Final Program

Up to 37 CME credits
Welcome to our growing ISUOG community

With a mission to improve women’s healthcare through the provision and dissemination of the highest quality education and research, growth is important to us.

All fully paid Congress delegates are now ISUOG members for 2016. You can enjoy your membership benefits immediately. Turn to page 11 to read more about the opportunities and to get involved in our activities here in Montréal or visit our ISUOG Lounge.

“Welcome to the World Congress in Montréal - our 25th ISUOG World Congress.

ISUOG is dedicated to ensuring that all women have access to competent ultrasound and that obstetric and gynecological conditions are effectively diagnosed. Membership growth is a core strategy towards this, so I am really proud that we have achieved our ambitious target of 10,000 members by 2015!

Our increasing international flavour continues, with more content in more languages. As we enter our 25th birthday year I am excited to see what the future holds for ISUOG.”

Apply for a 2016 Congress travel stipend

Supporting education and research in underserved regions.

Young researchers from underserved regions are invited to apply in 2016 to participate at the Congress in Rome.

Travel, accommodation and registration will be offered to 5 successful applicants who submit an abstract for the Rome Congress and meet the eligibility criteria.

Full terms, conditions and application criteria will be available in January 2016 when the abstract submission for the Rome Congress opens: isuog.org/WorldCongress/2016
Bienvenue à Montréal!

On behalf of ISUOG, its Board of Trustees and the Congress organising committees, it is our pleasure to welcome you back to Canada, to celebrate the 25th anniversary of the World Congress on Ultrasound in Obstetrics and Gynecology. Join us for festivities on Sunday evening, including the Opening Ceremony, a circus performance by ‘Les 7 doigts de la main’, the Welcome Reception and our 25th Birthday party.

Over the years, the Congress has become the key event in the calendar of imaging in obstetrics and gynecology and in particular for our 13,300 ISUOG members. Combining scientific advances through more than 700 submitted abstracts, workshops providing deeper analysis of specialty areas and masterclasses by world renowned leaders in the field, the program will provide you with a variety of opportunities to meet your needs. Young investigators are the future of our field - look for their new research in the program, support their presentations and see what the future has in store.

New this year are the facilitated poster discussions and interactive Hub activities. Listening to the needs of our delegates for smaller forums for discussion and interaction, this new format will provide opportunities for direct contact with authors, special interest discussions and more hands-on sessions through our simulation workshops.

2015 also marks a milestone for the Millennium Development Goals for maternal health. This theme will be featured in our keynote lectures and review of our Outreach program.

Montréal offers a multitude of activities to make your stay even more enjoyable. Founded almost 400 years ago, the city offers a vast array of cultural activities. Its gastronomy and joie de vivre will make your evenings most entertaining. Its colourful fall display will entice you to walk or jog through its streets and discover its secrets.

Thank you for joining our silver anniversary Congres. Your support as a delegate, member, speaker or industry partner is what makes the congress possible. We hope you thoroughly enjoy your time in Montréal.

François Audibert

Speaker declarations

The following declarations of interest have been received:

R. Chaoui Speaking at GE Healthcare Satellite Symposium
B. Cuneo Fetal echocardiography instructor with Philips Ultrasound
H.P. Dietz Received unrestricted grants from GE (OC09.03, P04.02, P04.03, P04.04, P04.05)
H. Feltovich Receives engineering and technical support from Siemens (OP09.04)
E. Kalafat Amnisure (Amnisure International LCC. Boston USA) tests used in this study were donated by ATQ Biotechnology (Ankara, Turkey), an affiliate of QIAGEN Corporation (Hilden, Germany) (OP10.08)
A. Johnson Paid author for chapters on the diagnosis/management/pathophysiology of Twin Twin Transfusion syndrome in UpToDate Inc.
W. Lee Receives limited research support from Samsung and Philips. He will be giving training at GE Healthcare Voluson.
C. Lees Receives an honorarium paid to institutional research funds and support for educational meetings and loan of ultrasound equipment from Samsung (2012, 2010), GE (2010), Toshiba (2010); Receives an honorarium as the Editor-in-Chief of Fetal Maternal Medicine Review
G. Pilu Consultant for GE Healthcare without Honorarium.
L. Platt Research support from GE Healthcare. His presentation on ‘Clinical use of 3D ultrasound in obstetrics and gynecology’ may include GE Medical system E8 and E10.
P. Schwaerzler Presentation may include discussion of TISSEEL®, Baxter Healthcare Corporation, Baxter International Inc.
B. Thilaganathan His talk 25 years in 25 minutes: research, impact, innovation will involve discussion of cfDNA testing which is principally a commercially based service.
P. Taneja Employee of Illumina and holds stock in the company (OP05.05)

The following presentations will include discussion of commercial products/services:

OC05.03, OC07.04, OC09.02, OC09.03, OC13.01, OC13.02, OC14.03, OC15.01, OC16.02, OC19.08, OC24.03, OP03.01, OP03.07, OP05.04, OP05.05, OP08.01, OP09.04, OP10.03, OP10.08, OP13.06, OP13.09, OP14.04, OP15.04, OP19.02, OP19.04, OP19.07, OP21.07, P01.10, P02.02, P02.06, P04.02, P04.03, P04.04, P04.05, P04.06, P04.08, P05.01, P13.06, P14.11, P15.04, EP01.12, EP04.05, EP06.02, EP08.07, EP09.19, EP09.20, EP09.25, EP11.01

The following presentations will include discussion of investigative or off label uses of products:

The following presentations will include discussion of clinical studies:

OC02.01, OC02.02, OC03.03, OC03.05, OC05.03, OC08.03, OC08.04, OC09.02, OC11.07, OC13.01, OC13.02, OC13.03, OC15.01, OC15.06, OC16.02, OC16.05, OC19.05, OC19.06, OC22.01, OC22.05, OC24.03, OC24.05, OC24.06, OP01.04, OP02.06, OP02.08, OP02.09, OP03.01, OP03.07, OP05.05, OP05.06, OP09.07, OP10.02, OP11.09, OP12.03, OP13.07, OP14.01, OP14.04, OP15.04, OP15.07, OP16.01, OP17.10, OP18.06, OP19.02, OP19.06, OP19.07, OP20.10, P01.06, P02.02, P05.01, P05.07, P05.13, P05.14, P06.10, P08.01, P08.11, P09.05, P14.11, P15.04, P15.05, P15.09, P15.11, P16.03, P18.04, P18.05, P19.05, EP01.06, EP01.14, EP02.07, EP03.02, EP03.03, EP04.04, EP04.06, EP04.07, EP04.10, EP06.04, EP09.08, EP09.19, EP09.25, EP09.26

CME accreditation

Up to 37 CME credits are available for the Congress

The Continuing Professional Development (CPD) Office of the Faculty of Medicine of the University of Montreal is fully accredited by the Association of Faculties of Medicine of Canada (AFMC) and from the Quebec College of Physicians. This activity, approved by the Continuing Professional Development (CPD) Office of the University of Montreal, is an Accredited Group Learning Activity under Section 1, as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada for a maximum of 37 hours. This program meets the accreditation criteria of the College of Family Physicians of Canada and has been accredited by the University of Montreal for up to 37 Mainpro-M1 credits.

Through an agreement between the Royal College of Physicians and Surgeons of Canada and the American Medical Association, physicians may convert Royal College MOC credits to AMA PRA Category 1 Credits™. Information on the process to convert Royal College MOC credit to AMA credit can be found at www.ama-assn.org/go/internationalcme.

For all other participating professionals, this program provides a certificate of participation of 37 hours. Participants must claim the number of hours according to their participation.
Dates and times

Registration opening hours
Saturday 10 October   07:45 - 17:00
Sunday 11 October    07:45 - 18:00
Monday 12 October    07:00 - 17:30
Tuesday 13 October   07:00 - 17:30
Wednesday 14 October 07:00 - 17:00

The registration area is located in the Congress Foyer, on the fifth floor of the Palais des congrès.

Exhibition opening hours
Sunday 11 October    13.00 - 19.00
Monday 12 October    10:00 - 16:30
Tuesday 13 October   10:00 - 16:30
Wednesday 14 October 10:00 - 16:15

The exhibition is located in Room 517AB, on the fifth floor of the Palais des congrès.

Speaker preparation room opening hours
Saturday 10 October   08:00 - 17:00
Sunday 11 October    08:00 - 17:00
Monday 12 October    07:00 - 17:00
Tuesday 13 October   07:00 - 17:00
Wednesday 14 October 07:00 - 16:30

The speaker preparation room is located in Room 523 on the fifth floor of the Palais des congrès. Speakers MUST check in their presentation at the speaker preparation room at least four hours prior to the commencement of the session in which they are due to present and preferably the day before their presentation. Please note there will be no laptop plug in facilities in the lecture halls, except by prior arrangement.

Scientific program hours
Please refer to the program for the exact location and timings of each session. Sessions will take place during the following times:

Pre-Congress course
Saturday 10 October   08:30 - 17:15

ISUOG basic training course
Saturday 10 October   08:30 - 17:00

Main program
Sunday 11 October  09:30 - 17:40
(followed by an exclusive performance by Les 7 doigts de la main, welcome reception, 18:15 - 19:00, and 25th Birthday party 19:00 - 00:00)
Monday 12 October    07:30 - 17:30
Tuesday 13 October   07:30 - 17:30
Wednesday 14 October 07:30 - 17:10
(followed by leaving drinks and welcome to Rome 2016, 17:10 - 18:00)

ISUOG Annual General Meeting (AGM)
All fully paid delegates are ISUOG members for 2016 and are invited to attend the AGM.
Sunday 11 October 2015
10:50, Room 517CD, Palais des congrès

ISUOG meetings
For details of scheduled ISUOG Committee meetings, please refer to page 130.

CME accreditation
All delegates’ badges will be scanned at the door of session halls. In order to qualify for AMA PRA Category 1 Credits™ or Mainpro-M1 credits, Canadian and American delegates must ensure they are scanned into a Congress session on each day that they wish to claim for.
Social program

Accompanying person’s program

Cost per person: $200 (USD)

The accompanying person’s fee includes:
- Admission to the Congress opening ceremony and welcome drinks
- Admission to the Congress exhibition area and catering breaks
- Admission to the Congress leaving drinks
- Lonely Planet Montréal and Quebec city guide
- 3 day Montréal metro pass
- Tourisme Montréal activities and attractions discount coupon book
- Admission to 25th Birthday party (if accompanying a delegate)

ISUOG Visitor’s Guide to Montréal

Be sure to make the most of the ISUOG Visitor’s Guide to Montréal, prepared by our Local Organising Committee which can be found online at: isuog.org/WorldCongress/2015/Social+tours/Things+to+do.

The guide will give you a local view on where to go and what to see in your spare time, including our Local Organising Committee’s favourite restaurants, cafés and bars.

Opening ceremony

Palais des congrès

All registered delegates, accompanying persons and exhibitors are invited to attend the complimentary Congress opening program starting with the Chair’s welcome at 17:40 on Sunday. The opening ceremony will be followed by a welcome drink in the exhibition area.

Please note you will not be allowed entry without your Congress badge.

During the evening Les 7 doigts de la main will deliver a bespoke performance for ISUOG in four Acts, two during the opening ceremony and two during ISUOG’s 25th Birthday party:

Act one: Her passion
Act two: Her voice
Act three: Her moment
Act four: Her dynamic
ISUOG is celebrating its 25th Congress in Montréal ahead of its 25th birthday year in 2016.

To commemorate this achievement, thank our members for their support and celebrate Canadian Thanksgiving we invite pre-booked delegates to join us for ISUOG’s 25th Birthday Party; an evening of circus performances and celebration with a family style Thanksgiving meal, beverages, music and dancing. A cash bar for spirits will also be available.

Please note you will not be allowed entry to the Party without your ticket (provided with your badge).

### Closing plenary, awards ceremony and leaving drinks

Join us on **Wednesday 14 October** at 16:10 for the final plenary and Congress awards in Room 517D.

Our last session will include a lively debate, followed by drinks and snacks to celebrate our 2016 destination city, Rome.

Complimentary to all fully registered delegates and accompanying persons.
General information

The venue’s information desk (located in Viger Hall) will be able to provide directions and general information.

Cash machines

Banks in Montréal are normally open Monday to Friday from 10:00 to 18:00. There are cash points located in the Les Galeries du Palais shopping area (Ground Floor).

Catering

Tea, coffee and lunches will be served in Room 517AB where the exhibition will be held from lunchtime on Sunday to Wednesday. The first coffee break of the Congress on Sunday will take place in the fifth floor foyer.

Certificates of attendance

Your badge will need to be scanned each day for CME accreditation. To receive your certificate of attendance please complete your Congress evaluation form which will be emailed to your registered email address. If you have any questions please ask at the registration desk.

Communication

Mobile telephones work well within the venue; however we ask that they are kept on silent during Congress sessions.

Disclaimer

Best endeavours will be made to present the program as printed. However ISUOG and its agents reserve the right to alter or cancel without prior notice any of the arrangements, timetables, plans or other items relating directly or indirectly to the Congress for any reason beyond its reasonable control. ISUOG and its agents are not liable for any loss or inconvenience caused as a result of such alteration.

Recordings / duplications

All sessions are available to delegates and ISUOG members after the Congress, through the ISUOG On Demand web portal.* Other photography, audio taping, video recording, digital taping or any other form of duplication is strictly prohibited in the session halls and poster areas, except with the express consent, in advance, of ISUOG and the speakers involved.

*Please note that Hubs will not be recorded.

First aid

Should you require assistance during the Congress hours, please contact the registration desk.

Future meetings

Literature regarding future meetings of interest to participants is displayed in the exhibition area.

Lost property

Please hand any lost property to the staff at the registration desk where it will be made available for collection.

Name badges

Please wear your name badge at all times; you will need this to gain admission to the sessions or exhibition area. Please note, our staff members are instructed not to permit entry without your badge, so please be understanding if you are asked to return to the registration desk. Name badge holders have been colour coded as follows:

Large badge holder:

- Clear: Full delegates
- Purple: ISUOG Board
- Blue: Faculty
- Yellow: Exhibitors (access to exhibition areas only)
- Red: Staff (with wording STAFF on badge)

Small badge holder:

- Clear: Day delegate (with day printed)
- Clear: Accompanying persons (no access to scientific sessions)
- Clear: Pre-Congress course
- Clear: Basic training course

Official language

The official language of the Congress is English. Translation facilities are only available for ISUOG’s basic training course.

Parking

The venue has 2 underground parking lots.

Smoking policy

Smoking is not permitted in the building.

WIFI

Complimentary WIFI is available in some areas of the Palais des congrès.

WIFI network: ISUOG_2015
Password: Montreal2015
Welcome to ISUOG! All fully paid delegates are now ISUOG members for 2016 and join a growing community of over 13,300 members across 128 countries. Your benefits include:

**Online learning**
- 70+ online CME activities available
- 400+ web lectures from ISUOG education courses and Congresses
- World Congress presentations from ISUOG On Demand
- visuog a visual encyclopedia for ultrasound in obstetrics and gynecology

**Reduced fees to ISUOG events**
- 26th World Congress in Rome, 25 - 28 September 2016
- International Symposium in Miami, USA, 17 - 20 February 2016
- ISUOG’s 2016 intensive education courses

**Regional education**
- Opportunities to participate in ISUOG Outreach projects
- Be part of ISUOG’s Approved courses program in 28 countries
- Enjoy our practice guidelines translated in to 12 languages

**Journal**
- Upgrade for access to *Ultrasound in Obstetrics and Gynecology*, the leading peer reviewed journal in its field.

_UOG_ is now a default online journal. Online members can add a print subscription to their membership by upgrading online.

Turn to page 42 to see what’s new 2015….
Does a particular aspect of the program interest you?

Are you looking for further information around a topic featured at the Congress? Would you like to gain further CME points?

Supplement Congress sessions with free UOG articles available to Congress delegates until the end of October or earn related education points via ISUOG’s CME Platform!

Focus on fetal growth

**Monday 12 October**
- Predicting pregnancy outcomes
- Management of growth restriction
- Brain sparing in IUGR: protective or harmful

**Tuesday 13 October**
- Early IUGR
- Fetal growth and predicting IUGR
- Controversies in the management of selective fetal growth restriction in twin pregnancy

**Wednesday 14 October**
- Fetal growth assessment
- Novel findings in IUGR

_UOG top pick:_ Ultrasound screening for fetal growth restriction at 36 vs 32 weeks’ gestation: a randomized trial (ROUTE) E. Roma, et al. V46, pp. 452 - 459

Explore 5 more articles on Growth at:
isuog.org/worldcongress/2015/supplementarylearning

CME platform theme:
9 CME modules on Growth, including Fatima Crispi’s ‘Doppler investigation in late FGR and when to deliver’ and Christoph Lees’s ‘Early fetal growth restriction’, as well as 5 Journal club CME modules, including Aly Youssef’s ‘Changes in fetal Doppler indices as a marker of failure to reach growth potential at term’.

Access these UOG October articles and more via:
isuog.org/worldcongress/2015/supplementarylearning
Cardiac

- 4 Congress sessions throughout Monday, Tuesday and Wednesday
- 14 CME modules online
- 1 UOG article

**UOG top pick:** Fetal cardiac function in late-onset intrauterine growth restriction vs small-for-gestational age, as defined by estimated fetal weight, cerebroplacental ratio and uterine artery Doppler; Pérez-Cruz, M. et al. V46, pp 465 - 471

Prenatal genetic screening / diagnosis

- ISPD joint session on NIPT on Sunday, as well as 3 Congress sessions on Monday
- 19 CME modules online
- 2 UOG articles

**UOG top pick:** Traditional karyotyping vs copy number variation sequencing for detection of chromosomal abnormalities associated with spontaneous miscarriage; Liu, S. et al. V46, pp 472 - 477

Brain imaging & anomalies

- 4 Congress sessions throughout Monday
- 16 CME modules online
- 4 UOG articles

**UOG top pick:** Risk of ultrasound-detected neonatal brain abnormalities in intrauterine growth-restricted fetuses born between 28 and 34 weeks’ gestation: relationship with gestational age at birth and fetal Doppler parameters; Cruz-Martinez, R. et al. V46, pp 391 - 397

Oncology

- 1 Congress session on Monday
- 6 CME modules online
- 1 UOG article

**UOG top pick:** Transvaginal ultrasound for preoperative assessment of myometrial invasion in patients with endometrial cancer: a systematic review and meta-analysis; Alcázar, J. L. et al. V 46, pp 405 - 413

Gain further CME online: isuog.community360.net/login
Participate in Montréal

Visit the ISUOG Lounge in the exhibition hall throughout the Congress to meet the team and explore ISUOG’s opportunities:

- Demonstrations on ISUOG’s new online CME platform
- Membership clinic; everything you need to know about your ISUOG membership
- Meet an editor who can answer your queries about publishing in UOG
- Poster and presentation viewing via ISUOG’s On Demand stations

#LoveUltrasound
Celebrating 25 years

Don’t miss:

- **Our 25th Birthday party**
  Sunday 11 October 2015, 19:00 - 00:00

- **Our AGM - updates on current business and member benefits**
  Sunday 11 October 2015, 10:50 - 11:20

- **Advisory Members meeting - visit the ISUOG Lounge to sign up for our membership development discussions**
  Sunday 11 October, 13:00 - 14:30

WIN a registration for Rome 2016

As part of our 25th birthday celebrations, we invite you to engage with ISUOG’s growing community and share your passion for ultrasound on our social media channels.

Tag @ISUOG and #LoveUltrasound for your chance to WIN a registration to our 2016 Congress in Rome.

Celebrating 25 years #LoveUltrasound
Program orientation

The **program at a glance** gives you an outline to each day’s events including session titles, times and refreshment breaks. The **full program** pages give you the detailed chronological listing of all events. Please note that most sessions run in parallel so you will need to read through sessions taking place at the same time to decide which best suits your needs.

The full program and itinerary planner is available online at: [isuog.org/worldcongress/2015](http://isuog.org/worldcongress/2015) or on mobile devices at: [bit.do/isuog2015](http://bit.do/isuog2015)

Session types explained...

### Plenary sessions

Plenary sessions include invited talks and special lectures on Sunday 11 October and Wednesday 14 October.

### Scientific sessions

Scientific sessions run in parallel rooms on Monday to Wednesday. Oral sessions include invited talks, oral communication presentations (OCs) and short oral presentations (OPs). Poster discussions (P) take place in the Hubs spaces and electronic posters (EP) are viewable on the On Demand platform.

