10.30 – 11.00 | **Congenital pulmonary adenomatoid malformation and pulmonary sequestration**  
  - Diagnosis and prognostic markers  
  - Indications for prenatal intervention  
  - Postnatal management and surgery |
| 11.00 – 11.45 | Panel Discussion  
  - Value of exome sequencing  
  - Role of fetal therapy  
  - What to tell the patient? |
| 11.45 – 12.30 | Case Discussion  
  - Lung agenesis/hypoplasia  
  - Bronchial/laryngeal atresia |
| 12.30 – 13.00 | Lunch |
| 13.00 – 13.30 | **Oesophageal atresia**  
  - Prenatal diagnosis and assessment  
  - Postnatal surgical management |

| 13.30-14.00 | **Bowel obstruction**  
• Prenatal diagnosis and assessment  
• Postnatal surgical management |
| 14.00-14.30 | **Abdominal cysts**  
• Prenatal diagnosis and assessment  
• Postnatal surgical management |
| 14.30-15.00 | **Exomphalos vs gastroschisis**  
• Prenatal diagnosis and assessment  
• Postnatal surgical management |
| 15.30-16.00 | Refreshment Break |
| 16.00-16.45 | **Panel Discussion**  
• Value of exome sequencing  
• Role of fetal therapy  
• What to tell the patient? |
| 16.45-17.30 | **Case Discussion**  
• Bladder extrophy  
• Cloacal extrophy  
• Body stalk anomaly |
| 17.30-17.45 | Feedback and close |
