TRANSPERINEAL ULTRASOUND IN OBSTETRICS AND GYNECOLOGY
a theoretical and practical workshop
Bologna, Italy, 18 April 2020

Topics covered:
• The use of 2D ultrasound to assess the urogynecological patient
• Technique of acquisition & analysis of 3D transperineal ultrasound
• The use of transperineal ultrasound in the labor ward

Course director:
Aly YOUSSEF (Bologna)

Faculty:
Gianluigi PILU (Bologna)
Giulio Aniello SANTORO (Treviso)
Maria Chiara PAGANOTTO (Ravenna)
Ginevra SALSI (Bologna)

The course includes practical sessions with hands-on analysis on 3D/4D ultrasound volume analysis software with the help of expert operators

Venue: St. Orsola Malpighi University Hospital, Bologna, Pavilion 4
For booking and information: nacereduevolte@gmail.com
Cost of participation: 250 euros + VAT
08.30 Course registration
09:00 Introduction to the course G. Pilu
09:15 Pelvic floor anatomy A. Youssef
09:45 Pregnancy, delivery and pelvic floor dysfunction G. Pilu
10.15 2D ultrasound in the evaluation of the urogynecological patient M.C. Paganotto
11.00 Coffee break
11.15 Introduction to the 3D/4D ultrasound analysis software A. Youssef
12:15 3D/4D ultrasound of the pelvic floor: what is normal and what is abnormal? A. Youssef
13.00 Time for practice: hands on analysis of 3D/4D ultrasound volumes of the pelvic floor
13.45 Lunch
14:15 Obstetrical anal sphincter injuries (OASI): clinical relevance and the role of ultrasound G.A. Santoro
15:00 Prediction and prevention of levator ani muscle injuries G. Salsi
15:30 Ultrasound in the labor ward: when and how? A. Youssef
16:00 Time for practice: hands on analysis of 3D/4D intrapartum ultrasound volumes
17:00 Coffee break
17.30 Ultrasound evaluation of meshes and implants M.C. Paganotto
18:00 Time for practice: hands on analysis of 3D/4D ultrasound volumes of the pelvic floor
18.30 Discussion and course closure

Venue: St. Orsola Malpighi University Hospital, Bologna, Pavilion 4