### Invited talks

ISUOG faculty members have been invited to present the state of the art on topics as overviews in scientific sessions or in more detail within the daily workshops.

### Masterclasses

Masterclasses are focused, specialist seminars providing an overview on cutting-edge topics and insight from key experts in the field.

### Oral communication (OC)

Presented within 3 main parallel sessions, OC abstract authors are allocated 5 minutes for their presentation (of no more than 5 slides), plus 3 minutes for discussion.

### Short oral presentation (OP)

OPs are poster submissions considered suitable for short oral presentation. OP abstract authors are allocated 2 minutes to summarise their poster on 1 slide. Discussion will follow after each presentation.

### Electronic posters (EP)

Abstracts accepted as view only posters are available for viewing throughout the Congress on the On Demand stations located at the ISUOG.

### Poster discussions (P)

A number of abstracts accepted as posters are grouped together by topic for chaired discussions.

### Workshops

Educational workshops take place each day and run in parallel from 14:30 - 15:50 (Sunday) and 14:20 - 15:40 (Monday to Wednesday). They consist of between 3 and 4 didactic lectures on key special interest areas and in some cases live scan demonstrations where appropriate. Anyone can attend these popular sessions on a first come, first served basis.

### Live scan

Some scientific and workshop sessions include live scan** demonstrations. Some are quite general and the aim is to give background to the session. In others, faculty will have been asked to demonstrate a particular new technique or technology. ISUOG has determined the content for these sessions, while our sponsors kindly support them by providing technical equipment.

### Awards

The Young Investigator prize and awards for the best presentations in each topic area will be announced at the closing session on Wednesday 14 October and formally acknowledged in our journal, Ultrasound in Obstetrics and Gynecology.

All OC and OP presentations will be judged within their subject categories by the session chairpersons and the ISUOG Scientific Committee.
Interactive session Hubs

ISUOG’s new interactive Hubs in Room 517C will host a variety of research discussions, workshops and networking opportunities. Delegates are encouraged to attend these unique, informal ‘drop-in’ sessions and sign up for the simulation training workshops*. For the full Hubs program, see page 24.

Meet the Professor

Our professors present informal educational discussions focused on their specialist topic and delegates are encouraged to come with questions too. Interested delegates should take a seat at the Hub hosting the Professor of their choice. First come, first served.

Poster discussions (P)

Join any poster discussion Hub you wish and even move between those running in parallel. Poster authors will be in attendance to answer any questions, comment on their work and to meet delegates interested in their research.

Just images

The presentation of images in a specialist area for comment and discussion. These informal Hubs may include discussions of cases and techniques and will give you a chance to engage with some of ISUOG’s renowned faculty up close. First come, first served.

Outreach workshop

Join members of ISUOG’s Outreach committee to shape future Outreach programs and discuss issues relevant to the use of ultrasound in obstetrics and gynecology in rural, remote and underserved areas. All delegates welcome.

Simulation: hands on

Three cutting edge, hands-on training workshops utilising the latest in simulation technology on the afternoon of Monday 12 October.

- Simulation workshop for ultrasound in labour*  
  Director: Tullio Ghi (Italy)

- ISUOG basic training simulation workshop*  
  Director: Ann Tabor (Denmark)

- Ultrasound guided needle procedures in Obstetrics; Université de Montréal, Wake Forest University School of Medicine and Mayo Clinic School of Medicine*  
  Director: Brian Brost (USA)

* Places are strictly limited. Priority to pre-Congress course delegates, remaining places to simulation hubs available on a first come first served basis at the registration desk

Special Interest Groups

ISUOG’s Special Interest Groups discuss research and educational initiatives and collaborative opportunities as well as updates on the latest developments in clinical practice in their specialist areas:

1) Fetal heart  3) Doppler  
2) MRI  4) 3D

All delegates welcome.

ISUOG guidelines

As one of ISUOG’s most valuable member resources, many of our clinical guidelines have now been translated. ISUOG’s guideline Hubs will allow delegates to discuss some of these standards in their own language as well as to network with other physicians practising in their regions.

1) ISUOG guidelines in Mandarin  
2) ISUOG guidelines in English  
3) ISUOG guidelines in French  
4) ISUOG guidelines in Spanish

Chairperson / speaker guidelines

If you are chairing or speaking in a session, please refer to our chairperson, speaker and presenter guidelines online at isuog.org/worldcongress/2015/scientific+program/speaker+information

View Congress presentations online, anytime!

isuo On Demand

On Demand is available at the Congress with thanks to an unrestricted educational grant from:

PHILIPS

** Industry supported: Scientific content of sessions is defined by the Scientific Committee; ultrasound systems and technical support are provided by sponsors.

### ISUOG On Demand

View ISUOG Congress presentations online, anytime!

- Presentations (OC, OP, P, EP, invited talks and workshops) will be recorded and made available on our On Demand platform.
- Access to On Demand is available to all delegates during the Congress, on the On Demand terminals located at the ISUOG Lounge in the exhibition hall. 2016 ISUOG members also have access for the following year online.
- Revisit your favourite lectures or view missed sessions at your leisure.

## Electronic posters at a glance

Electronic posters (EP) are available for viewing throughout the Congress on the ISUOG On Demand terminals located in the ISUOG Lounge in the exhibition hall. You can also send questions or comments to authors using our integrated e-mail facility. Electronic posters are subject categorised in the following pages.

<table>

How can I access my program and abstract book electronically?

Abstract book is online
Log in to isuog.org to view the program and abstracts, plan your sessions, and get the most out of your time at the 25th World Congress! Download the .pdf version of the program straight onto your smart device and have the program in your pocket.

UOG Journal app
Access over 700 abstracts at your fingertips! Download the 2015 abstract book using the UOG Journal app. The tool also offers full and online members enhanced access to this leading peer-reviewed journal.

On Demand
On Demand gives all ISUOG members exclusive and easy access to selected Congress presentations and their associated abstracts. Log in today or meet the ISUOG team at the exhibition stand for a demonstration.

Itinerary planner
Plan your attendance at the Congress, access abstracts or download the program into Excel or directly into your calendar. Download it today on ScholarOne! (isuog2015.abstractcentral.com/planner.jsp).

Congress mobile app
Access the program and abstracts, plan your agenda and view floorplans on the mobile app (bit.do/isuog2015). Import your itinerary planner from ScholarOne.

Stay connected
Stay in touch with the ISUOG community by joining the conversation on our social media platforms. Tag photos #ISUOG2015 and follow @isuog on Instagram and Twitter to stay connected with the latest news!

Abstracts are available:
- On isuog.org as a .pdf
- Via UOG website
- UOG journal app
- On Demand
- Itinerary planner
- Congress mobile app

Join the Congress conversation #ISUOG2015
08:30 - 17:15  **Ultrasound in term and preterm labour**

A one day programme that combines presentations and debate with live scanning and video demonstrations from experts in the field. This course is designed for residents and trainees who are already confident ultrasound practitioners and wish to extend their knowledge and clinical skills in the management of preterm birth, labour and intrapartum ultrasound.

Presented in partnership with:

---

08:30 - 17:20  **ISUOG basic training**

A theoretical introduction to the basic principles of ultrasound in obstetrics and gynecology. The program is aimed at entry level trainees of any profession or residents/trainees looking to refresh their knowledge and gain CME.
 Earn CME any time from anywhere in the world

Supplement your learning and gain CME* through ISUOG’s latest educational resource

Latest learning activities:
- ISUOG’s Practice Guidelines
- Web lectures from ISUOG education courses and congresses
- Journal Club articles from Ultrasound in Obstetrics and Gynecology

93% of users said the learning activities have improved their professional effectiveness

“I feel more confident answering questions and counselling.”

99% of CME users reported being satisfied with ISUOG’s educational content

Start exploring at isuog.org

70+ online CME activities now available

* 1 AMA PRA category credit = 1 EACCME credit

For more information about online CME, get in touch:
E: info@isuog.org    T: +44 (0)20 7471 9955
Program - Saturday 10 October 2015

08:30 - 17:15 Ultrasound in term and preterm labour

Chair: V. Berghella (United States); R. Romero (United States)

08:30 Welcome, introduction and learning objectives
V. Berghella (United States)

Predicting and managing preterm labour

08:45 Epidemiology of preterm birth
V. Berghella (United States)

09:15 Prediction of preterm birth in unselected populations (live streamed from the UK)
K. Nicolaides (United Kingdom)

09:45 Ultrasound in women with threatened preterm labour
V. Berghella (United States)

10:15 Discussion

10:25 - 10:55 Coffee

10:55 Strategies for the prevention of preterm birth
R. Romero (United States)

11:25 LIVE SCAN: tips from the experts: cervical elastography and how it can help
[industry supported*]
H. Feltovich (United States)

11:55 DEBATE: cerclage in the prevention of preterm birth: a major role versus a minor role
V. Berghella; R. Romero (United States)

12:25 - 13:25 Lunch

Using ultrasound to optimise outcomes of labour
Chair: V. Berghella (United States); G. Pilu (Italy)

13:25 Cervical length in predicting spontaneous term labour
V. Berghella (United States)

13:40 Ultrasound before labour: fetal wellbeing, predicting labour outcome and “inducibility”
G. Pilu (Italy)

14:10 Assessment for trial of labour after Caesarean section
E. Bujold (Canada)

14:40 Ultrasound in labour: the second stage and deciding on operative or vaginal delivery
T. Ghi (Italy)

15:10 Discussion

15:20 - 15:50 Coffee

15:50 Video demonstration: tips from the experts: intrapartum ultrasound, impact on delivery in practice
T. Ghi (Italy)

16:20 The hidden cost of vaginal birth
H.P. Dietz (Australia)

16:50 Discussion

17:00 Summary and session ends
V. Berghella (United States)

* Scientific content of sessions is defined by the Scientific Committee; ultrasound systems and technical support are provided by sponsors.

**In training? …more opportunities in Montréal**

**ISUOG’s basic training course translations**

Course recordings will be available on the ISUOG website late in the year; members can review in their own language!

**Practical training**

On Monday 12 October ISUOG will run its first hands-on basic training workshop using simulation technology. If you weren’t able to reserve a place this time, look out for more state-of-the-art ISUOG practical training courses throughout 2016. Discounts for trainees will apply!

**UOG Journal Club**

Trainees receive free access to UOG as part of their membership. You are invited to join the onsite UOG Journal Club on Wednesday 14 October in the Hubs space (Room 517C, 12:55-13:15) to see how easy it is to host your own UOG Journal Clubs throughout the year.

**Continuing medical education points**

ISUOG’s basic training recommendations are published on our new CME platform. Members are invited to make the most of this complimentary resource; complete the basic training learning module and pass the post-test to earn CME credit.

**Membership benefits**

Visit the ISUOG Lounge to learn about special trainee member benefits. Find out if your institution could qualify to provide free online memberships for trainees in your country!
Upgrade your membership to access the journal and the UOG app

Do you want to access to the leading peer reviewed journal in the field, *Ultrasound in Obstetrics and Gynecology*, (UOG) every month?*

- Original articles
- Monthly systematic reviews
- Referee commentaries
- Expert perspectives
- UOG Journal Club
- How to articles
- Statements and guidelines
- UOG journal app

With it’s highest impact factor ever, UOG is now ranked 6th out of 79 journals in obstetrics and gynecology and is considered the leading peer-reviewed international journal on imaging in obstetrics and gynecology.

**Upgrade onsite at the registration desk from just $102**

Visit the ISUOG Lounge to find out more about the journal and test out the UOG App.

**Join our journal activities at Congress:**

- UOG Journal Club
  Wednesday 14 October in the Hubs space (Room 517C, 12:55-13:15).
- Meet the Professor: ‘how to keep your Editor happy’
  Monday 12 October 2015 at 13:30 - 14:30
- Supplement your Congress experience - look out for our links to relevant current journal content isuog.org/worldcongress/2015/supplementarylearning
  (more information on pages 12-13)

**Contact us for more information:** info@isuog.org | +44 (0)20 7471 9955

*All Congress delegates receive ISUOG membership for 2016. New members receive core membership which does not include access to the journal. If you are unsure about what membership tier you have, please visit the ISUOG Lounge and speak to one of the team*
Program - Sunday 11 October 2015

09:30 - 10:50 Plenary
ISUOG at 25: expanding our reach 517CD

10:50 - 11:20 AGM
ISUOG past, present and future 517CD

11:50 - 13:00 Plenaries and top abstracts 517CD

13:30 - 14:30 Industry sponsored satellite symposium

14:30 - 15:50 Workshops
NIPT: possibilities and pitfalls 517CD
Clinical use of 3D ultrasound in obstetrics and gynecology 520
Heart beat: normal irregular slow 524
Using ultrasound in gynecological oncology 518

16:20 - 17:40 Plenary
A global perspective 517CD

17:40 - 18:15 Opening ceremony 517CD

18:15 - 19:00 Welcome reception 517AB

19:00 - 00:00 ISUOG’s 25th Birthday Party 710

Access the Congress mobile app

Keep up to date with the program on your smartphone!

Key features include:

• Personalise your agenda and plan your day
• Take notes during the event which you can download later
• View the venue floorplan
• Browse exhibitor profiles

To access the app go to bit.do/isuog2015

Join the Congress conversation #ISUOG2015  
Have your say in Montréal!

Attend the ISUOG AGM

Sunday 11th October
10:50 - 11:20
Room 517CD

The agenda and accompanying documents are available at: isuog.org/membership/AGM

Advisory Members meeting NEW

Sunday 11th October
13:00 - 14:30
Room 720

Visit the ISUOG Lounge to sign up for our membership development discussions (limited places available)

Special Interest Groups NEW

Tuesday 13th October
16:10 - 17:30
Room 517D

What's your topic of special interest? Discover more at our new Hub sessions...

- Perinatal vascular and Doppler
- 3D ultrasound
- Fetal MRI
- Fetal heart
Program - Sunday 11 October 2015

*Chairs: A. Papageorghiou (United Kingdom); T. Bourne (United Kingdom)*

11:50 Stuart Campbell lecture: implementation of maternal blood cell-free DNA testing in early screening for aneuploidies

M. Gil (United Kingdom)

12:10 Reduced fetal cerebral oxygen consumption is associated with smaller brain size in fetuses with congenital heart disease

L. Sun1,2; C. Macgowan1; J. Sled1; S. Yoo1; C. BSc; P. Porayette2; L. Grosse-Wortmann1; E. Jaeggi2; B. McCrindle1; J.C. Kingdom1; E. Hickey2; S. Miller2; M. Seed1 (China); 2 (Canada)

12:20 External validation of IOTA simple descriptors and simple rules for differential diagnosis of adnexal masses

M. Pascual1; J.L. Alcázar1; S. Guerriero2; B. Graupera1; L. Hereter1; S. Ajossa2; J. Minguez1; M. Jurado1 (Spain); 2 (Italy)

12:30 Atypical karyotypic abnormalities not identified through NIPT: the value of identifying fetal anomalies at the first or second trimester scan?

O. Petersen1; C. Ekelund1; J. Hyett2; A. Tabor1; I. Vogel1 1 (Denmark); 2 (Australia)

12:37 Discussion

**Notes:**

- **OC01.01** Reduced fetal cerebral oxygen consumption is associated with smaller brain size in fetuses with congenital heart disease
- **OC01.02** External validation of IOTA simple descriptors and simple rules for differential diagnosis of adnexal masses
- **OC01.03** Atypical karyotypic abnormalities not identified through NIPT: the value of identifying fetal anomalies at the first or second trimester scan?

* This presentation is eligible for the Young Investigator award (to be presented in the closing plenary).
Keynote speaker biographies

Stuart Campbell

Professor Stuart Campbell is a pioneer of Ultrasound Diagnosis in medicine. He has introduced many new techniques such as the routine pregnancy scan, the early diagnosis of fetal abnormalities, the assessment of fetal growth and wellbeing, screening for pre-eclampsia by uterine artery Doppler and ultrasound screening for ovarian cancer. He holds numerous international honours and has recently introduced 3D scanning to the UK and set up the first 4D Ultrasound Clinic.

Professor Campbell is the former Academic Head of the Department of Obstetrics and Gynaecology at Kings College Hospital and St George’s Hospital Medical School, London. He was the founding President of ISUOG and founding Editor in Chief of Ultrasound in Obstetrics and Gynecology and is an Honorary Fellow of the American College of Obstetricians and Gynaecologists.

Ian Donald Gold Medal 2015 - Torvid Kiserud

ISUOG welcomes Torvid Kiserud to Montréal to receive its most prestigious award, the Ian Donald Gold Medal, in recognition of his outstanding contribution to the field of ultrasound in obstetrics and gynecology.

Torvid is attached to Haukeland University Hospital, where he built up and led a fetal medicine unit and started a research group focussed on clinical physiology. This earned him a professorship at University of Bergen, Norway. Torvid pioneered ductus venosus as a clinical tool, standardised the technique, established reference ranges, unfolded its functional relation to the liver and foramen ovale, its hemodynamics and regulatory mechanisms. This directed him to fetal liver circulation, its developmental importance and clinical relevance. Fetal growth and venous and arterial hemodynamics in general are major areas for his search for mechanisms of diseases, and healthy development. However, this was his second career in life, his first being a busy commitment in obstetrics and women’s health spending many years in Ethiopia. His recognition in emergency obstetrics and particularly fistula repair brought him to establish a fistula centre in Norway that was recently made national referral centre.

María del Mar Gil Mira

Mar qualified in Medicine and specialized in Obstetrics and Gynecology in Madrid, Spain. Since 2012 she has been a Research Fellow at Harris Birthright Research Centre for Fetal Medicine, King’s College Hospital, London. From 2012 to date she’s published, under the supervision of Professor Kypros Nicolaides, a series of clinical validation and implementation studies on cell free DNA analysis of maternal blood for early screening of aneuploidies. She’s attended several specialist meetings on this field which also constitutes her PhD.
The risk of 22q11.2 deletion in fetuses with a right aortic arch and a normal heart

N. Volpe; A. Perolo; V. De Robertis; I. Cataneo; G. Campobasso;
T. Frusca; T. Ghi; G. Pilu; P. Volpe (Italy)

12:45 Discussion

Is cerebroplacental ratio a marker of impaired fetal growth velocity and adverse pregnancy outcome?

A. Khalil; N. Khan; J. Morales-Roselló; P. Agarwal; A. Papageorghiou;
A. Bhide; B. Thilaganathan (United Kingdom)

12:57 Discussion

13:00 - 14:30 Lunch and e-poster viewing (EP)

13:30 - 14:30 Industry sponsored satellite symposium**

14:30 - 15:50 Workshop: NIPT: possibilities and pitfalls  Room 517CD

Chairs: S. Langlois (Canada); J. Johnson (Canada)

NIPT based on cfDNA: the basics

S. Langlois (Canada)

Paradigms of screening: routine versus selective cfDNA screening

A. Tabor (Denmark)

Beyond NIPT for the common trisomies: zooming in and out of the fetal genome

L. Hui (Australia)

NIPT: what are the downstream effects?

J. Johnson (Canada)

14:30 - 15:50 Workshop: Clinical use of 3D ultrasound in obstetrics and gynecology  Room 520

Chairs: L. Gindes (Israel); L. Platt (United States)

LIVE SCANS [industry supported*]:

Clinical application of 3D ultrasound in fetal anatomical assessment: collaborative approach

W. Lee; L. Platt (United States)

Clinical application of 3D ultrasound in gynecological anatomy: collaborative approach

B. Benacerraf; I. Timor-Tritsch (United States)

14:30 - 15:50 Workshop: Heart beat: normal, irregular, slow  Room 524

Chairs: J. Carvalho (United Kingdom); J. Copel (United States)

What is important when assessing cardiac rhythm?

B. Tutschek (Switzerland)

Skipped beats: usually benign… but when are they not?

J. Carvalho (United Kingdom)

* Scientific content of sessions is defined by the Scientific Committee; ultrasound systems and technical support are provided by sponsors.
** Lunchtime satellite symposia are brought to you by our sponsors and are not part of the ISUOG CME program. ISUOG takes no responsibility for scientific or clinical content. Please see page 126 for our satellite program.
Michael Kramer

Dr. Michael S. Kramer is James McGill Professor in the Departments of Pediatrics and of Epidemiology and Biostatistics at McGill University Faculty of Medicine and Director of the Centre for Outcomes Research and Evaluation at the Research Institute of the McGill University Health Centre. In 2011, Dr. Kramer was elected a Fellow of the Royal Society of Canada in the Life Sciences Division of the Academy of Science, in recognition of the important impacts that his research on infant feeding and adverse pregnancy outcomes has had on clinical practice and public health policy. Dr. Kramer has authored or co-authored 20 books and monographs, and has published over 400 original articles. In 2010, Dr. Kramer was the recipient of the Paediatric Academic Leadership–Clinical Investigator Award from the Pediatric Chairs of Canada in October. This award recognized his administrative leadership in the child health research community in Canada and his prominent role in influencing child health globally.

