

## ISUOG Newsletter

April 2020

I would like to thank all those in our community who have engaged and collaborated with ISUOG to produce and disseminate resources in different languages, while working their hardest and putting themselves at risk in order to fight COVID-19.

During this uncertain time, ISUOG's mission has been to assist you in your daily work, while dealing with this pandemic, and to support women around the world by providing them with up-to-date information. We have organised a [series of webinars](#), produced [Patient Information leaflets](#) and published [guidance and research](#) in our journal, [Ultrasound in Obstetrics and Gynecology](#). Many of these resources are already [available in different languages](#) and we are organising three new webinars in [English](#), [Spanish](#) and [French](#). Thank you very much to all the people who have volunteered to make this possible in a very short period of time.

I am also delighted to inform you that after a recruitment campaign for the role of Chief Executive Officer, we have offered [Johan Vos](#) the permanent role, which he has accepted. Johan was, on merit, the strongest candidate in the process and we are very pleased that Johan will remain with us to continue the excellent work he began as our interim CEO and, in particular, to steer the organisation through the immediate challenging times.

My Board of Trustees and the team in the ISUOG Office are with all of you and will continue working to help end this pandemic.

Warm wishes,

Prof. dr C.M. (Katia) Bilardo  
ISUOG President

Help us disseminate COVID-19 resources and translations, to support us in our goal towards protecting health professionals around the world.

Share this content on social media by forwarding this email or linking to the [COVID-19 resources page](#) (or [translated resources](#)), from the resources library on your national institution webpage. Thank you.

### COVID-19 Resources

In order to support physicians and healthcare workers fighting in the battle against COVID-19, ISUOG has deployed a number of resources; a series of free [webinars](#), [interim guidance](#), [safety and consensus statements](#) and other research [articles](#) published in our journal: [Ultrasound in Obstetrics and Gynecology](#), in addition to a [Patient Information leaflet](#).

### Coming up in our free webinar series on COVID-19

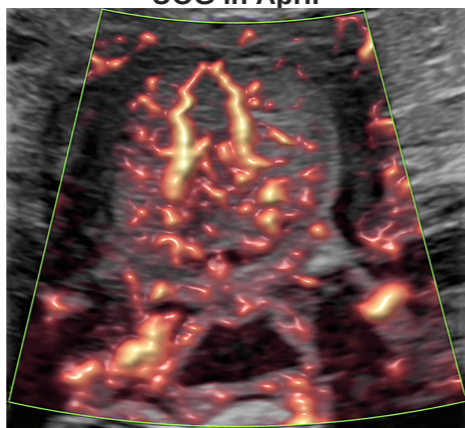

Our next coronavirus webinar, "[clinical management and testing explained](#)", will be on **April 14th** and will focus on clinical obstetric management and the latest information on tests, in particular their reliability and performance.

Continuing our series of COVID-19 webinars, on **April 21st**, we will be hosting two special webinars in [French](#) and [Spanish](#), in order to respond to more requests and questions about the coronavirus.

### UOG in April

The April issue of [Ultrasound in Obstetrics & Gynecology](#) includes an overview of the available clinical and research data on [COVID-19 infection in pregnancy](#), a study on the value of first-trimester ultrasound in the prediction of third-trimester sonographic stage of [placenta accreta spectrum disorder and surgical outcome](#), a study on [diagnosis of fetal defects in twin pregnancies](#) at routine 11–13-week ultrasound examination, and a study on the [effect of one fetal death on pregnancy outcome in twin pregnancy](#) with two live fetuses at 11–13 weeks.

Also online this month is a [study on UK stillbirth trends in over 11 million births](#), finding no evidence to support the effectiveness of the Growth Assessment Protocol program. [Read the accompanying press release](#).

### COVID-19 Resources in Your Language

Browse ISUOG's resources on coronavirus (COVID-19) including translations of our series of webinars, guidance, patient information leaflets and more in: [Spanish](#), [Italian](#), [French](#), [Chinese](#), [Portuguese](#) and [other languages](#).

[Translated resources](#)

### Other Free Resources

ISUOG's state-of-the-art basic training program on ultrasound in obstetrics and gynecology is [available free online](#) to help improve scanning skills for professionals new to ultrasound. The program is also available in [Spanish](#), [Portuguese](#) and [Chinese](#).

You can also download the free e-book [Ultrasound in Obstetrics & Gynecology: A Practical Approach](#) and watch the [Basic Training Films](#) on [the principles of ultrasound](#), [plan your movements and improve your image](#) and [the basic steps of an obstetric ultrasound](#).

Finally, [our guidelines](#), [guidelines translations](#) and [patient information leaflets](#) are also free to read and download.

[More resources](#)

### Trainee Partnership with ISUOG

To support international trainees beginning their careers in ultrasound for obstetrics and gynecology, ISUOG offers [free 2-year membership](#), facilitated through institutional partnerships via trainee coordinators.

Trainee membership provides Journal membership benefits free for 2 years (usual price: £115 per year).