Neil Sebire

Professor Sebire is a clinical academic Paediatric and Perinatal Pathologist at a specialist London Paediatric Hospital, and as Lead for the NIHR BRC Diagnostics and Imaging Theme, is responsible for delivering translational research projects across radiology and laboratory medicine in one of the leading units of patient-focused research in this field. He has held numerous Regional and National strategic and academic roles, including within RCOG, RCPath, CCLG and BRIPPA, including training. His main current research interests include placental pathology of obstetrical complications and gestational trophoblastic disease, paediatric surgical pathology contributions to cutting-edge therapies, and research involving novel postmortem investigations into causes of sudden unexpected death in infancy and development of the minimally invasive autopsy. He is passionate about adopting new technologies into diagnostic histopathology practice and developing novel autopsy services. He has published 4 textbooks, >500 articles in peer-reviewed journals and has >15,000 citations to published works.

Aris Papageorghiou

Aris divides his time between being a BRC Senior Fellow in Fetal Medicine at the Nuffield Department of Obstetrics and Gynaecology, and Consultant in Fetal Medicine and Obstetrics at St George’s Healthcare NHS Trust in London. He obtained his medical degree at the University of Sheffield. He undertook his MD thesis at the University of London, on the prediction of pre-eclampsia using uterine artery Doppler. During this time he was a Research Fellow at the Harris Birthright Research Centre for Fetal Medicine. Following this he completed his specialisation in Obstetrics and Gynaecology, and undertook subspecialist training in Maternal and Fetal Medicine while a lecturer at St George’s, University of London. Aris’s clinical and research interests include obstetric ultrasound, normal and abnormal fetal growth, pre-eclampsia and fetal diagnosis and treatment.
15:10 Sinus bradycardia: when is it not fetal distress?  
**B. Cuneo (United States)**

15:30 Fetal heart block: can we prevent occurrence and recurrence?  
**J. Copel (United States)**

**Alfred Abuhamad**

Dr. Abuhamad currently serves as Professor and Chairman for the Department of Obstetrics and Gynecology and director of the Maternal-Fetal Medicine Fellowship Program. He is the president of the Society of Ultrasound in Medical Education, Chair of the American Congress of Obstetrics and Gynecology Council on Patient Safety in Women’s Health Care and serves on the Executive Committees of the International Society of Ultrasound in Obstetrics and Gynecology and the Society of Maternal-Fetal Medicine. Dr. Abuhamad is the immediate past-President of the American Institute of Ultrasound in Medicine and the National Perinatal Quality Forum. He has published more than 160 peer-reviewed manuscripts, received numerous national awards and has authored five textbooks in fetal echocardiography, ultrasound in Obstetrics and Gynecology, and office procedures. Dr. Abuhamad led several ultrasound training missions to the developing world. He is well known internationally for his work in ultrasound, prenatal diagnosis, fetal echocardiography, global outreach and patient safety.
Program - Monday 12 October 2015

07:30 - 08:10  Masterclasses

08:15 - 09:35  Parallel sessions (OC)
Predicting pregnancy outcomes  517D
Structural heart disease and cardiac function  520
Characterising ovarian pathology  524

09:40 - 10:20  Short oral presentations (OP)
Pre-eclampsia: prediction, prevention, effects  517D
Functional analysis of the fetal heart  520
Evaluating ovarian pathology  524
Twin pregnancy  518

10:20 - 10:40  Poster discussion Hubs (P)  517C

10:45 - 12:05  Parallel sessions (OC)
First trimester ultrasound: from NT to NIPT  517D
Fetal neurosonography  520
Ultrasound in oncology  524

12:10 - 12:50  Short oral presentations (OP)
First trimester ultrasound: beyond NT  517D
Fetal brain imaging  520
The use of ultrasound in oncology  524
Simulation, quality and safety  518

12:55 - 13:15  Poster discussion (P) and Just Images Hubs  517C

13:15 - 14:15  Industry sponsored satellite symposium  517D

13:30 - 14:00  Meet the Professors  517C

14:20 - 15:40  Workshops
Commonly missed cardiac anomalies  517D
Counselling for brain abnormalities: anatomy to clinical application  520
Management of growth restriction  524
Lessons from the IOTA study on classifying ovarian masses  518

14:20 - 17:30  Simulation workshops  517C

16:10 - 17:30  Parallel sessions (OC)
Complications in twins  517D
Urogynecology  520
Brain sparing in IUGR: protective or harmful?  524
What’s new in 2015?

Hands on simulation
- Basic Training
- Ultrasound in Labour
- Invasive Procedures

Saturday 10th October
Pre-booking required
Sign up at the registration desk

Interactive Hubs
- Journal sessions
- Just images
- Guidelines
- Meet the Professors
- Special Interest Groups
- Poster discussion

HUB Sessions take place
Monday - Wednesday, 11:10 - 17:50
For more information please see p. 17 & 24

CME online
Supplement your Congress experience with related learning activities on our new CME platform! Access journals lectures, Journal articles, and guidelines on Doppler, fetal growth, labour, prenatal genetics…and much more!

MONDAY PROGRAM

08:59 Natural history of ovarian endometrioma in pregnancy
K. Pateman; T. Holland; F. Moro; D. Mavrelos; X. Foo;
D. Jurkovic (United Kingdom)  
09:04 Discussion
09:07 Sonographic assessment of ovarian masses: comparative retrospective cohort study on accuracy of IOTA LR1 versus IOTA LR2 versus Sassone scoring system
R. Salvador; M. De Vera (Philippines)  
09:12 Discussion
09:15 Analysis of the diagnostic value of gynecologic imaging reporting and data system, HE4 and CA125 in the presurgical assessment of adnexal tumors
N. Abdalla; M. Kania; M. Bachanek; K. Cendrowski; W. Sawicki (Poland)  
09:20 Discussion
09:23 Assessment of the vascular tree marginally improves discrimination of ovarian tumors difficult to classify as benign or malignant on 2D ultrasound
P. Sladkevicius; L. Jokubkiene; S. Guerriero; E. Epstein; D. Franchi; D. Fischerová; A. Testa; M. Pascual; A. Czekierdowski;
C. Van Holsbeke; D. Timmerman; L. Ameye; R. Fruscio; L. Valentin  
09:28 Discussion

09:40 - 10:20 Short oral presentations (OP)

| OP01: Pre-eclampsia: prediction, prevention, effects | Room 517D |
| OP02: Functional analysis of the fetal heart | Room 520 |
| OP03: Evaluating ovarian pathology | Room 524 |
| OP04: Twin pregnancy | Room 518 |

10:15 - 10:45 Coffee and e-poster viewing (EP)

10:20 - 10:40 Poster discussion Hubs (P)  

| P01: Delivery prediction throughout the trimesters | Hub 1 |
| Chair: L. Platt (United States) |
| P02: First trimester screening | Hub 2 |
| Chair: C. Bilardo (Netherlands) |
| P03: Case reports: fetal growth and placenta | Hub 3 |
| Chair: C. Brezinka (Austria) |
| P04: Ultrasound to assess the urogynecology patient | Hub 4 |
| Chair: V. Eisenberg (Israel) |

10:45 - 12:05 First trimester ultrasound: from NT to NIPT  

Chairs: J. Hyett (Australia); N. Okun (Canada)

10:45 MoM-based approach to non-invasive prenatal testing using exponentially weighted moving average chart and chromosomal fingerprint
M. Hynek; F. Zembol; I. Maresova; S. Horackova; M. Putzova;
D. Stejskal (Czech Republic)  
10:50 Discussion

11:29 Spina bifida: prenatal diagnosis, natural history and outcome in 213 cases: experience of a single third-level centre
L. Masini; G. Noia; M. De Santis; C. Rendeli; M. Caldarelli; L. Massimi; G. Tamburrini; C. Di Rocco; A. Caruso (Italy)
OC06.04
11:34 Discussion
11:37 Sonographic visualisation of neural tube defects in over 300 cases of embryonic demise
D.R. Hartge; M. Gembicki; J. Weichert (Germany)
OC06.05
11:42 Discussion
11:45 Vein of Galen aneurysm: analysis of perinatal determinants of prognosis in a single centre series of 19 cases
D. Paladini; S. Buratti; C. Martinetti; G. Tuo; M. Marasini; E. Lampugnani; G. Donarini; C. Gandolfo; A. Rossi (Italy)
OC06.06
11:50 Discussion
11:53 Approach to the sonographic evaluation of fetal ventriculomegaly at 11 to 14 weeks gestation
G. Manegold-Brauer1,2; A. Oseledchyk1; A. Flöck1; C. Berg1
U. Gembruch1; A. Geipel1 (Germany); 2(Switzerland)
OC06.07
11:58 Discussion

10:45 - 12:05 Ultrasound in oncology Room 524

Chairs: L. Valentin (Sweden); D. Fischerová (Czech Republic)

10:45 How and when to use ultrasound guided Trucut biopsies in gynecological oncology
D. Fischerová (Czech Republic)
OC07.01
11:05 The International Endometrial Tumor Analysis (IETA) study: interim analysis of measurement differences between centres
L. Wynants1; A. Installé1; M. Pascual3; F. Leone4; P. Sladkevicius5; J.L. Alcázar3; L. Valentin5; E. Epstein5; B. Van Calster1; T. Bourne2; D. Timmerman1; T. Van den Bosch1
1(Belgium); 2(United Kingdom); 3(Spain); 4(Italy); 5(Sweden)
OC07.02
11:10 Discussion
11:13 A trial of preoperative diagnosis of uterine sarcoma using tumor signal intensity at magnetic resonance imaging (MRI)
Y. Oka; S. Makinoda (Japan)
OC07.03
11:18 Discussion
11:21 Intra- and interobserver reproducibility with regard to describing ultrasound images of the endometrium using IETA terminology
L. Valentin1; P. Sladkevicius4; D. Timmerman1; T. Van den Bosch1; B. Benenarrf5; L. Jokubkiene4; A. Di Legge3; A. Votino1; L. Zannoni2; A. Installé1 (Belgium); 2(Italy); 3(United States); 4(Sweden)
OC07.04
11:26 Discussion
11:29 Transvaginal/transrectal ultrasound for assessing myometrial infiltration in endometrial cancer: a comparison of six different approaches
J.L. Alcázar; L. Pineda; T. Martinez-Astorquiza Corral; R. Orozco; L. Juez; J. Utrilla-Layna; J. Miguez; M. Jurado (Spain)
OC07.05

Roundtable on standards for fetal growth  
A. Papageorghiou (United Kingdom); L. Platt (United States); S. Yagel (Israel)

Just images: using 3D ultrasound for gynecological scans  
B. Benacerraf (United States)

14:20 - 15:40 Workshop: Commonly missed cardiac anomalies  
Room 517D

Chairs: J. Copel (United States); J. Fouron (Canada)

14:20 Coarctation of the aorta  
H. Gardiner (United States)

14:35 Double outlet right ventricle  
J. Rychik (United States)

14:50 Anomalous pulmonary venous return  
R. Chaoui (Germany)

15:05 Transposition of great arteries  
A. Abuhamad (United States)

15:20 Faculty discussion

14:20 - 15:40 Workshop: Counselling for brain abnormalities: anatomy to clinical application  
Room 520

Chairs: D. Pugash (Canada); A. Toi (Canada)

14:20 Core anatomy and transient aspects of brain development  
D. Pugash (Canada)

14:40 Corpus callosum and midline development  
G. Malinger (Israel)

15:00 Imaging the posterior fossa  
G. Pilu (Italy)

15:20 Challenges in counselling for borderline CNS anomalies  
D. Pugash (Canada); A. Toi (Canada); G. Pilu (Italy); G. Malinger (Israel)

14:20 - 15:40 Workshop: Management of growth restriction  
Room 524

Chairs: C. Lees (United Kingdom); T. Kiserud (Norway)

14:20 Early onset IUGR  
C. Lees (United Kingdom)

14:40 Late onset IUGR: identification and management  
F. Figueras (Spain)

15:00 Impact of IUGR on brain development: lessons from MRI  
M. Sanz Cortes (United States)

15:20 DEBATE: redistribution is not brain sparing  
For F. Hernandez-Andrade (United States)  
Against T. Kiserud (Norway)

15:30 Discussion

14:20 - 15:40 Workshop: Lessons from the International Ovarian Tumor Analysis (IOTA) study on classifying ovarian masses  
Room 518

Chairs: T. Bourne (United Kingdom); A. Testa (Italy)

14:20 Pattern recognition and descriptors to classify ovarian masses: introducing a three-step strategy  
T. Bourne (United Kingdom)
14:35  The practical use of IOTA simple rules to classify ovarian masses  
*L. Valentin* (Sweden)

14:50  Using the IOTA ADNEX prediction model to classify masses as benign, 
borderline, metastatic or primary malignant  
*D. Timmerman* (Belgium)

15:05  Can the IOTA approach be integrated into protocols in the United States:  
should we update the ACR criteria?  
*S. Goldstein* (United States)

15:20  Discussion about possible new North American guidance

**14:20 - 17:30 Simulation workshops (pre-event booking required)**  
Room 517C

ISUOG basic training  
*T. Chudleigh* (United Kingdom)

Simulation for ultrasound in labour  
*T. Ghi* (Italy)

Hands-on simulation for ultrasound-guided needle procedures  
in obstetrics  
*B. Brost* (United States)

**15:40 - 16:10 Coffee and e-poster viewing (EP)**

**16:10 - 17:30 Complications in twins**  
Room 517D

*Chairs: B. Thilaganathan (United Kingdom); M. Bebbington (United States)*

16:10  Dichorionic diamniotic twin pregnancy after single blastocyst embryo  
transfer is a more common finding than we thought: a single centre’s  
8-year experience  
*T. Murakoshi; K. Miura; M. Wagata; T. Yokouchi; T. Mishima; S. Shiojima;  
T. Shinno; M. Matsushita; M. Matsumoto; H. Masuzaki; Y. Torii* (Japan)

16:15  Discussion

16:18  The significance of chorionicity on long-term outcome of low birthweight  
infants of less than 1,500 grams in twin pregnancies  
*H. Kawamura; K. Ishii; N. Yonetani; A. Mabuchi; S. Hayashi; N. Mitsuda* (Japan)

16:23  Discussion

16:26  Feasibility and perinatal outcomes of laser surgery for monochorionic  
twin gestation with selective intrauterine growth restriction  
*K. Ishii; M. Nakata; S. Wada; T. Murakoshi; H. Sago* (Japan)

16:31  Discussion

16:34  The use of aortic displacement as a surrogate for intertwin pulse  
pressure differences in monochorionic pregnancies with and without TTTS  
*C. Wohlmutth; F. Osei; K. Moise; A. Johnson; R. Papanna; M. Bebbington; H. Gardiner*  
(United States; Austria)

16:39  Discussion

16:42  Are serial MRIs of any value in the assessment of cerebral ischemic  
injury following co-twin demise?  
*A. Morency; S. Blaser; J. Keunen; R. Windrim; G. Seaward; G. Ryan* (Canada)

16:46  Is neurosonography predictive of MRI findings after co-twin demise in  
monochorionic pregnancies?  
*A. Morency; S. Blaser; A. Robinson; J. Keunen; R. Windrim; G. Ryan* (Canada)

16:50  Discussion
16:53 Fetal brain abnormalities in twin pregnancies complicated by twin–twin transfusion syndrome: systematic review and meta-analysis
A. Khalil; R. Townsend; N. Khan; A. Papageorghiou; A. Bhide; B. Thilaganathan (United Kingdom)

16:58 Discussion

17:01 TTTS outcomes: short- and long-term outcomes
K. Hecher (Germany)

17:21 Discussion

16:10 - 17:30 Urogynecology

**Chairs: V. Eisenberg (Israel); S. Yagel (Israel)**

16:10 VIDEO DEMONSTRATION: evaluating the pelvic floor in practice
H.P. Dietz (Australia)

16:30 Obstetric anal sphincter injuries (OASIS) grade 3A: are they as innocent as we think?
V.H. Eisenberg; Y. Avidan; G. Bitman; R. Achiron; E. Schiff; M. Alcalay (Israel)

16:35 Discussion

16:38 Detection of ureter fistulas using the “pumping probe technique” and subsequent treatment with a covered self-expanding and sealing ureteral stent
J. Neymeyer; A. Weintraub; A. Weichert (Germany)

16:43 Discussion

16:46 Does pelvic organ support deteriorate in the years following a first birth?
C. Wanderley Ferreira; I. Kamisan Atan; S. Langer; H.P. Dietz (Australia)

16:51 Discussion

16:54 Antenatal pelvic floor biometry associated with levator ani muscle injury in primiparous women
S.S. Chan; R. Cheung (Hong Kong)

16:59 Discussion

17:02 Evaluation of the anal sphincter in women with obstetric anal sphincter injuries. Comparison between transperineal and endoanal ultrasound techniques
C. Ros¹; E. Martinez²; M. Wozniak²; N. Elias¹; M. Lopez¹; M. Palacio¹; A. Wieczorek²; M. Espuña¹ (Spain); ²(Poland)

17:07 Discussion

17:10 Does levator ani muscle injury associate with successful fitting of vaginal pessary in women with pelvic organ prolapse?
R. Cheung; S. Chan (Hong Kong)

17:15 Discussion

17:18 Incidence of levator ani muscle injury occurred after a second delivery in Chinese women
R. Cheung; S. Chan (Hong Kong)

17:23 Discussion

17:26 Correlation between palpation, manometry and ultrasound measurements for assessment of pelvic floor muscle contractility
I. Volloyhaug; S. Morkved; K. Salvesen (Norway)

17:31 Discussion
16:10 - 17:30  Brain sparing in IUGR: protective or harmful?  Room 524

Chairs: A. Baschat (United States); J. Kingdom (Canada)

16:10  Physiological adaptation in IUGR  A. Baschat (United States)

16:30  Is fetal cerebroplacental ratio associated with deterioration of placental function?  A. Khalil; J. Morales-Roselló; R. Townsend; M. Carvalho Afonso; A. Bhide; A. Papageorghiou; B. Thilaganathan (United Kingdom)

16:35  Discussion

16:38  Frontal lobe brain sparing in fetuses affected by late onset fetal growth restriction demonstrated by three dimensional power Doppler angiography  A. Rossi; I. Romanello; G. Filip; J. Mauro; L. Forzano; D. Marchesoni (Italy)

16:43  Discussion

16:46  Assessment of intracranial structure volumes in growth restriction fetuses by means of 3D ultrasound using XI VOCAL method  A.R. Caetano; A. Zamarian; R. Cavalcante; T. Helfer; N. Melo; E. Araujo Junior; L. Nardozza; A. Moron (Brazil)

16:51  Discussion

16:54  Brain metabolic differences assessed by MR Spectroscopy in neonates born at term small-for-gestational-age and with intrauterine growth restriction  M. Sanz Cortes; R. Simoes; N. Bargallo; F. Figueras; E. Gratacós (Spain)

16:59  Discussion

17:02  Developmental origin of adult disease (Rats to brats)  A. Nuyt (Canada)

17:22  Discussion
OP01: Pre-eclampsia: prediction, prevention, effects  Room 517D

Chairs: T. Kiserud (Norway); J. Johnson (Canada)

Development of a prediction model for pre-eclampsia using clinical biophysical and biochemical markers in a Chinese population
T. Leung (China)

First trimester screening of circulating C19MC microRNAs can predict subsequent onset of gestational hypertension
I. Hromadnikova (Czech Republic)

Comparison of 80 vs. 160mg of aspirin in pregnant women with previous history of pre-eclampsia: a randomised controlled trial
S. Tapp (Canada)

Second trimester prediction of placental disease versus pre-eclampsia-SGA outcomes in nulliparous women
R. Windrim (Canada)

Cardiovascular and cerebrovascular - disease associated microRNAs are dysregulated in placental tissues affected with pre-eclampsia and intrauterine growth restriction
I. Hromadnikova (Czech Republic)

Hemodynamic changes in the central nervous system, detected by ophthalmic artery Doppler, in pregnant women with chronic hypertension
A.D. Diniz (Brazil)

Is there normalisation of cerebrovascular Doppler parameters in postpartum pre-eclamptic women? An ophthalmic artery Doppler evaluation
A.D. Diniz (Brazil)

OP02: Functional analysis of the fetal heart  Room 520

Chairs: H. Gardiner (United States); M. Herrera (Colombia)

Congenital heart disease variability in mechanisms of altered oxygen delivery influence vascular resistances in the fetus
J. Rychik (United States)

Quantitative comparison of cardiac performance index derived from a novel automatic method and traditional technique in normal fetuses
B.W. Zhao (China)

Evaluating fetal tricuspid and mitral annular plane systolic excursion (TAPSE and MAPSE) using spatiotemporal image correlation (STIC) M-mode
A.W. Welsh (Australia)

Applications of z-scores of mitral-tricuspid valve distance in screening of fetal Ebstein anomaly
B.W. Zhao (China)

2D speckle-tracking echocardiography in intrauterine growth restricted fetuses
F. Fuchs (France)

Withdrawn

Quantitative study of the distance between the left atrial posterior wall and the descending aorta in four chamber view of the fetal heart
B.W. Zhao (China)

New automatic analysis of tissue Doppler traces for a simplified assessment of fetal cardiac function
L. Herling (Sweden)

Effects of persistent left superior vena cava connected with coronary sinus on fetal cardiac structure and hemodynamics
Y. He (China)
OP03: Evaluating ovarian pathology

**Chairs: D. Timmerman (Belgium); J. Preisler (United Kingdom)**

- Elastographic features of ovarian dermoid cysts
  - **S. Ferrero (Italy)**
- Role of logistic regression model 2 and risk of malignancy index RMI-IV in the preoperative assessment of adnexal masses
  - **N. Abdalla (Poland)**
- Comparison of imaging features of adnexal cystic masses between 3D and 2D CEUS and general gray ultrasonography
  - **R. Hu (China)**
- Ultrasound features for determining the risk of malignancy in unilocular-solid adnexal masses in premenopausal women without ascites and/or carcinomatosis
  - **J.L. Alcázar (Spain)**
- Comparison of the diagnostic value of risk of malignancy index RMI-I with logistic regression model 1 and RMI-IV with logistic regression models in the preoperative assessment of adnexal masses
  - **N. Abdalla (Poland)**
- Borderline ovarian tumors and frozen section: role of preoperative He4 and R.O.M.A. score to increase frozen section accuracy
  - **S. Gizzo (Italy)**
- Comparison of the diagnostic performance of risk of malignancy index RMI-III and simple rules in the preoperative assessment of adnexal masses
  - **N. Abdalla (Poland)**

Room 524

OP04: Twin pregnancy

**Chairs: Y. Ville (France); G. Yeo (Singapore)**

- Withdrawn
  - **OP04.01**
- Cervical length and cervical infection as predictors of success of laser therapy in twin–twin transfusion syndrome (TTTS)
  - **B.G. Hollwitz (Germany)**
- Mid-pregnancy cervical length as a risk factor for Caesarean delivery in twin pregnant women
  - **S. Sung (Republic of Korea)**
- Fetal growth patterns in twin pregnancies
  - **N. Melamed (Canada)**
- Outcomes in discordant twin pregnancies whose twin B is larger than twin A according to the mode of delivery
  - **S. Oh (Republic of Korea)**
- The myocardial performance index (MPI) intertwin difference (ITD) in monochorionic diamniotic twin pregnancies
  - **A. Henry (Australia)**
- Myocardial Performance Index (MPI) in stage 1 versus stage 2-3 twin–twin transfusion syndrome
  - **A. Henry (Australia)**
- Outcome of monochorionic twin pregnancies with moderate amniotic fluid discordance without twin–twin transfusion syndrome
  - **A. Anami (Japan)**
- What is the likelihood of spontaneous change of fetal presentation following third trimester ultrasound in twin pregnancies?
  - **N. Melamed (Canada)**
- Fetal neuroprotective responses to severe hypoxic stress in ovine twin fetuses: amino acid neurotransmitters compared to cerebral circulation
  - **S. Gruessner (Germany)**

Room 518
OP05: First trimester ultrasound: beyond NT

Chairs: A. Tabor (Denmark); A. Ngu (Australia)

Only seeing what you look for: use of a detailed ultrasound protocol is associated with increased anomaly detection rates in the first trimester

J. Karim (United Kingdom)

Fetal kidneys’ ultrasound appearance in the first trimester

S. Tudorache (Romania)

Accuracy of fetal gender assessment at 11–14 weeks gestation in low risk population

D. Nemescu (Romania)

Non-invasive diagnosis of RhD status and fetal gender from maternal plasma: our results from years 2008 to 2014

P. Calda (Czech Republic)

Counselling patients with positive noninvasive prenatal screens: how maternal age and ultrasound findings impact positive predictive values

P. Taneja (United States)

Tricuspid regurgitation in Down’s syndrome fetuses: a systematic review

S. Ferrero (Italy)

Modelling isolated spina bifida screening performance using axial and sagittal views of the brain and spine anatomy at the 11–13-week scan

S. Tudorache (Romania)

Withdrawn

Does underestimating nuchal translucency measurement impact sensitivity of Down’s syndrome screening?

M. Dommergues (France)

Sex chromosome aneuploidy: pregnancy outcomes for patients with a positive screen

I. Goldfarb (United States)

OP06: Fetal brain imaging

Chairs: G. Pilu (Italy); A. Toi (Canada)

Prenatal ultrasound screening for single-suture craniosynostosis

T.E. Cohen-Overbeek (Netherlands)

Second trimester visualisation of a thick corpus callosum can be a transient finding of uncertain significance

J. Har-Toov (Israel)

Prenatal diagnosis of central nervous system anomalies by high-resolution chromosomal microarray analysis

Q. Wu (China)

Prenatal imaging cerebral pattern of Cobblestone lissencephaly according to gestational age and imaging modalities (US, MRI)

L. Guibaud (France)

Which level of spinal defect delineated by fetal MRI has prognostic importance in Arnold Chiari Type II?

S. Guven (Turkey)

Prenatal diagnosis of cerebellar hypoplasia

G. Malinger (Israel)

Withdrawn

Antenatal brain abnormalities in fetuses with congenital heart defects: systematic review and meta-analysis

A. Khalil (United Kingdom)

Prenatal neurodevelopmental characteristics in isolated major congenital heart defects: a systematic review and meta-analysis

M.C. Haak (Netherlands)
OP07: The use of ultrasound in oncology

**Room 524**

**Chairs:** D. Jurkovic (United Kingdom); J. Preisler (United Kingdom)

**Ultrasound characteristics of serous borderline ovarian tumors, non-invasive low-grade, invasive low-grade and high-grade serous carcinomas**

A.C. Testa (Italy)

**The first stage update: ultrasound-based prediction model for persistent gestational trophoblastic neoplasia from women with hydatidiform mole**

J. Qin (China)

**Ultrasound characteristics of a symptomatic and asymptomatic lymphocele after pelvic and/or paraaortic lymphadenectomy**

M. Zikan (Czech Republic)

**Power Doppler ultrasonography as functional assessment instrument response to chemotherapy in breast cancer**

A.D. Diniz (Brazil)

**The role of transvaginal ultrasound in the workup of invasive molar disease**

V. Chiappa (Italy)

**Analysis of the diagnostic value of ADNEX and LR1-2 models, CA125, HE4 and risk of malignancy algorithm in the presurgical assessment of adnexal masses**

N. Abdalla (Poland)

**A preliminary comparison of the IOTA simple rules with the risk of malignancy index RMI-2 for the evaluation of adnexal masses within a Canadian tertiary care centre**

F. Moretti (Canada)

**A comparison of risk of malignancy index (RMI-2) with subjective sonographic assessment of adnexal masses**

F. Moretti (Canada)

**Transvaginal ultrasound for preoperative assessment of myometrial invasion in patients with endometrial cancer: a systematic review and meta-analysis**

J.L. Alcázar (Spain)

---

OP08: Simulation, quality and safety

**Room 518**

**Chairs:** C. Lees (United Kingdom); C. Brezinka (Austria)

**Randomised clinical trial of virtual reality simulation training for gynecological transvaginal ultrasound skills**

M. Dommergues (France)

**Self-assessment of fetal ultrasound biometry images trial (SAVE US)**

M. Dommergues (France)

**Assessing the learning curves of ultrasound skill acquisition in obstetrics and gynecology: a randomised control trial**

A. Alsalamah (United Kingdom)

**Validation of a virtual reality simulator for the use of transvaginal ultrasonography in gynecology and early pregnancy**

S. Saso (United Kingdom)

**Can ultrasound cause harm? Survey of ultrasound users in the UK of the safety aspects of ultrasound: a pilot study in 2 hospitals**

T. Indrielle (United Kingdom)

**Thermal index for bone for diagnostic scanners: actual ranges of ultrasound intensity measured in vitro**

K. Retz (Norway)

**Non-medical fetal sex determination in Denmark: a study on ultrasound practice and quality**

G. Størup (Denmark)

**Girls are at greater risk of post-term birth than indicated by ultrasound-based estimation of gestational length in second trimester**

J.D. Wessström (Sweden)

**Image auditing of the 20 week anomaly scan in the southwest region of the Netherlands improves scanning quality**

T.E. Cohen-Overbeek (Netherlands)

**Comparison of microbial contamination of transabdominal versus transvaginal transducers**

S.C. Westerway (Australia)
P01: Delivery prediction throughout the trimesters

Chair: L. Platt (United States)

P01.01 Implementation of a universal protocol for screening and medical intervention for preterm delivery at anatomy scan: experience from first 18 months
C.M. Igel (United States)

P01.02 Maternal characteristics associated with an asymptomatic sonographic short cervix in the mid-trimester
S. Cho (Republic of Korea)

P01.03 Assessment of three dimensional power Doppler ultrasound in pregnancies submitted to cerclage and gestational age at delivery
T.F. Borghi (Brazil)

P01.04 Emergency cerclage: evaluation of its efficacy and identification of prognostic factors
O. Marra (Canada)

P01.05 Serial cervical length determination in twin pregnancies reveals four distinct patterns with prognostic significance for preterm birth
N. Melamed (Canada)

P01.06 The effect of antenatal corticosteroids on the fetal thymus
C.A. Jones (Canada)

P01.07 Large head circumference is more strongly associated with unplanned Caesarean delivery than high birthweight
S. Yagel (Israel)

P01.08 Large head circumference versus high birthweight in the risk of instrumental delivery in “big babies”
S. Yagel (Israel)

P01.09 The occiput spine angle: a new sonographic index of fetal head deflexion during the first stage of labour
T. Ghi (Italy)

P01.10 Automatic measurement of angle of progression: a feasibility study
A. Youssef (Italy)

P02: First trimester screening

Chair: C. Bilardo (Netherlands)

P02.01 The outcome of fetuses with high (>4.0 MoMs) first-trimester free beta-hCG levels
A. Sotiriadis (Greece)

P02.02 The use of a high frequency linear transducer in the assessment of fetal anatomy at the routine 11 to 13+6 week scan
K.Y. Leung (Hong Kong)

P02.03 Concurrent first trimester screening and cell free DNA testing for aneuploidy detection
M. Naqvi (United States)

P02.04 Ultrasound features and management in 17 cases of body stalk anomaly
A. Panaitescu (Romania)

P02.05 Impact of first trimester screening on Trisomy 21 detection and incidence of invasive procedures in the years 1994–2013 (population based data)
P. Calda (Czech Republic)

P02.06 Are nuchal septations clinically significant for early prenatal genetics screening?
J. Espinoza (United States)

P02.07 Factors potentially influencing the accuracy of first trimester anomaly scan
A. Pinto (Italy)

P02.08 Pregnancy outcome in fetuses with nuchal translucency above the 95th percentile in a single institution
Y. Shin (Republic of Korea)
The performance of universal Down’s syndrome screening using self-derived prediction model specific for Chinese in Hong Kong

T.Y. Leung (Hong Kong)

P03: Case reports: fetal growth and placenta

Room 517C (Hub 3)

Chair: C. Brezinka (Austria)

Prenatal diagnosis of intrahepatic porto-systemic shunt in intrauterine growth restricted (IUGR) fetus: a case report

I. Babic (Canada)

Four-vessel umbilical cord containing three arteries and one vein

J. Hoh (Republic of Korea)

The pregnancy and postnatal outcome in neuromyelitis optica: case study

M. Jakó (Hungary)

Abnormal ductus venosus Doppler in a normally grown fetus

N. Condon (United States)

Umbilical cord insertion into a central amniotic band: imaging, evolution and outcome

A. Ouellet (Canada)

Massive acute fetomaternal hemorrhage: what to expect?

S. Al-Obaidly (Qatar)

Favourable outcome in a case of agenesis of ductus venosus and fetal hydrops

C. Chau (France)

Placenta previa accreta after previous Caesarean section: correlation of ultrasound images, MRI and histology specimens in a series of cases

J. Vojtech (Czech Republic)

Management dilemma of complete placenta previa with Breus’ mole

S. Al-Obaidly (Qatar)

Venous cervical varix presenting as a late cause of obstetric hemorrhage

A. Idelson (Israel)

Imaging and early scoring system in concealed massive obstetric hemorrhage

F. Ajibade (United Kingdom)

P04: Ultrasound to assess the urogynecology patient

Room 517C (Hub 4)

Chair: V. Eisenberg (Israel)

Pelvic floor muscle trauma are associated with reduced pelvic floor muscle contractility

I. Volloyhaug (Norway)

False-negative prolapse assessment is most likely in the central compartment

H.P. Dietz (Australia)

Can anal sphincter defects be identified by palpation?

H.P. Dietz (Australia)

Levator ani trauma and pelvic organ prolapse: is there a dose-response effect?

H.P. Dietz (Australia)

The long-term effect of pregnancy on pelvic floor anatomy

H.P. Dietz (Australia)

The effect of fundal pressure (Kristeller manoeuver) on pelvic floor in primiparous women

A. Youssef (Italy)

A low cost, home-made training model 2D/3D characterisation of mesh properties

A. Y. Weintraub (Germany)

A comparison between two 3D ultrasound contrast-enhancing techniques for pelvic floor assessment

A. Youssef (Italy)

A low cost, home-made training model for MRI-US fusion guided biopsy

A. Y. Weintraub (Germany)
P05: Predicting adverse outcomes in pregnancy

Chair: J. Copel (United States)

Values of automated uterine volume scanner to predict uterine rupture and dehiscence with scar uterus
X. Chen (China)

Quantitative evaluation of postnatal placenta accreta by contrast-enhanced ultrasound
G. Chen (China)

Ischemia modified albumin in pregnancy
A. Rossi (Italy)

TNF-R1 as a first trimester marker for prediction of pre-eclampsia
F. da Silva Costa (Australia)

Reduced placental vascularisation at 12 weeks is associated with a specific cluster of serum proteins
R. de Heus (Netherlands)

First trimester FMF algorithm screening for pre-eclampsia applied in a Brazilian population: is the performance good enough?
G. R. Lobo (Brazil)

Early pregnancy serum biochemical markers and advanced placental maturation
R. N. Brown (Canada)

Second trimester maternal ophthalmic artery Doppler for prediction of pre-eclampsia
F. da Silva Costa (Australia)

Maternal characteristic risk factors profile in preterm and term pre-eclampsia
G. R. Lobo (Brazil)

A routine tool with far-reaching influence: Australian midwives’ views on the use of ultrasound during pregnancy
K. Edvardsson (Sweden)

Effective and clinically applicable non-invasive assessment of KEL1 positive fetuses in KEL1 negative “K” alloimmunised pregnant women
M. Lubusky (Czech Republic)

The independent effect of maternal height and weight on cervical length
R. Cruz-Martinez (Mexico)

Selective versus universal third trimester ultrasound (T3US)? Audit of current practice at a metropolitan Australian hospital
A. Henry (Australia)

P06: Fetal heart function

Chair: H. Gardiner (United States)

Placental related complications in women carrying a fetus with congenital heart disease
M. Cruz Lemini (Spain)

Is there a difference in the fetal right myocardial performance index (RMPI) measured from single and dual Doppler images?
N. Meriki (Saudi Arabia)

Prediction of pregnancy complication occurrence using fetal cardiac output assessments made by ultrasonography at 20 to 24 weeks of gestation
J. Lee (Republic of Korea)

Longitudinal myocardial function of the right ventricle and nuchal translucency
E. Sinkovskaya (United States)

Correlation between the Delta-Myocardial Performance Index and aortic isthmus systolic index as markers of unilateral cardiac strain
A. Henry (Australia)

Relationship between the waves of venous ductus and congenital heart diseases
M. Herrera (Colombia)
Multiple fetal echocardiographic parameters for evaluation of fetal left ventricular diastolic function in women with gestational glucose metabolic abnormalities

**B.W. Zhao (China)**

The application of z-scores in the diagnosis of fetal aortic stenosis

**B.W. Zhao (China)**

Adaptation of cardiac function in the fetuses with complete atrioventricular block

**Y. Yamamoto (Japan)**

Myocardial function in hydropic fetuses at the time of diagnosis

**R. Axt-Fliedner (Germany)**

The postural changes of cardiac function in fetus

**H. Jin (Republic of Korea)**

Differential diagnosis of congenital heart diseases in fetuses with dilated coronary sinus

**K. Yoshikoshi (Japan)**

**P07: Case reports: twins and interventions**

**Room 517C (Hub 3)**

**Chair: A. Gagnon (Canada)**

Myocardial performance index (MPI) as a warning sign of fetal demise in an MCDA twin pregnancy?

**A. Henry (Australia)**

Alternative approach for in utero placement of a vesicoamniotic shunt in a case of fetal gastroschisis and lower urinary tract obstruction

**A. Faksh (United States)**

The illusion of safety in type 1 selective IUGR in monochorionic twins: are we monitoring the right baby with the right tools? Case report

**D.A. Pedreira (Brazil)**

Multiple arterial calcifications after fetoscopic laser treatment for TTTS

**F. Fuchs (France)**

Twin–twin transfusion syndrome in patients with suspected shared umbilical cord insertion into the placenta

**Y. Sato (Japan)**

A case report: combined ovarian and intrauterine pregnancy progressed to a full-term delivery

**L. Xie (China)**

Twin anemia-polycythemia sequence changed to twin–twin transfusion syndrome

**T. Yokouchi (Japan)**

Fetoscopic balloon tracheal dilatation for CHAOS

**G. Ryan (Canada)**

Single fetal pole version to optimise fetal position pre-hysterotomy for in utero surgical repair of a meningomyelocele

**E. Codsi (United States)**

Successful fetal sclerotherapy for a large hydropic CCAM

**A. Morency (Canada)**

Spontaneous uterine rupture at 23 weeks' gestation with immediate closure of the uterine wall allowed prolongation of pregnancy

**L. Leduc (Canada)**

Uterine artery pseudoaneurysm in secondary postpartum hemorrhage: diagnosis with real-time and pulsed Doppler ultrasound

**R.I. Amir (Indonesia)**
Program - Tuesday 13 October 2015

07:30 - 08:10 Masterclasses

08:15 - 09:35 Parallel sessions (OC)
New imaging technologies 517D
Congenital heart disease 520
Assessing women with abnormal bleeding 524

09:40 - 10:20 Short oral presentations (OP)
New imaging technologies 517D
Delivery prediction throughout the trimesters 520
Investigating abnormal bleeding and uterine pathology 524
Too many chromosomes, too much water 518

10:20 - 10:40 Poster discussion Hubs (P) 517C

10:45 - 12:05 Parallel sessions (OC)
Invasive fetal therapy and diagnosis 517D
Early IUGR 520
Pelvic pain and endometriosis 524

12:10 - 12:50 Short oral presentations (OP)
Fetal interventions 517D
Fetal growth and predicting IUGR 520
Evaluating women with pelvic pain 524
Caesarean section scars and abnormal placental implantation 518

12:55 - 13:15 Poster discussion (P) and Just Images Hubs 517C

13:15 - 14:15 Industry sponsored satellite symposium 517D

13:30 - 14:00 ISUOG guidelines 517C

14:20 - 15:40 Workshops
Controversies in the management of selective fetal growth restriction in twin pregnancy 517D
Changing expectations: the 11–14 week routine anomaly scan 520
Looking after women with bleeding, pain or other problems in early pregnancy (ectopic pregnancy, miscarriage and PUL) 524
How important is the evaluation of the placenta? 518

14:20 - 15:40 ISUOG Outreach workshop 517C

16:10 - 17:30 Special Interest Groups 517C

16:10 - 17:35 Parallel sessions (OC)
Congenital infections 517D
Fetal interventions in twins 520
Early pregnancy complications 524
Over the past 5 years, ISUOG’s Outreach model has been applied in 16 projects in 6 countries. As we plan for the future we want to hear from you! How should ISUOG contribute to the improvement of women’s health in under-served regions?

Join us for the ISUOG Outreach Workshop:

**Tuesday 13 October 2015, 14:30 - 15:35 Hub 517C**

**Chairs:** A. Johnson, Chair, ISUOG Outreach Committee (USA)

**Facilitators:** A. Abuhamad (USA), T. Cohen-Overbeek (The Netherlands), S. Eik-Nes (Norway), H. Feltovich (USA), T. Kiserud (Norway), A. Tabor (Denmark) and J. Hyett (Australia)

**Topic 1:** Mind mapping Outreach: what clinical pathways are impacted by ultrasound training?

**Topic 2:** Finalising a teaching template for Outreach: how and what do we need to deliver?

**Topic 3:** Understanding your needs: the role of ISUOG in supporting technology in remote settings

**Topic 4:** Maximizing partnerships: the role of partners in outreach

Volunteer for Outreach: isuog.org/Outreach/Get_Involved
Program - Tuesday 13 October 2015

07:30 - 08:10 Masterclasses

- Monitoring intervals and decision for delivery in IUGR
  
  A. Baschat (United States)
  
  Management of complex monochorionic twins
  
  Y. Ville (France)
  
  Ultrasound to detect anomalies in the second trimester
  
  G. DeVore (United States)
  
  How do I evaluate women with a possible ovarian mass, including recognising the features of less common types of ovarian and tubal pathology?
  
  L. Valentin (Sweden)

08:15 - 09:35 New imaging technologies

**Chairs:** D. Prayer (Austria); C. Cassady (United States)

- Fetal hemodynamic assessment by MRI for detecting late-onset intrauterine growth restriction (IUGR)
  
  M. Zhu; S. Keating; N. Milligan; R. Windrim; S. Portnoy; J. Sled;
  
  C. Macgowan; J. Kingdom; M. Seed (Canada)

- Fetal limb fat volume: a surrogate marker of body composition
  
  C.L. Knight; S. Rueda; M. Ahmed; K. Edwards; V. Donadono;
  
  G. Parry; F. Puglia; L. Cheikh Ismail; J. Villar; S. Kennedy;
  
  J. Noble; A. Papageorghiou (New Zealand); (Italy);
  
  J. Neelavalli (United States)

- Quantitative blood flow estimation in the human fetus using non-triggered phase contrast magnetic resonance imaging
  
  U. Krishnamurthy; W. Feng; P. Jella; L. Yeo; E. Hernandez-Andrade;
  
  S. Mody; M. Cabrera; E. Haacke; S. Hassan; R. Romero;
  
  J. Neelavalli (United States)

- Accuracy of MRI in the prenatal diagnosis of the abnormally adherent placenta: comparison with findings at the time of delivery
  
  S.L. Laifer-Narin; S. Brejt; S. Zwany; J. Wright;
  
  J. Newhouse (United States)

- Gadolinium chelates: pharmacokinetics during pregnancy
  
  B. Deloison; N. Siauve; G. Chalouhi; J. Poupon; C. Olivier; Y. Ville;
  
  L. Salomon (France)

- Diagnostic accuracy of ultrasonography and magnetic resonance imaging for the detection of fetal anomalies: a blinded case-control study
  
  L.F. Goncalves; W. Lee; S. Mody; A. Shetty; H. Sangi-Haghpeykar;
  
  R. Romero (United States)

09:00 Discussion
09:03 Towards automating the ISUOG “Six-Step Basic Ultrasound” scan
M.A. Maraci; C. Bridge; J. Noble; C. Aye; M. Molloholli; R. Napolitano;
A.T. Papageorghiou (United Kingdom)
OC11.07
09:08 Discussion
09:11 Estimation of the cerebral metabolic rate of oxygen (CMRO₂) in the human fetus
J. Neelavalli; E. Hernandez-Andrade; B. Yadav; P. Jella;
U. Krishnamurthy; L. Yeo; S. Mody; M. Cabrera; E. Haacke;
S. Hassan; R. Romero (United States)
OC11.08
09:16 Discussion
09:19 Functional MRI
C. Cassady (France)

08:15 - 09:35 Congenital heart disease

Chairs: J. Fouron (Canada); R. Chaoui (Germany)

08:15 LIVE SCAN: first trimester cardiac scan [industry supported*]
R. Chaoui (Germany)
OC12.01
08:35 Basic heart: feasibility of a simplified routine fetal echocardiography in the first trimester of pregnancy
E. Quarello; A. Lafouge; N. Fries; L. Salomon (France)
08:40 Discussion
08:43 How normal is a ‘normal’ heart in fetuses with Down’s syndrome?
B. Adriaanse; E. Calkoen; M.C. Haak; M. Bartelings; A. Kolesnik;
C. Niszczota; J. van Vugt; A. Roest; N. Blom;
A. Gittenberger - de Groot; M. Jongbloed (Netherlands); (Poland)
OC12.02
08:48 Discussion
08:51 A national survey of fetal congenital heart diseases in China
X. Chen; S. Zhao; X. Yang (China)
OC12.03
08:56 Discussion
08:59 Longitudinal changes of fetal biometries and cerebrovascular hemodynamics in fetuses with congenital heart disease
M. Cruz Lemini; A. Ruiz; N. Masoller; M. Sanz Cortes; J. Martinez;
Q. Ferrer; O. Sánchez; F. Crispi; O. Gómez; E. Carreras;
E. Gratacos; E. Llurba (Spain)
OC12.04
09:04 Discussion
09:07 Prediction of outcome after fetal diagnosis of Ebstein’s anomaly and dysplasia of the tricuspid valve: a single centre experience
E. Jaeggi; C. Manlhiot; M. Jaeggi; A. Dragulescu; G. Van Arsdell;
D. Wertaschnigg (Canada)
OC12.05
09:12 Discussion
09:15 Outcome of prenatal ventricular size discrepancy in cases without coarctation
A. van Nisselrooij; C. van Velzen; M. Rijlaarsdam; E. Pajkrt; C. Bax;
J. Hruda; N. Blom; S. Clur; M.C. Haak (Netherlands)
OC12.06
09:20 Discussion
09:23 Postmortem cardiac imaging in fetuses and children
N. Sebire (United Kingdom)

* Scientific content of sessions is defined by the Scientific Committee; ultrasound systems and technical support are provided by sponsors.
**TUESDAY PROGRAM**

<table>
<thead>
<tr>
<th>Time</th>
<th>Session Details</th>
</tr>
</thead>
</table>
| 08:15 - 09:35 | Assessing women with abnormal bleeding Room 524  
**Chairs:** S. Goldstein (United States); S. Reid (Australia)  
08:15 How to describe endometrial and myometrial findings using ultrasonography  
*T. Van den Bosch* (Belgium)  
08:35 Using ultrasound to assess the endometrium of women taking hormone therapy: diagnosing pathology and tailoring treatment  
*S. Goldstein* (United States)  
08:55 Sonographic changes of uterine fibroids after 3-month treatment with ulipristal acetate  
*S. Ferrero; A. Racca; I. Erasmo; F. Sozzi; E. Tafi; V. Remorgida; P. Venturini* (Italy)  
09:00 Discussion  
09:03 Endometrial surveillance in tamoxifen users: accuracy of ultrasound versus hysteroscopic investigation: observational longitudinal cohort study  
*S. Gizzo; M. Noventa; A. Vitagliano; M. Quaranta; R. Venturella; T. Patrelli* (Italy)  
09:08 Discussion  
09:11 Three dimensional power Doppler as predictor for uterine fibroid growth  
*L. L. Nieuwenhuis; J. Twisk; W. Hehenkamp; H. Brolmann; J. Huirne* (Netherlands)  
09:16 Discussion  
09:19 Prevalence of ultrasound features of adenomyosis in asymptomatic premenopausal women  
*L. Jokubkiene; P. Sladkevicius; L. Valentin* (Sweden)  
09:24 Discussion  
09:27 Assessing uterine graft viability using multispectral imaging during uterine transplantation  
*S. Saso; N. Clancy; B. Jones; M. Al-Memar; T. Bracewell-Milnes; M. Thum; T. Bourne; D. Elson; J. Smith* (United Kingdom)  
09:32 Discussion  
| 09:40 - 10:20 | Short oral presentations (OP)  
**OP09:** New imaging technologies Room 517D  
*Chairs:* D. Prayer (Austria); B. Thilaganathan (United Kingdom)  
**OP10:** Delivery prediction throughout the trimesters Room 520  
*Chairs:* T. Ghi (Italy); J. Crane (Canada)  
**OP11:** Investigating abnormal bleeding and uterine pathology Room 524  
*Chairs:* T. Van den Bosch (Belgium); P. Glanc (Canada)  
**OP12:** Too many chromosomes, too much water Room 518  
*Chairs:* A. Gagnon (Canada); K. Fung Kee Fung (Canada)  
| 10:15 - 10:45 | Coffee and e-poster viewing (EP)  

*This presentation is eligible for the Young Investigator award (to be presented in the closing plenary).*
**Poster discussion Hubs (P)**

**P08: Diagnosis and management of growth restriction**
Chair: A. Baschat (United States)

**P09: Fetal echo: functional and anatomical**
Chair: S. Yagel (Israel)

**P10: Case reports: early pregnancy and gynecology**
Chair: S. Goldstein (United States)

**P11: Fetal interventions**
Chair: B. Thilaganathan (United Kingdom)

---

**Invasive fetal therapy and diagnosis**

**Chairs: Y. Ville (France); R. Brown (Canada)**

10:45 Impact of chorionic villus sampling on fetal growth: a case-control study
*OC14.01*

A. Sotiriadis; M. Eleftheriades; E. Assimakopoulos; F. Chatzinikolaou;
D. Hassiakos; G. Makrydimas (Greece)

10:50 Discussion

10:53 Middle cerebral artery Doppler in fetuses with red cell alloimmunisation between 34 and 37 weeks’ gestation
*OC14.02*

E. Maisonneuve; S. Friszer; A. Jayot; V. Castaigne; E. Cynober;
A. Mailloux; F. Pernot; J. Jouannic; A. Cortey; B. Carbonne (France);
1(France); 2(Monaco)

10:58 Discussion

11:01 Fetoscopic repair of meningomyelocele: watertight duramater closure is not paramount for fetal repair when using a biocellulose graft
*OC14.03*

D.A. Pedreira; N. Zanon; K. Nishikuni; R. Sa; G. Acacio;
R. Chmait; E. Kontopoulos; R. Quintero 1(Brazil); 2(United States)

11:06 Discussion

11:09 Quantification of liver herniation in fetuses with isolated congenital diaphragmatic hernia using two-dimensional ultrasonography
*OC14.04*

I.S. Britto; N. Sananes; D. Cass; I. Zamora; T. Lee; O. Olutoye;
A. Mehollin-Ray; S. Welty; C. Fernandes; M. Belfort; W. Lee;
C. Cassady; R. Ruano 1(Brazil); 2(United States)

11:14 Discussion

11:17 Impact of fetal endoscopic tracheal occlusion on postnatal outcome according to the severity of congenital diaphragmatic hernia
*OC14.05*

R. Ruano; N. Sananes; I. Britto; J. Mastrobattista; M. Silva;
U. Tannuri; M. Zugaib 1(United States); 2(Brazil)

11:22 Discussion

11:25 DEBATE: fetoscopic repair of neural tube defects
For: D.A. Pedreira (Brazil)
Against: M. Bebbington (United States)

---

**Early IUGR**

**Chairs: C. Bilardo (Netherlands); A. Papageorghiou (United Kingdom)**

10:45 The stage-based management of IUGR
*E. Gratacós* (Spain)

* This presentation is eligible for the Young Investigator award (to be presented in the closing plenary).
11:21 Prevalence of pelvic adhesions on ultrasound examination in women with a history of Caesarean section
F. Moro; D. Mavrellos; K. Pateman; T. Holland; D. Jurkovic
(United Kingdom)

11:26 Discussion

11:29 Diagnostic accuracy of transvaginal ultrasound for diagnosis of deep endometriosis: systematic review and meta-analysis
S. Guerriero1; J.L. Alcázar2; S. Ajossa1; R. Orozco2; M. Perniciano1; J. Minguez2; M. Jurado2; G. Melis1 (Italy); 2(Spain)

11:34 Discussion

11:37 Computed tomographic colonography versus transvaginal ultrasonography in the diagnosis of rectosigmoid endometriosis
S. Ferrero; A. Racca; F. Sozzi; V. Remorgida; P. Venturini; G. Camerini; V. Vellone; G. Rollandi; E. Biscaldi (Italy)

11:42 Discussion

11:45 The role of bowel preparation prior to ultrasound to detect and assess deep endometriotic nodules on rectal wall
C. Ros; M. Martinez-Serrano; M. Rius; M. Martinez-Zamora; J. Balasch; F. Carmona (Spain)

11:50 Discussion

11:53 Diagnostic performance of two-dimensional ultrasonography, three dimensional ultrasonography and MR in the detection of deep endometriosis
S. Guerriero1; L. Saba2; M. Perniciano1; J.L. Alcázar2; M. Pascual2; S. Ajossa1; A. Cappai1; A. Piras1; P. Fabbri1; F. Pilla1; F. Mostallino1; V. Zanda1; M. Angiolucci1; V. Mais1; G. Melis1 (Italy); 2(Spain)

11:58 Discussion

12:10 - 12:50 Short oral presentations (OP)

OP13: Fetal interventions
Chairs: M. Bebbington (United States); A. Morency (Canada)

OP14: Fetal growth and predicting IUGR
Chairs: K. Maršíal (Sweden); E. Hernandez-Andrade (United States)

OP15: Evaluating women with pelvic pain
Chairs: P. Dubilet (United States); S. Guerriero (Italy)

OP16: Caesarean section scars and abnormal placental implantation
Chairs: R. Brown (Canada); B. Tutschek (Switzerland)

12:45 - 14:20 Lunch and e-poster viewing (EP)

12:55 - 13:15 Poster discussion Hubs (P)

P12: New imaging technologies
Chair: H. Feltovich (United States)

P13: Education and low resource settings
Chair: A. Johnson (United States)

P14: Challenges in genetic diagnosis case reports
Chair: J. Hyett (Australia)

</tr>
<tr>
<td>16:54</td>
<td>Discussion</td>
<td></td>
</tr>
<tr>
<td>16:57</td>
<td>Cord occlusion in complicated monochorionic multiple pregnancies: a comparison of techniques</td>
<td>D. El-Chaar; K. Gouin; G. Seaward; R. Windrim; J. Keunen; J. Kachura; R. Beecroft; P. Shah; G. Ryan <em>(Canada)</em></td>
</tr>
</tbody>
</table>

* This presentation is eligible for the Young Investigator award (to be presented in the closing plenary).
* Scientific content of sessions is defined by the Scientific Committee; ultrasound systems and technical support are provided by sponsors.
17:05 Ultrasound-guided high intensity focused ultrasound (HIFU) ablation of placental vasculature: feasibility, fetal and maternal responses
C. Shaw; J. Civale; K. Botting; Y. Niu; D. Giussani; I. Rivens; G. Ter Haar; C. Lees (United Kingdom)

17:13 Discussion

17:16 TTTS: pathogenesis, diagnosis, management
B. Thilaganathan (United Kingdom)

16:10 - 17:30 Early pregnancy complications

16:10 Why changes to guidance for the diagnosis of miscarriage were not conservative and could be more rigorous
T. Bourne (United Kingdom)

16:30 The association between morphological type of tubal ectopic pregnancy on scan, serum hCG levels, hCG ratio and choice/success of subsequent management
B. Nadim\textsuperscript{1}; M. Mongelli\textsuperscript{1}; B. Gerges\textsuperscript{1}; F. Infante\textsuperscript{1}; G. Condous\textsuperscript{1}; C. Lu\textsuperscript{2}
\textsuperscript{1}(Australia); \textsuperscript{2}(Comoros)

16:35 Discussion

16:38 Retained products of conception (RPOC): still a subjective ultrasound diagnosis with objective clinical consequences?
N. Page; A. Smith; L. Stocia; J. Hamilton (United Kingdom)

16:43 Discussion

16:46 Sonography of responsive versus non-responsive ectopic pregnancies
A.A. Desai; A. Fleischer; M. New; C. Smolinsky; J. McKenna; R. Andreotti (United States)

16:51 Discussion

16:54 Non-tubal ectopic pregnancies: ultrasound diagnosis, management options and clinical outcomes
J. Ramkrishna; G. Kan; K. Reidy; C. Ang; R. Palma-Dias (Australia)

16:59 Discussion

17:02 A prospective observational study to validate the reliability of the early pregnancy viability scoring system
O. Wan; S. Chan; G. Kong (Hong Kong)

17:07 Discussion

17:10 Variations in the quality of ultrasound scanning among early pregnancy units
M. Memtsa; D. Jurkovic; J. Ross (United Kingdom)

17:15 Discussion

17:18 Does fetal growth and pregnancy outcome correlate with the amount and duration of vaginal bleeding or abdominal pain in the first trimester? A preliminary study
S. Saso\textsuperscript{1}; M. Al-Memar\textsuperscript{1}; L. Ismail\textsuperscript{1}; S. Bobdiwala\textsuperscript{1}; P. Roelants\textsuperscript{2}; G. Nikolic\textsuperscript{2}; D. Popovic\textsuperscript{2}; C. Stalder\textsuperscript{1}; B. De Moor\textsuperscript{2}; T. Bourne\textsuperscript{2}
\textsuperscript{1}(United Kingdom); \textsuperscript{2}(Belgium)

17:23 Discussion
OP - Tuesday 13 October 2015

OP09: New imaging technologies

**Chairs:** D. Prayer (Austria); B. Thilaganathan (United Kingdom)

Human placental perfusion analysis by diffusion-weighted MRI
L.J. Salomon (France)

Whatsapps ultrasound teleconsultation in a low-resource setting: feasibility, accuracy and patient’s psychological acceptability
J. Akinmoladun (Nigeria)

Evaluating synchronicity in binocular fetal eye movements using high resolution ultrasound
J. Neelavalli (United States)

Controlling for sources of variance reduces attenuation measurement variability in the human cervix
H. Feltovich (United States)

Improving the performance of fetal brain magnetic resonance spectroscopy (MRS) at 1.5T in a multicentric study
M. Sanz Cortes (United States)

Success rate of a fetal MRI and MR spectroscopy research protocol on a 3.0T scanner at term
M. Sanz Cortes (United States)

HDlive in the assessment of placenta and umbilical cord
M.A. AboEllail (Japan)

Correlation between ultrasound, x-ray and CT scan with histopathology in antenatally diagnosed cases of congenital pulmonary airway malformation (CPAM)
S. Mehta (Canada)

Ultrasound fetal virtual autopsy: an artificial water surrounding
A. Aabadli (France)

Shear-wave elastography shows changes in the elastic properties of the lower uterine segment (LUS) in women with prior Caesarean deliveries
M. Garcia (United States)

Non-contrast magnetic resonance angiography (MRA) in human pregnancy: visualisation of the utero placental and fetal vasculature
J. Neelavalli (United States)

OP10: Delivery prediction throughout the trimesters

**Chairs:** T. Ghi (Italy); J. Crane (Canada)

Association between first trimester cervical consistency index (CCI) and preterm birth in low risk population
M.A. Parra-Saaavedra (Spain)

Transabdominal cervical length in the detection of a short cervix: a validation study
N. Schwartz (United States)

Cervical pessary and micronised progesterone vaginal tablets for the prevention of spontaneous preterm birth in singleton pregnancies with mid-trimester short cervix
A.L. Zimerman (Canada)

Combination of cervical pessary and progesterone for treatment of preterm birth: University of Baskent experience
C. Gulumser (Turkey)

Predictors of pregnancy outcome for emergency cerclage
G. Lee (Republic of Korea)
Serial cervical length measurements in twin gestations improves the predictive accuracy for preterm birth

N. Melamed (Canada)

The predictive value of sonographic cervical length in triplet pregnancies?

N. Melamed (Canada)

Premature rupture of membranes assessment via transperineal ultrasonography as an alternative to speculum examinations

E. Kalafat (Turkey)

Prolonged second stage of labour: retrospective meta-analysis of the performance of the progression angle in the prediction of the mode of delivery

E. Contro (Italy)

Large head circumference is more strongly associated with unplanned Caesarean delivery than high birthweight, in primiparous women

S. Yagel (Israel)

OP11: Investigating abnormal bleeding and uterine pathology

Chairs: T. Van den Bosch (Belgium); P. Glanc (Canada)

Reproducibility of IETA colour score for assessing endometrial vascularisation using colour Doppler

J.L. Alcázar (Spain)

The additional value of elastography to gray-scale ultrasound in the assessment of fibroids and adenomyosis

B. Stoelinga (Netherlands)

Diagnostic accuracy of two-dimensional transvaginal ultrasound in the diagnosis of adenomyosis

C.K. Rasmussen (Denmark)

Efficacy of 3D transvaginal ultrasound in predicting a negative sonohysterography for endometrial pathology

A. Mansour (Canada)

Diagnostic evaluation of endometrial vascularity by three dimensional ultrasonography Doppler angiography in patients with postmenopausal bleeding

A. Rossi (Italy)

Ultrasonic findings with failed thermal endometrial ablation

R.C. Sanders (United States)

Uterine artery embolisation: clinical outcomes and complications post UAE

R. Ali (United Kingdom)

The role of ultrasound (US) in the diagnosis/treatment of acquired uterine arteriovenous malformations (AVMs)

A. Monteagudo (United States)

3D power Doppler in uterine fibroids; influence of gain, cardiac cycle and off line measurement techniques

L.L. Nieuwenhuis (Netherlands)

Elastography of endometrium in tamoxifen treated women with suspicion of endometrial hyperplasia

K. Preis (Poland)

3D transvaginal sonography as a preoperative tool in predicting the need to morcellate in women undergoing laparoscopic hysterectomy

B. Gerges (Australia)

OP14: Fetal growth and predicting IUGR

**Chairs:** K. Maršál (Sweden); E. Hernandez-Andrade (United States)

- **OP14.01** Low first trimester PAPP-A and second trimester uterine artery Dopplers in antenatal detection of SGA babies <10th centile
  - **O.M. Thompson** (United Kingdom)

- **OP14.02** Ultrasound and Doppler evaluation at routine third trimester scan to detect late pregnancy (SGA) in adequate-for-gestational age (AGA) pregnancies
  - **M.A. Parra-Saavedra** (Spain)

- **OP14.03** Ultrasound and Doppler evaluation at routine third trimester scan to detect late pregnancy large-for-gestational age fetuses (LGA) in (AGA) fetuses
  - **M.A. Parra-Saavedra** (Spain)

- **OP14.04** Prediction of small for gestational age neonates by third trimester fetal biometry with maternal characteristics
  - **Q. Reboul** (Canada)

- **OP14.05** Withdrawn

- **OP14.06** Cerebroplacental Doppler ratio and adverse perinatal outcomes in intrauterine growth restriction
  - **C.B. Kirwin** (United Kingdom)

- **OP14.07** Impact of replacing ethnicity specific fetal biometry charts by the INTERGROWTH-21st standard reference charts
  - **Y.K. Cheng** (Hong Kong)

- **OP14.08** Association between ultrasound and Doppler parameters and subsequent low growth trajectory of adequate-for-gestational fetuses at routine third trimester scan
  - **M.A. Parra-Saavedra** (Spain)

- **OP14.09** Prediction of small-for-gestational-age (SGA) newborn from ultrasound biometry and maternal characteristics
  - **M. Mongelli** (Australia)

OP15: Evaluating women with pelvic pain

**Chairs:** P. Doubilet (United States); S. Guerriero (Italy)

- **OP15.01** Transvaginal ultrasound soft markers for the prediction of endometriosis type and location or normal and endometriotic ovary
  - **B. Gerges** (Australia)

- **OP15.02** Adenomyosis ultrasound findings in patients with previously know endometriosis
  - **C. Ros** (Spain)

- **OP15.03** Transvaginal elastography of rectosigmoid endometriotic nodules: correlation with symptoms and histology
  - **S. Ferrero** (Italy)

- **OP15.04** Development and validation of a preoperative ultrasound staging system for predicting level of laparoscopic endometriosis surgery required
  - **B. Gerges** (Australia)

- **OP15.05** Bladder detrusor endometriosis: where does it come from?
  - **V.H. Eisenberg** (Israel)

- **OP15.06** Old and new protagonists on the ultrasound scene for the diagnosis of deep pelvic endometriosis: a systematic literature review and meta-analysis
  - **S. Gizzo** (Italy)

- **OP15.07** Increased rate of uterine retroflexion in women with history of a previous Caesarean delivery
  - **O. Rotenberg** (United States)

- **OP15.08** Acute ovarian torsion: the impact of time delays to surgery
  - **H. Ghandehari** (Canada)
OP16: Caesarean section scars and abnormal placental implantation

Chairs: R. Brown (Canada); B. Tutschek (Switzerland)

Effective anatomical and functional status of the lower uterine segment at term pregnancy: ultrasound estimation of the risk of uterine dehiscence
S. Gizzo (Italy)

Impact of uterine closure on residual myometrial thickness after Caesarean: a randomised controlled trial
S. Roberge (Canada)

Longitudinal Caesarean section scar evaluation in primiparous women after single or double layer uterotomy closure: prospective randomised study
J. Hanacek (Czech Republic)

Placental location, postpartum hemorrhage and retained placenta in women previously delivered by Caesarean section: a prospective cohort study
J. Belachew (Sweden)

MRI of placenta accreta: the added value of intravenous gadolinium injection
A. Millischer (France)

Impact of fusion imaging in the diagnosis of placenta accreta
F. Fuchs (France)

Intraoperative ultrasound may change management of suspected placenta accreta
N. Trivedi (United States)

Is twin pregnancy really a risk factor for placenta previa?
S. Yang (Republic of Korea)
P08: Diagnosis and management of growth restriction  
**Room 517C (Hub 1)**

**Chair:** A. Baschat (United States)

- Renal function assessment in newborns with intrauterine growth restriction  
  **V. Marsoosi (Islamic Republic of Iran)**  
  (P08.01)

- Effect of gestational hypertension on fetal renal vascularisation  
  **M. Jakó (Hungary)**  
  (P08.02)

- Customised fetal growth charts by quantile regression analysis: a cross-sectional multicentric Italian study  
  **N. Volpe (Italy)**  
  (P08.03)

- Abnormalities in neonatal transfontanellar ultrasound in fetal growth restriction fetuses with abnormal umbilical Doppler  
  **A.R. Caetano (Brazil)**  
  (P08.04)

- IUGR fetuses and systolic aortic isthmus flow Doppler: values of the isthmic systolic index (ISI)  
  **J. Chabaneix (France)**  
  (P08.05)

- Is fetal liver blood flow associated with ethnicity?  
  **G. Haugen (Norway)**  
  (P08.06)

- Prognostic factors in preterm small-for-gestational-age infants for the outcome at 18 months age: a Japanese multicentre study  
  **J. Sasahara (Japan)**  
  (P08.07)

- Cerebroplacental ratio and its association with adverse perinatal outcomes in early and late onset intrauterine growth restriction (IUGR)  
  **I. Babic (Canada)**  
  (P08.08)

- Reference resistance indexes of the umbilical and middle cerebral artery and cerebroplacental ratio at 3,400 metres above sea level  
  **W. Villamonte Calanche (Peru)**  
  (P08.09)

- Estimated fetal weight as a predictor of small for gestational age neonates admitted to the neonatal unit at term  
  **A. Khalil (United Kingdom)**  
  (P08.10)

- Maternal circulating IGF-I levels, prenatal and neonatal growth measurements  
  **Z. Luo (Canada)**  
  (P08.11)

- Long-term growth as a function of abnormal Doppler flow in growth restricted fetuses  
  **D. Mackeen (United States)**  
  (P08.12)

P09: Fetal echo: functional and anatomical  
**Room 517C (Hub 2)**

**Chair:** S. Yagel (Israel)

- Clinical profiles, outcomes of isolated fetal complete atrioventricular block: a retrospective review of 14 cases at a single institution  
  **K. Murakami (Japan)**  
  (P09.01)

- Clinical value of fetal echocardiography in diagnosis of fetal cardiac structural abnormalities  
  **Y. Guo (China)**  
  (P09.02)

- “Wait and see” strategy is acceptable for premature constriction of ductus arteriosus  
  **K. Kim (Japan)**  
  (P09.03)

- An analysis of echocardiographic characteristics of ventricular diverticula: from fetuses to adults  
  **Y. He (China)**  
  (P09.04)

- Premature restriction or closure of foramen ovale in fetuses with structurally normal hearts  
  **Y. He (China)**  
  (P09.05)

- A new and excellent screening way of aortic arch by the Biplane method  
  **M. Kawataki (Japan)**  
  (P09.06)
The possibility of fetal heart screening by real time 4D
M. Kawataki (Japan)
The value of the ductus arteriosus in fetal congenital heart disease: evaluation by
echocardiography combined with cardiovascular cast technology
M. Xie (China)
Agenesis of the ductus venosus associated with abnormal umbilical vein connection:
fetal echocardiography characteristic and prenatal diagnosis value
Y. He (China)
The screening of heterotaxy syndrome that paid attention to position of apex and
stomach bubble
M. Nagasawa (Japan)
Sonographic measurement of acceleration time-to-ejection time ratio in fetal pulmonary
artery
H. Jin (Republic of Korea)
The association between fetal atrioventricular septal defect and chromosomal
abnormalities in the current era
M. Morlando (United Kingdom)

P10: Case reports: early pregnancy and gynecology
Room 517C (Hub 3)
Chair: S. Goldstein (United States)
Proposal for easy and reliable sonographic diagnosis of the first trimester Caesarean
scar pregnancy
I.E. Timor-Tritsch (United States)
Interdisciplinary approach to medical management of a sub-hepatic ectopic pregnancy
M. Peckham (United States)
Decidualisation: a case report of a suspicious ovarian mass in pregnant woman
M.J. Kudla (Poland)
Abnormal pelvic vascularisation
W.A. Clavelli (Argentina)
Spontaneous expulsion of an endometrial polyp
T. Van den Bosch (Belgium)
Pseudoaneurysm of the uterine artery rupture: a case report
R. Radulescu-Botica (Romania)
Large cervical fibroids: a surgical challenge
M. Wong (United Kingdom)
Effect on sexual function after uterine artery embolisation for uterine fibroids
R. Ali (United Kingdom)
Sonographic diagnosis of canal of Nuck cysts: a small case series of a rare diagnosis
I. Lai (Canada)
An unusual Mullerian malformation: case report
M.D. Bernardo (Portugal)

P11: Fetal interventions
Room 517C (Hub 4)
Chair: B. Thilaganathan (United Kingdom)
Basic study of reducing effect of tumor by ablation of the tumor-feeding artery using
HIFU: potential for the fetal therapy
K. Ichizuka (Japan)
Chorionic villus sampling: an overview of the 11-year period in a single centre and
identifying risk factors for miscarriage
M. Hynek (Czech Republic)
Selective fetal reduction in multiple pregnancies in a single centre in China
M. Chen (China)
The clinical application of transabdominal ultrasound-guided fetal reduction in multiple pregnancy
L. Wang (China)

Fundamental study for fetal therapy by using an improved HIFU transducer
K. Seo (Japan)

67 TTTS cases treated in a single centre in Santiago with classical selective technique
M. Yamamoto (Chile)

A single centre experience with selective termination of anomalous fetus in dichorionic multifetal pregnancies
A. Bhatia (Singapore)

P12: New imaging technologies

Chair: H. Feltovich (United States)

Intraobserver agreement and variation over time in measuring fetal renal pelves
M.H. Røset (Norway)

Utility of fetal magnetic resonance imaging in the diagnosis of heterotaxy syndrome as compared to obstetrical ultrasonography and echocardiography
B. Yilmaz (United States)

Agreement between volume calculation of the fetal urinary bladder based on radiiuses and virtual organ computer-aided analysis
T.M. Eggebø (Norway)

Agreement between volume calculation based on VOCAL and SonoAVC
T.M. Eggebø (Norway)

Women think pregnancy management means obstetric ultrasound: Vietnamese obstetricians’ views on the use of ultrasound during pregnancy
K. Edvardsson (Sweden)

Two sides of the same coin: an interview study of Swedish obstetricians’ experiences on the use of ultrasound during pregnancy
A. Åhman (Sweden)

New approach to the exploration of internal genital fetal organs: an acoustic window to view the fetal uterus
G. Haddad (France)

P13: Education and low resource settings

Chair: A. Johnson (United States)

Reproducibility of fetal biometry by an inexperienced paramedic using both two- and three dimensional ultrasound
V. Oboro (Nigeria)

Developing a basic obstetrics and gynecologic ultrasound module for interns at Queen Elizabeth Central Hospital in Malawi
A. Kachikis (Malawi)

The perceptions of novices on learning basic obstetrical ultrasound skills
H. Mirghani (United Arab Emirates)

Accuracy and learning curves of Crown–Rump length measurements performed by certified nurse midwives
E. Codsi (United States)

Knowledge sharing and basic ultrasound skills for midwives (MWs)
F. Ajibade (United Kingdom)

The use of handheld ultrasound increases medical student confidence when assessing fetal position after 28 weeks gestation
G. Davies (Canada)
Measurement of fetal transcerebellar diameter by sonography trainees in a low resource setting

M. Naqvi (United States)

Educational needs of Nigerian health workers for levels I and II obstetrics and gynecological ultrasound

V. Oboro (Nigeria)

Attitude of obstetric sonographers towards fetal sex determination

E. Enabudoso (Nigeria)

P14: Challenges in genetic diagnosis case reports

Chair: J. Hyett (Australia)

Diamond-Blackfan anemia associated with increased nuchal translucency at 12 weeks of gestation and isolated fetal ascites

D. Nemescu (Romania)

Ultrasound features in a case of Williams-Beuren syndrome at second trimester scan

S. Al Nasiry (Netherlands)

Prenatal diagnosis and counselling of Leri-Weill dyschondrosteosis

S. Al Nasiry (Netherlands)

Persistent notochord in a fetus with COL2A1 mutation: a case report

E. Codsi (United States)

Early prenatal diagnosis of Beckwith-Wiedemann syndrome

S. Wavrant (Canada)

Prenatal diagnosis of Pfeiffer syndrome type II: a case report

S. Park (Republic of Korea)

Like mother, like daughter: maternal diagnosis of COL4A1 mutation after prenatal presentation in offspring

K. Theriault (Canada)

Pyloric atresia in lethal junctional epidermolysis bullosa due to mutation in the integrin β4 (ITGB4) gene

S. Al Nasiry (Netherlands)

Ultrasound diagnosis of achondrogenesis type II with an occipital encephalocele at 15 weeks gestation

K. Fong (Canada)

Clinical and ethical dilemmas with chromosomal microarray analysis (CMA) detection of Charcot-Marie-Tooth in both mother and fetus

E. Bornstein (United States)

Prenatal sonographic diagnosis of microtia: Goldenhar syndrome

Y. Kim (Republic of Korea)

* Discounts apply to ISUOG members, trainees and sonographers. Visit [isuog.org/worldcongress](http://isuog.org/worldcongress) for full details.
Program - Wednesday 14 October 2015

07:30 - 08:10 Masterclasses

08:15 - 09:35 Parallel Sessions (OC)
Clinical dilemmas in second and third trimester ultrasound  517D
Cardiac function in special situations  520
Managing the problem of AV malformations in gynecology  524

09:40 - 10:20 Short oral presentations (OP)
Fetal anatomy from head to toe  517D
Arrhythmias and structural heart disease  520
Reproductive medicine  524

10:20 - 10:40 Poster discussion Hubs (P)  517C

10:45 - 12:05 Parallel Sessions (OC)
Fetal growth assessment  517D
Fetal anatomy from head to toe  520
Reproductive medicine  524

12:10 - 12:50 Short oral presentations (OP)
Novel findings in IUGR  517D
Advances in cardiac imaging  520
Using emerging or alternative imaging in gynecology  524

12:55 - 13:15 Poster discussion (P) and Journal Hubs  517C

13:15 - 14:15 Industry sponsored satellite symposium  517D

13:30 - 14:00 Meet the Professors  517C

14:20 - 15:40 Workshops
Predicting and preventing pre-eclampsia  517D
How MRI and ultrasound can work well together  520
How to examine the pelvis of women with pelvic pain: making sure you pick up evidence of endometriosis and adenomyosis  524

16:10 - 17:10 Closing plenary  517D

17:10 - 18:00 Congress leaving drinks and welcome to Rome 2016  Foyer
Your World. Your ISUOG: Regional opportunities

ISUOG now has more than 13,300 members across 128 countries! Find out how you can get involved locally in your region or explore the world with ISUOG.

Meet your ambassador
ISUOG’s 16 Ambassadors support membership growth and educational opportunities in their regions. Meet your ambassador and share your views for development in your country.

Regions represented: Latin American, North America, Brazil, Australia, China, India, Central Asia, Eastern Europe, Russia, Haiti, the Middle East, and North Africa.

Sign up at the ISUOG Lounge to meet your Ambassadors on Wednesday, 14 October.*

Parlez-vous français? ¿Hablas español? Você fala português?

ISUOG guidelines in your language
Join us on Tuesday 13 October, 13:30 - 14:00 in Hub 517C. With Guidelines in Chinese (Mandarin), Spanish and French. Let us know if you can help translate more! isuog.org/international

Meet the Professor Hubs available for discussion in French for all our Francophone members. See our Hubs activities on p.17 & 24.

ISUOG basic training courses available online in French, Spanish and Portuguese.

Volunteer for ISUOG Outreach - make a difference
ISUOG Outreach supports the advancement of diagnosis for obstetric and gynecological conditions in locations with limited resources. Volunteer to be part of our training and find out more at isuog.org/outreach/Get_Involved

* Limited space available.

**08:48** Discussion  

**08:51** Beat-to-beat variability of the fetal myocardial performance index (MPI)  

P. Maheshwar\(i\); J. Alphonse; A. Henry; J. Wang; S. Redmond; A.W. Welsh (Australia)  

**08:56** Discussion  

**08:59** Risk-based prenatal monitoring for immune mediated fetal heart disease: a prospective 5-year experience  

E. Jaeggi\(^1,2\); F. Golding\(^1,2\); C. Laskin\(^1,2\); J. Kingdom\(^1,2\); E. Silverman\(^1,2\); N. Kan\(^1\)(Canada); \(^2\)(Cayman Islands)  

**09:04** Discussion  

**09:07** Assessment of abnormal fetal heart rhythms  

E. Jaeggi (Canada)  

---  

08:15 - 09:35  Workshop: Managing the problems of AV malformations in gynecology  

**Chairs:** S. Goldstein (United States); D. Jurkovic (United Kingdom)  

**08:15** Uterine arteriovenous malformations (AVM): overview of diagnosis and management  

D. Timmerman (Belgium)  

**08:35** The role of ultrasound in AVM  

I. Timor-Tritsch (United States)  

**08:55** Management of AVM with retained products of conception  

T. Van den Bosch (Belgium)  

**09:15** The management of intrauterine arteriovenous malformations by applying biological glue under ultrasound guidance  

P. Schwaerzler (Austria)  

---  

* Scientific content of sessions is defined by the Scientific Committee; ultrasound systems and technical support are provided by sponsors.  

\(^\dagger\) This presentation is eligible for the Young Investigator award (to be presented in the closing plenary).

</table>
10:45 - 12:05  Fetal anatomy from head to toe  

Chairs: L. Platt (United States); L. Morin (Canada)

10:45  LIVE SCAN: practical use of new ultrasound technologies for the anatomic evaluation of the mid-trimester fetus [industry supported*]  
G. Pilu (Italy)

11:05  Measurement of the inferior facial angle allows to differentiate between primary mandibular dysostoses and other chromosomal and syndromic conditions affecting mandibular growth  
D. Paladini; G. Donarini; G. Sglavo; D. Pastorino; D. Buffi; E. Fulcheri (Italy)

11:10  Discussion

11:13  How to objectively assess fetal facial clefts: what to measure and what to look for  
J. Weichert; R. Axt-Fliedner; A. Kawecki; C. Enzensberger; J. Degenhardt; A. Weichert; M. Krapp; P. Kreiselmaier; D. Hartge (Germany)

11:18  Discussion

11:21  Abnormal craniofacial integrity assessed by the novel maxilla-mandibula-nasion angle in aneuploid fetuses  
J. Weichert; M. Gembicki; R. Axt-Fliedner; A. Kawecki; C. Enzensberger; J. Degenhardt; M. Krapp; P. Kreiselmaier; D. Hartge (Germany)

11:26  Discussion

11:29  Prenatal imaging of ciliopathies  
D. Pugash; A. Lehman (Canada)

11:34  Discussion

11:37  Prenatal diagnosis of fetal musculoskeletal disorders: how accurate can we be?  
P. Glanc; E. Barkova; U. Mohan; A. Toi; S. Keating; D. Chitayat (Canada)

11:42  Discussion

11:45  A new sign to differentiate clubfoot from functional malposition: the transverse skin arch fold  
J. Develay-Morice; N. Frandji-Barbier; F. Grosjean; G. Haddad; C. Chau; C. D’ercole; P. Mares (France)

11:50  Discussion

10:45 - 12:05  Reproductive medicine  

Chairs: W. Martins (Brazil); S.L. Tan (Canada)

10:45  The one-stop ultrasound-based fertility assessment including the use of foam to assess the fallopian tubes  
T. Van den Bosch (Belgium)

11:05  Spontaneous conception after hysterosalpingo-foam sonography (HyFoSy)  
D. Van Schoubroeck; T. Van den Bosch; K. Van Tornout; T. D’Hooghe; D. Timmerman (Belgium)

11:10  Discussion

* Scientific content of sessions is defined by the Scientific Committee; ultrasound systems and technical support are provided by sponsors.
11:13 Increased likelihood of intrauterine device malposition in women with history of a previous Caesarean delivery
O. Rotenberg; J. Jou; W. Leung; E. Bircaj; L. Reimers; P. Dar (United States)

11:18 Discussion

11:21 Endometrial injury for subfertility: a comprehensive systematic review and meta-analysis
C.O. Nastri1; S. Lensen2; M. Manders2; C. Farquhar2; W. Martins1
1(Brazil); 2(New Zealand)

11:26 Discussion

11:29 Diagnosis of septate uterus by 3D US using the ESHRE-ESGE consensus on classification of congenital anomalies in the female genital tract
B. Graupera; M. Pascual; L. Hereter; C. Pedrero; J. Browne; B. Ubeda; I. Rodriguez (Spain)

11:34 Discussion

11:37 How age influences ovarian vascular three dimensional ultrasound parameters in a large population of Italian fertile women
R. Venturella; S. Gizzo; M. Noventa; A. Vitagliano; M. Quaranta; D. Lico (Italy)

11:42 Discussion

11:45 In vitro fertilisation does not affect the sonographic characteristics of adenomyosis
S. Ferrero; E. Tafi; A. Racca; I. Erasmo; F. Sozzi (Italy)

11:50 Discussion

11:53 Use of endoscopic laser speckle contrast analysis to assess uterine perfusion and blood flow in a uterine transplantation model
S. Saso; N. Clancy; M. Tziraki; B. Jones; M. Al-Memar; T. Bracewell-Milnes; M. Thum; T. Bourne; D. Elson; J. Smith (United Kingdom)

11:58 Discussion

12:10 - 12:50 Short oral presentation sessions (OP)

OP20: Novel findings in IUGR
Chairs: S. Eik-Nes (Norway); A. Khalil (United Kingdom)

OP21: Advances in cardiac imaging
Chairs: G. DeVore (United States); F. Tessier (Canada)

OP22: Using emerging or alternative imaging in gynecology
Chairs: J.L. Alcazar (Spain); C. Brezinka (Austria)

12:45 - 14:20 Lunch and e-poster viewing (EP)

12:55 - 13:15 Poster discussion Hubs (P)

P18: Second and third trimester ultrasound
Chair: A. Odibo (United States)

P19: Case reports: abnormalities of the nervous system, face, heart and vessels
Chair: G. Malinger (Israel)

** Lunchtime satellite symposia are brought to you by our sponsors and are not part of the ISUOG CME program. ISUOG takes no responsibility for scientific or clinical content. Please see page 126 for our satellite program.
14:20 - 15:40 Workshop: How to examine the pelvis of women with pelvic pain: making sure you pick up evidence of endometriosis and adenomyosis

**Chairs:** G. Condous (Australia); M. Herrera (Colombia)

14:20 Consensus statement: a systematic approach to women with underlying endometriosis and terms, definitions and measurements used to describe the sonographic features of deep infiltrating endometriosis

G. Condous (Australia)

14:40 The sliding organ sign and how it predicts pouch of Douglas obliteration

S. Reid (Australia)

15:00 Evaluating pelvic adhesions and ureteric pathology using ultrasound

D. Jurkovic (United Kingdom)

15:20 Using MRI to evaluate endometriosis: should it replace or sit alongside ultrasound?

J.L. Alcázar (Spain)

15:40 - 16:10 Coffee and e-poster viewing (EP)

16:10 - 17:10 Closing plenary

**Chairs:** J. Copel (United States); A. Gagnon (Canada)

16:10 Awards presentation: Top abstract and Young Investigator

A. Papageorghiou (United Kingdom); J. Hyett (Australia)

16:20 DEBATE: There is no longer a role for the NT scan in the NIPT era.

Arguments for: J. Johnson (Canada); J. Hyett (Australia)

Arguments against: L. Platt (United States); S. Yagel (Israel)

16:50 The second victim: how do doctors respond to complaints or when errors are investigated?

T. Bourne (United Kingdom)

17:10 - 18:00 Congress leaving drinks

Join us in Rome in 2016!

- Physicians’ behaviour toward the management of pregnancies of unknown location  
  M.S. Faden (Canada)  
  P16.01
- Subchorionic hematoma: its size and association with early pregnancy outcome  
  J. Kwok (Hong Kong)  
  P16.02
- β-hCG clearance during non-interventional management of tubal ectopic pregnancies  
  M. Memtsa (United Kingdom)  
  P16.03
- The influence of smoking habits and food/drink consumption on first trimester growth  
  M. Mongelli (Australia)  
  P16.04
- The value of transabdominal and transvaginal three dimensional ultrasound in the diagnosis and treatment of Caesarean scar pregnancy  
  X. Lin (China)  
  P16.05
- Dangerous fetal heartbeat-positive abdominal pregnancies in a developed country  
  T. Hoshino (Japan)  
  P16.06
- Complication of early pregnancy among women in Nigeria: blood pressure in pregnancy, fetal growth and neonatal complications  
  B.C. Oguntoyinbo (Nigeria)  
  P16.07
Dangerous methotrexate-indispensable abdominal pregnancies in a developed country  
*T. Hoshino* (Japan)

Psychological acceptability of transvaginal scan among Nigerians attending for early pregnancy ultrasound  
*V. Oboro* (Nigeria)

**P17: Rare and interesting cases**  
*Room 517C (Hub 3)*

**Chair:** A. Toi (Canada)

‘Baby in an envelope’: amniotic membrane wrapping the fetus in the first trimester is associated with amniotic band sequence and talipes  
*F. Ushakov* (United Kingdom)

Cardiac dextroposition as an early sign of lung hypoplasia and Scimitar syndrome  
*J.H. Ochoa* (Argentina)

Transient urethral dilatation in the second trimester: natural history and outcome  
*N. Melamed* (Israel)

Pentalogy of Cantrell: sonographic and magnetic resonance imaging findings  
*R. Vlk* (Czech Republic)

Fetal head entrapment between the maternal pelvic bone and a pelvic mass  
*M. Roy-Lacroix* (Canada)

Fetal rectal prolapse secondary to distal colic atresia  
*F. Rypens* (Canada)

Congenital diaphragmatic hernia complicated with strangulated and disconnected of duodenum from stomach, which showed characteristic prenatal ultrasound findings: a case report  
*H. Aoki* (Japan)

Outcome of prenatal diagnosis of multilobar peripheral bronchial atresia mimicking large echogenic lung mass  
*S. Tuburan* (United States)

In polyhydramnios investigation: don’t forget trachea!  
*J. Develay-Morice* (France)

Postnatal treatment of giant congenital lower limb lymphangioma  
*M. Yamamoto* (Chile)

Management of maternal abdominal lymphangiomas during pregnancy: 2 case reports  
*S. Wavrant* (Canada)

Three cases of cervical distortion secondary to incarceration of a retroverted gravid uterus: ultrasound features and management challenges  
*I. Babic* (Canada)

**P18: Second and third trimester ultrasound**  
*Room 517C (Hub 1)*

**Chair:** A. Odibo (United States)

Knowledge, attitude and beliefs of Egyptian women in reproductive age towards prenatal screening of congenital malformations in Alexandria  
*R. El-Said* (Egypt)

Referral behaviour of ultrasonographers practicing in primary care screenings centres  
*M.C. Haak* (Netherlands)

Prenatal diagnosis and fetopathology in a tertiary centre  
*S. Tudorache* (Romania)

HDLive in the assessment of fetal intra-abdominal anomalies  
*N. Mori* (Japan)

Fetal sex influences the variation of renal pelvis measurements during pregnancy  
*D. Nemescu* (Romania)
Antenatal Idiopathic polyhydramnios: then what?  
A. Al-Ibrahim (Qatar)  

Late termination of pregnancy after 22 weeks for fetal anomalies: a single-centre experience  
G. Cassir (Canada)  

Lung growth in fetuses with left-sided congenital diaphragmatic hernia evaluated by three dimensional ultrasonography  
R. Ruano (United States)  

Prediction of prognosis and outcomes in pregnancies with a prenatal diagnosis of congenital diaphragmatic hernia compared to postnatal detection  
P. Conner (Sweden)  

Prenatal sonographic signs of biliary atresia  
O. Shen (Israel)  

P19: Case reports: abnormalities of the nervous system, face, heart and vessels  
Room 517C (Hub 3)  

Chair: G. Malinger (Israel)  

Prenatal MRI diagnosis of frontonasal dysplasia  
S.L. Laifer-Narin (United States)  

Prenatal diagnosis of synteencephaly: two case reports  
J.H. Ochoa (Argentina)  

Prenatal US and MRI diagnosis of segmental spinal dysgenesis  
D. El-Chaar (Canada)  

Brain focal polygyria in thanatophoric dysplasia by ultrasound at 17–18 weeks of gestation: two case reports  
R.K. Pooh (Japan)  

Effectiveness of pulmonary vein blood flow waveforms in fetal screening of isolated total anomalous pulmonary venous drainage (TAPVD)  
C. Tagata (Japan)  

Prenatal diagnosis of aortopulmonary window: case report  
C. Bravo (Spain)  

A fistula connecting the coronary artery to the coronary sinus identified by prenatal diagnosis: case report and literature review  
N. Volpe (Italy)  

Prenatally diagnosed cardiac mass: a case report  
S. Wavrant (Canada)  

The syndrome of right atrial isomerism: prenatal diagnosis and outcome – 2 case reports with literature analysis  
M. Xie (China)
International Symposium ISUOG
Miami, Florida, USA
17 - 20 February, 2016
Miami Marriott Dadeland Hotel

Pre Congress Courses
- Fetal Echocardiography
- Fetal Neurosonography
- Doppler in Obstetrics

Speakers
- Caterina Bilardo, The Netherlands
- Eran Bornstein, USA
- Daniel Cafici, Argentina
- Joshua Copel, USA
- Jader Cruz, Portugal
- Kurt Hecher, Germany
- Mauricio Herrera, Colombia
- Philippe Jeanty, USA
- Francesco Leone, Italy
- Nerea Maiz, Spain
- Gustavo Malinger, Israel
- Dario Paladini, Italy
- Daniela Prayer, Austria
- Lawrence Platt, USA
- Luca Savelli, Italy
- Waldo Sepúlveda, Chile
- Illan Timor Tritsch, USA
- Yves Ville, France
- Renato Ximenes, Brazil

Electronic posters at a glance

Electronic posters (EP) are available for viewing throughout the Congress on the ISUOG On Demand terminals located in the ISUOG Lounge in the exhibition hall and in the Hubs space. You can also send questions or comments to authors using our integrated e-mail facility. Electronic posters are subject categorised in the following pages.

ISUOG On Demand

View ISUOG Congress presentations online, anytime!

- **Presentations (OC, OP, P, EP, invited talks and workshops)** will be recorded and made available on our On Demand platform.
- Access to On Demand is available to all delegates during the Congress, on the On Demand terminals located at the ISUOG Lounge in the exhibition hall. 2016 ISUOG members also have access for the following year online.
- Revisit your favourite lectures or view missed sessions at your leisure.
ISUOG delivers quality advanced and specialist education courses in Ultrasound in Obstetrics and Gynecology, providing up to date knowledge and clinical guidance in a range of topics. Our courses are dynamic, interactive clinical updates and provide excellent networking opportunities.

**Coming in 2016:**

- Advances in fetal echocardiography (ISUOG/SMFM)  
  2 February, Atlanta, USA
- 12th International Symposium  
  17-20 February, Miami, USA
- Early diagnosis of fetal anomalies  
  13-14 March, London, UK
- Early pregnancy, miscarriage and endometriosis
- Oncology
- Clinical applications of 3D/4D in OBGYN: tips & tricks
- Skeletal anomalies and genetic syndromes
- Fetal face: 3D/4D dysmorphology

**Our previous delegates said:**

“Very relevant to clinical practice”

“Well organised, good speakers”

“Great course, especially the fact that it was live streamed”

**CME credits will be available**

Visit our website for full course details, including programs, speakers and regular updates on further upcoming courses.

**Discounts available for ISUOG members**

* 1 AMA PRA category credit = 1 EACCME credit
EP01: Preterm and term labour

Surgical technique of cerclage for absent cervix after conisation: availability of Asakawa AYH uterine tenaculum forceps
T. Yokouchi (Japan)

Correlation between the sonographic measurement of the occiput spine angle and the fetal head station in the first stage of labour
T. Ghi (Italy)

Isolated oligohydramnios at term as an indication for labour induction: a systematic review and meta-analysis
G. Shrem (Israel)

Large head circumference vs. high birthweight in the risk of instrumental delivery in primiparae with “big babies”
S. Yagel (Israel)

Use of transperineal ultrasonography for predicting success of preventive labour induction at term
E. Kalafat (Turkey)

Maternal obesity as an independent risk factor for spontaneous preterm birth predicted by transvaginal sonographic measurement of cervical length
J. Gevaerd-Martins (United States)

Comparing clinical effectiveness of second trimester cervical length for the detection of patients at risk of preterm birth in two referral centres
A.L. Zimerman (Canada)

Consecutive change of cervical length in placenta previa for the prediction of emergent Caesarean delivery
S. Kim (Republic of Korea)

Cervical measurement is useful predictor of success of TOLAC
L. Young (Republic of Korea)

Pregnant women’s view on the impact of nuchal cord on fetal outcomes in Nigeria
V. Oboro (Nigeria)

A narrow subpubic arch angle is associated with a higher risk of persistent posterior occiput position
A. Youssef (Italy)

A comparison between two 3D ultrasound contrast-enhancing techniques for subpubic arch angle measurement
A. Youssef (Italy)

Short cervical length on transvaginal ultrasound in mid-trimester pregnancy is associated with neonatal respiratory distress syndrome
S. Hong (Republic of Korea)

Cervical length and early mid-trimester serum insulin-like factors to predict preterm delivery
J. Shin (Republic of Korea)

EP02: Placenta and pregnancy complications

A successful conservative treatment of large placental remnant after subtotal Caesarean hysterectomy
S. Hong (Republic of Korea)

Placental chorioangioma: ultrasound diagnosis and management of a complex pregnancy
L. Edwards (Australia)
Renal cell carcinoma in woman with high-risk pregnancy: a case report of pregnancy loss after radical nephrectomy
M.J. Kudla (Poland)

Caesarean delivery after surgical repair of uterine fistula in a Caesarean section scar with literature review of surgical repair of dehiscence after Caesarean section
I.E. Timor-Tritsch (United States)

Bilateral hypogastric artery ligation before hysterectomy with placenta in situ in cases of placenta precreta: can it reduce maternal morbidity?
R. El-Said (Egypt)

Ultrasound diagnosis and pregnancy outcomes in placenta accreta
L.K. Wesson (Canada)

The metallome of human placenta in gestational diabetes mellitus
E. Cosmi (Italy)

EP03: Fetal neuro-imaging

Cavum septum length/cerebellar diameter (C/C) ratio: novel measure for diagnosis of corpus callosum anomalies
R. El-Said (Egypt)

Withdrawn

Gender-related structural differences in the fetal brain measured by 3D ultrasound
S. Pashaj (Albania)

Normal transverse cerebellar diameter (TCD) from a large population in Chile
M. Yamamoto (Chile)

Preliminary application of intelligent three dimensional ultrasound imaging of fetal cranial mid-sagittal view
Q. Lin (China)

Fetal MRI of hemimegalecephaly: a report of 4 cases
S.L. Laifer-Narin (United States)

Prenatal diagnosis of Joubert syndrome and related cerebellar disorders and review of literatures
X. Chen (China)

Early prenatal diagnosis of fused cavum septi pellucidi (CSP) and fornix associated with dysgenic corpus callosum (CC): case report
F. Moretti (Canada)

Prenatal 3D ultrasound diagnosis of vein of Galen aneurysm (VGAM): case report
M.J. Kudla (Poland)

Management of an occipital encephalocele with complete herniation of the cerebellum
A. Weichert (Germany)

Prenatal ultrasound analysis of 33 cases of fetal anophthalmia and microphthalmia
Y. Yuan (China)

EP04: Fetal echocardiography

Clinical application of CASSEAL in two different hospitals: an extended axial echocardiographic protocol for prenatal diagnosis
C. Bravo (Spain)

Clinical application of CASSEAL (fetal cardiovascular system sonographic evaluation algorithm) for the diagnosis of fetal cardiovascular anomalies
C. Bravo (Spain)

CASSEAL in fetal magnetic resonance imaging for the assessment of the super extended cardiovascular system
C. Bravo (Spain)
Feasibility of two-dimensional whole wall motion tracking in fetal echocardiography  
*R. Axt-Fliedner (Germany)*

Screening the second trimester fetal heart in women with an increased body mass index using three dimensional volume sweep  
*J.S. Woo (Australia)*

Prenatal diagnosis of absent pulmonary valve syndrome  
*Y. He (China)*

4D colour/power Doppler with glass-body/HDlive silhouette mode in the assessment of the fetal heart  
*M.A. AboEllail (Japan)*

Two cases of fetal premature atrial contraction with cardiac dysfunction  
*Y. Mukai (Japan)*

A case of extrahepatic PRUV with pulmonary atresia and ventricular septal defect  
*M. Nagasawa (Japan)*

Prenatal diagnosis of idiopathic infantile arterial calcification  
*F. Su (China)*

Transplacental treatment of fetal supraventricular tachycardia with a combination of sotalol and flecainide  
*J. Kwon (Republic of Korea)*

Triple X syndrome associated with central nervous system anomalies and cardiac anomaly  
*N. Sahin Uysal (Turkey)*

---

**EP05: Fetal growth restriction**

Obstetrics and neonatal outcomes of fetal growth restriction fetuses with abnormal umbilical Doppler compared to premature infants  
*A.R. Caetano (Brazil)*

Doppler modifications in intrauterine growth restricted fetuses: the DOMINO study  
*L. Marchi (Italy)*

Reproducibility and repeatability of uterine artery Doppler Pulsatility Index and bilateral diastolic notch between 11–14 weeks of gestation  
*G.R. Lobo (Brazil)*

Reference range of uterine artery Doppler pulsatility index between 11–14 weeks gestation in a Brazilian population  
*G.R. Lobo (Brazil)*

Differences between fetal ductus venosus pulsatility index for veins with automatic and manual measurement  
*M. Morlando (Italy)*

Role of Doppler velocimetry in prediction of adverse pregnancy outcome in fetal growth restriction  
*A. Jamal (Islamic Republic of Iran)*

Prenatal prediction of neonatal asymmetry  
*M. Yamamoto (Chile)*

Assessment of maternal Doppler parameters of ophthalmic artery in fetuses with growth restriction in third trimester: case-control study  
*A.R. Caetano (Brazil)*

Placental vascularisation indices and uterine artery peak systolic velocity in pregnancies complicated with hypertension and gestational diabetes  
*M. Jakó (Hungary)*

Is there a link between maternal PAPP-A values and SGA?  
*H. Gandhi (United Kingdom)*

Short-term growth as a function of abnormal Doppler flow in growth restricted fetuses  
*D. Mackeen (United States)*

An adjustable fetal weight standard for twins: a statistical modeling study  
*W. Zhu (China)*
EP06: First trimester ultrasound

Prenasal thickness to nasal bone length ratio in normal and Trisomy 21 fetuses at 11–14 weeks of gestation

G. Manegold-Brauer (Germany)

Automated measurement of nuchal translucency by volume NT™ (3D ultrasound): feasibility and reproducibility about 100 consecutive measurements by five physicians

G. Haddad (France)

Does increased hepatic artery flow in first trimester fetuses signal an adverse fetal outcome?

V. Borobio (Spain)

Women’s perceptions of non-invasive prenatal testing versus first trimester combined screening

J.M. Johnson (Canada)

First trimester sonographic markers in in vitro fertilised pregnant women

G. Diez Chang (Peru)

Impact of the introduction of non-invasive prenatal test on the indication of invasive tests at the Private Albert Einstein Jewish Hospital in São Paulo

A.R. Caetano (Brazil)

An automatic algorithm to measure the fetal nuchal translucency in first trimester from 3D volumes

P. Tsai (Taiwan)

A rare case of prenatal auto-amputation of extra-finger in fetus with isolated postaxial polydactyly diagnosed at 13 weeks of pregnancy

E. Porozova (Russian Federation)

Sirenomelia: early first-trimester detection and management

S. Al Nasiry (Netherlands)

Non-invasive prenatal screening: the approach after two positive test results and discordant fetal karyotype – a clinical case

O. Leça (Portugal)

EP07: Multiple pregnancy

Outcome in twin pregnancies discordant for major fetal abnormality

S. Tudorache (Romania)

Maternal and neonatal outcomes in triplet pregnancies according to the mode of delivery

S. Yang (Republic of Korea)

Variability of the clinical course of monochorionic twins based on a different architecture of placental bed

L. Haslik (Czech Republic)

Non-invasive prenatal testing for Trisomy 21,18 and 13 in twin pregnancies

M. Chen (China)

Customised fetal growth curves in uncomplicated twin pregnancies

N. Volpe (Italy)

Obstetric and perinatal outcomes in monochorionic twin pregnancies conceived by in vitro fertilisation

S.Y. Jung (Republic of Korea)

Frequency of discordancy in twins from Padre Hurtado Hospital

M. Yamamoto (Chile)

Monozygotic twins discordant for Trisomy 18

K. Tan (Singapore)

Atypical course of complications in monochorionic twin pregnancy: quick development of TTTS in the 29th week

K. Palasova (Czech Republic)

Are the current antenatal diagnostic criteria for twin anemia polycythemia sequence adequate?

K. Law (Hong Kong)
Improvement of fetal weight after nutrition intervention on a case of selective fetal growth restriction of a monochorionic twin pregnancy
I.S. Britto (Brazil)

Dyssegmental dysplasia: clinical, radiological and molecular findings of a challenging antenatal diagnosis in a dizygotic twin pregnancy
S.A. Basalom (Canada)

**EP08: Screening for pregnancy complications**

Does cervical cerclage affect the rate of Caesarean section?  
I. Babic (Canada)

Prediction of large-for-gestation neonates with first-trimester maternal serum PAPP-A  
A. Rossi (Italy)

Perinatal outcomes and maternal characteristics in pregnancies with abnormal 50g oral glucose challenge test and normal 100g oral glucose tolerance test results  
C. Gulumser (Turkey)

Early second trimester screening in high risk pregnancy at tertiary referral ultrasound centre  
A. Baranov (Sweden)

What is the role of advance maternal age in pregnancy related complications?  
C. Gulumser (Turkey)

Detection of single umbilical artery at 11–13 weeks scan: the accuracy of method and the importance as a marker of fetal malformation  
E. Porozova (Russian Federation)

Estimation of gestational age at 11 to 13+6 weeks of gestation using fetal biparietal diameter in a Korean population  
M. Kim (Republic of Korea)

Evaluation of angiogenic factors combined with Doppler parameters in healthy controls and fetal growth restriction  
A.P. Zamarian (Brazil)

Does low dose aspirin effect mean uterine artery Doppler pulsatility index in women deemed high risk for early pre-eclampsia?  
F. Leduc (Canada)

Adding biochemical markers to uterine artery Doppler in the first trimester in the prediction of preterm pre-eclampsia: magnitude of improvement  
G.R. Lobo (Brazil)

First trimester maternal renal interlobar vein Doppler for pre-eclampsia prediction  
F. da Silva Costa (Australia)

Repeatability, reproducibility and generalizability of transabdominal and transvaginal Doppler flow measurements of uterine arteries during the first trimester of pregnancy  
L. Marchi (Italy)

Performance of first trimester uterine artery Doppler in the prediction of pre-eclampsia  
G.R. Lobo (Brazil)

**EP09: Second and third trimester imaging**

Introduction of non-invasive prenatal testing (NIPT): did it impact the parental choice of prenatal examinations?  
R. Oi (Japan)

Feasibility of chorionic villus sampling after 15 weeks of pregnancy in cases with severe oligohydramnios  
R. Cruz-Martinez (Mexico)

Comparison of practice guidelines for the performance of the routine mid-trimester scan  
L.J. Salomon (France)

Abnormal vertebral pattern and adverse fetal and neonatal outcome: a systematic review  
P.C. Schut (Netherlands)
84 consecutive cases of single umbilical artery in Padre Hurtado Hospital
*M. Yamamoto* (Chile)

Prenatal diagnosis and perinatal outcome in congenital diaphragmatic hernia
*S. Tudorache* (Romania)

Predicting fetal lung hypoplasia in congenital diaphragmatic hernia: parameters with ultrasound and magnetic resonance imaging
*M. Shimizu* (Japan)

Prenatal diagnosis and outcome of fetuses with echogenic lung masses
*F. A. Guerra* (Chile)

The importance of malformation counting method in patients with more malformed organs for the diagnostic accuracy in the tertiary referral centre
*N. Vecek* (Croatia)

Can you give me a hand? Diagnosing and understanding the clinical significance of fetal hand anomalies in obstetric ultrasound
*K. Snyder* (United States)

Proposal of ordinal scale for assessment of the extent of the body being affected by the malformations
*N. Vecek* (Croatia)

The pattern of facial clefts in Chinese
*Y. Ting* (Hong Kong)

Sex ratio of non-syndromic cleft lip and/or palate in Chinese
*Y. Ting* (Hong Kong)

Creation of cerebellar diameter reference standard for the purpose of the detection of cerebellar hypoplasia unique to Trisomy 18
*K. Hayata* (Japan)

3D ultrasound finding of fetal adrenal hemorrhage
*S. Kim* (Republic of Korea)

Prenatal diagnosis of extrahepatic portosystemic shunt
*C. Bravo* (Spain)

Epignathus: case report and review of literature
*R. El-Said* (Egypt)

Ex utero intrapartum treatment procedure a fetus with congenital high airway obstruction syndrome
*T. Kanasugi* (Japan)

Value of prenatal ultrasound and MRI in the diagnosis of simple fetal inguinoscrotal hernia
*X. Yang* (China)

HD Live with silhouette utility in ultrasound daily scanning for fetal anomalies
*M. Calomfirescu* (Romania)

The role of obstetric ultrasound: experiences and views of physicians in obstetric care in Dar es Salaam, Tanzania
*A. Åhman* (Sweden)

Antenatally diagnosed intra-abdominal umbilical vein varix
*O. M. Thompson* (United Kingdom)

Pleural effusion: long-term prognosis in two cases
*S. S. Herbst* (Brazil)

Cystic hygroma recurrence in the following pregnancy with normal karyotype
*N. Sahin Uysal* (Turkey)

The use of a high frequency linear transducer to assess fetal anomalies
*K. Y. Leung* (Hong Kong)

Update on hydration strategies for amniotic fluid improvement in isolated oligohydramnios and normohydramnios: a systematic review and meta-analysis
*S. Gizzo* (Italy)

A new score to assess the difficulty of performing a routine mid-trimester scan
*L. J. Salomon* (France)

Prenatal non-visualisation of fetal gallbladder: associated conditions and postnatal outcomes
*R. Has* (Turkey)
Outcome of pregnancies complicated with Exomphalos in Wales during a 14 year period (1998–2012)  
*K. Upadhyay (United Kingdom)*

Prenatal presentation of a rare genetic condition: a case report of CCF  
*S. Wavrant (Canada)*

Prenatal diagnosis of chromosome 46, XX,der(9)t(4;9)(q31.1;p24) in fetus with transient isolated fetal pleural effusion  
*S. Guven (Turkey)*

Beckwith-Wiedemann syndrome: a case report  
*S. Park (Republic of Korea)*

Early prenatal diagnosis of Golabi syndrome  
*S. Wavrant (Canada)*

Prenatal diagnosis of Prader-Willi syndrome  
*M. Roy-Lacroix (Canada)*

**EP10: Gynecology**

Preliminary application of pelvic floor ultrasound in female with different classification of stress urinary incontinence  
*Y. Mao (China)*

Comparison of the diagnostic performance of three risk of malignancy indices in the preoperative assessment of adnexal tumors in postmenopausal patients  
*N. Abdalla (Poland)*

Ultrasound assessment of fibroids treated with ulipristal acetate  
*C. Ros (Spain)*

Application of contrast-enhanced ultrasound in ovarian fibromas  
*Y. Mao (China)*

Application of transperineal ultrasound in female urethras imaging and pathological change of circumurethras  
*Y. Mao (China)*

Sonovaginography in differential diagnosis of vaginal and paravaginal abnormalities: preliminary results  
*M.D. Bernardo (Portugal)*

Ultrasoundographic imaging of vulvar structures in peri-menopausal women using high frequency ultrasound: lichen sclerosus – case report  
*M. Migda (Poland)*

B lymphoma on the transvaginal ultrasound scan  
*T. Indrielle (United Kingdom)*

Utility of high frequency ultrasound in vulvar skin imaging structures: valvular skin nevi – case report  
*M. Migda (Poland)*

The value of sliding sign in the prediction of pouch of Douglas obliteration in patients with posterior compartment endometriosis  
*V. Nadasan (Singapore)*

Transvaginal ultrasound in the evaluation of deep infiltrating endometriosis  
*W. Wong (Singapore)*

Usefulness of elastography in assessment of the post Caesarean uterine wall scar in women with abnormal uterine bleeding  
*S. Wozniak (Poland)*

Re-evaluation of MRgFUS treatment for uterine myoma with a higher signal intensity than that of myometrium on T2-weighted MR images  
*H. Fukunishi (Japan)*

Endoluminal three dimensional ultrasonography in diagnosis of congenital oblique vaginal septum syndrome  
*Q. Lin (China)*
EP11: Reproductive medicine

An attempt to reduce the costs of assisted reproductive techniques: a pilot randomised controlled trial
C.O. Nastri (Brazil)

Ultrasound of spiral arteries in assessing endometrial receptivity in infertile women with adenomyosis taking low-dose acetylsalicylic acid
S. Wozniak (Poland)

Influence of insulin resistance level on ultrasound imaging of the ovaries in women with polycystic ovary syndrome: preliminary study
P.R. Szkodziak (Poland)

Fallopian-tube patency testing by hysterosalpingo-foam sonography in infertility exploration
B. Roxana (Romania)

Outcome of ICSI pregnancies with spontaneous loss of a co-twin compared with singleton ICSI pregnancies
N. Sahin-Uysal (Turkey)

+888 988 1888  
Sophie Fleurent  
DynacareNext@daycare.ca  
www.Dynacare.ca  

Dynacare Next provides specialized laboratory testing to hospitals, private laboratories and medical specialties, including the Harmony™ Prenatal Test, a non-invasive prenatal test (NIPT) that detects common fetal trisomies in pregnancies of 10 weeks or more, based on directed analysis of cell-free DNA in maternal blood. It has been shown in clinical studies to detect the risk of fetal trisomies with high accuracy: combined sensitivity of 99% and a false-positive rate of less than 0.1%.
ELSEVIER is a leading publisher of health science publications, providing superior reference information, decision support tools to doctors, nurses, health practitioners and students. Our media spectrum — print, online and handheld, provides information in the most convenient format.

GE Healthcare provides transformational medical technologies and services to meet the demand for increased access, enhanced quality and more affordable healthcare around the world. GE (NYSE: GE) works on things that matter - great people and technologies taking on tough challenges. From medical imaging, software and IT, patient monitoring and diagnostics to drug discovery, biopharmaceutical manufacturing technologies and performance improvement solutions, GE Healthcare helps medical professionals deliver great healthcare to their patients.

Hitachi Aloka Medical pioneered diagnostic ultrasound, and today is known for unparalleled image quality, superior system reliability, ease of use and innovative technology. From our premium F75 and full-featured ARIETTA 70, to our compact office-based F37, we have the right system for every practice size.

Illumina is transforming human health as the global leader in sequencing and array-based technologies. The company serves customers in a broad range of markets, enabling the universal adoption of genomics solutions in research and clinical settings. To learn how Illumina is unlocking the power of the genome, visit www.illumina.com.
The latest in our Expert Series, the Voluson™ E10 ultrasound system is designed for the advanced women’s health practice. Where complex cases are the rule, not the exception. Where patients come to you for confident answers.

The new Voluson E10 is based on the innovative Radiance System Architecture that sets new standards in Imaging Performance* by providing spectacular 2D and 3D/4D images; excellent penetration for your technically difficult exams; new volume imaging tools and advanced applications to help you address your most difficult cases.

The Voluson E10 is also the foundation for our new Voluson e4D technology. The Radiance System Architecture together with the first commercially available curved matrix electronic 4D probe, eM6C, deliver ultra-fast volume rates, flexible imaging formats and the excellent resolution you have come to expect from a Voluson.

Our images are truly extraordinary – visit us on www.voluson.com

James Aliamus
jaliamus@natera.com
www.natera.com

Natera is a genetic testing company that develops and commercializes non-invasive methods for analyzing DNA. Since 2009, Natera has launched seven molecular diagnostic tests, including many available through major health plans that account for more than 140 million covered lives. Natera’s goal is to transform the management of genetic diseases.

PerkinElmer

Booth: 518

Mustionkatu 6, 20750 Turku, Finland
+358 2 2678 111
Dennis Flannelly
dennis.flannelly@perkinelmer.com
www.perkinelmer.com/MaternalFetalHealth

PerkinElmer is a global company focused on improving the health and safety of people and their environment.

The company supplies instruments, test kits and risk calculation software to screen for pregnancy abnormalities. As a pioneer in methods for prediction of pre-eclampsia, PerkinElmer offers a growing portfolio of innovative products based on the PlGF serum marker. PlGF also has value as a Down syndrome marker. Various other 1st and 2nd trimester aneuploidy markers are reliably detected by PerkinElmer serum or dried blood spot screening assays. In addition, the Prenatal BoBs™ product allows molecular karyotyping.

Ellen Pooler
iona@premaitha.com
www.premaitha.com

The IONA® test is the first non-invasive in vitro diagnostic CE marked product for prenatal screening enabling clinical laboratories to offer a regulated NIPT in-house, with results available in just 3 days. IONA® estimates the risk of a fetus having Trisomy 21, 18 and 13 from as early as 10 weeks gestation. IONA® gives pregnant women and their doctors greater confidence in the result and reduces the need for unnecessary invasive follow-up tests and the associated anxiety and stress.

The evolution of premium ultrasound

The science of premium ultrasound continues to evolve with innovations that take image quality to a level never before possible. Philips EPIQ Evolution 1.0 unleashes the power of our nSIGHT Imaging architecture – with image quality advances for targeted Ob/Gyn applications. It reveals small details at early gestational ages and enables you to capture clear diagnostic information on even your largest patients. Plus, it gives you the power to confidently diagnose your most complex gynecological cases.

* Scientific content of sessions is defined by the Scientific Committee; ultrasound systems and technical support are provided by sponsors.
Your questions answered at the Congress

Receive your ISUOG membership number
ISUOG has two tiers of membership; core and online. Online members can also add a print subscription of UOG. All Congress attendees who were not ISUOG members when they registered have been given ‘core’ membership for 2016. Welcome! Come and visit us at the ISUOG Lounge in the exhibition hall to discuss your member details.

Find out about your ISUOG membership entitlements
Turn to pages 11 & 14 for membership information, or speak to the team at the ISUOG Lounge.

Upgrade your ISUOG membership to receive the journal at reduced prices
At the Congress, upgrade at the registration desk during its designated opening times. There are two options; upgrade to online to access the journal online and via the new app, or add a print subscription of UOG to also receive print copies of the journal every month.

Learn about submitting a research paper to UOG
If you have new research to share and submit for publication in Ultrasound in Obstetrics and Gynecology, the Editorial team can be found at the ISUOG Lounge and would be happy to answer your questions.

Exercise your voting rights as an ISUOG member
Attend the AGM on Sunday 11 October 2015 from 10.50 - 11.20, in Hall 517 at the Palais des congrès de Montréal.

Find out about ISUOG events and opportunities near you
Did you know ISUOG runs around 40 approved courses each year? In 2015 these courses have already reached 28 countries. Come and see the team at the ISUOG Lounge to find out what activities are happening around the world and near you or to apply to approve your own high quality program.

Find an ISUOG ambassador from your country or region
ISUOG’s new regional ambassadors are listed on our website (isuog.org/Membership/AdvisoryMembers) and are easily identifiable at the Congress via their red lapel pins.

Check your Congress presentation is uploaded in time for your session
Check that your Congress posters were uploaded prior to the Congress at any of the On Demand computers on the ISUOG Lounge (in the exhibition hall) or via the interactive digital signage in the foyer at any time.

Upload, check or modify presentations
If you are a speaker in an oral session you should attend the speaker preparation room to check your talk. The speaker preparation room is located in Room 523 on the fifth floor of the Palais de congrès and is open as per page 7 of this program. The technical team will be on hand to help you upload your presentation. This service does get very busy so please leave yourself plenty of time; arrive at least 4 hours before your session and preferably the day before.

View an electronic poster
Electronic posters are not presented orally but rather, are available throughout the Congress on the ISUOG Lounge On Demand viewing terminals.
Attend a Hub session
ISUOG’s Hubs are a new feature of the Congress in 2015 and will host a variety of interactive research discussions and state-of-the-art training workshops as well as a full timetable of exiting collaboration, learning and networking opportunities. You are encouraged to attend as many of the unique ‘drop-in’ sessions as possible, the only Hub events requiring pre-event sign up are the Simulation workshops of Monday afternoon (see below). See pages 17 and 24 of this program to see what is happening in the Hubs space each day and attend as many as you wish; this is an informal arena so you can even move between groups gathering at the same time.

Participate in a Simulation Hub
ISUOG is pleased to be hosting 3 innovative, hands-on training workshops at the World Congress which will incorporate the latest in simulation technology. The workshops run in parallel on Monday 12 (14:20-17:30), incur an extra registration fee and places are limited. Pre-event registration for these events was required however, to enquire whether any places remain, please visit Registration.

See a live scan
Sessions which include live scan demonstrations are clearly marked on the program at a glance on pages 18 - 21.

Access sessions that you missed
All Congress sessions are recorded and available on the ISUOG On Demand platform. Catch up on sessions you missed at the computer terminals on the ISUOG Lounge or via the interactive digital signage in the foyer.

Collect or purchase your Congress party ticket
If you have booked a party ticket, this will be given out at registration with your badge.

Receive your certificate of attendance and CME
Your certificate of attendance will be emailed to you after the event on completion of your Congress evaluation form, which will be emailed to your registered email address. All delegates’ badges will be scanned at the door of session halls. In order to qualify for AMA PRA Category 1 Credits™ or Mainpro-M1 credits, Canadian and American delegates must ensure they are scanned into a Congress session on each day that they wish to claim for.

Receive a tax receipt for your registration
Contact registration@isuog.org

Explore the sites of Montréal
Collect a copy of our LOC visitor guide which provides local tips and travel advice, as prepared by the Local Organising Committee, from the registration desk or online at isuog.org/worldcongress

Submit an abstract for the ISUOG Congress next year
Abstract submissions will be accepted from January to April 2016. Follow the instructions published at isuog.org/WorldCongress to submit your original research.

Register to attend the Congress in Rome 2016
Registration for next year’s World Congress opens in January 2016. All ISUOG members can take advantage of reduced registration rates but register online at isuog.org/WorldCongress before July to receive further early bird discounts.
