Day 1
Congress Workshop
- Live Demonstration: Fetal Biometry in each trimester
- Live Demonstration: Fetal Color Doppler
- Live Demonstration: Uterine Artery Doppler
- Live Demonstration: Amniotic Fluid
- Charting Growth
- Current Controversies in Growth Charts
- Growth Charts: Is there a consensus
- Placental Grading: Is it relevant today?
- Amniotic Fluid: A Practical Approach
- Safety Considerations in Ultrasound and Doppler
- Laboratory Investigations in Growth Restriction
- Clinical Biochemistry of the Placenta
- Placental Pathology: Ultrasound, Histopathology and Relevance
- Conventional, Limited & Virtual Autopsies In Growth Disorders

Day 2 & Day 3
- Defining Fetal Growth
- The Delphi Consensus
- The Barcelona Approach
- Early versus Late FGR
- Is There a Hypertensive FGR Phenotype
- Maternal Cardiodynamics: The Root of the Problem?
- Genetic Considerations in FGR
- The Fetal Infection Perspective in FGR
- Growth Considerations in Diabetes Mellitus
- Growth Considerations in Twins
- Growth Considerations in ART Pregnancies
- Neonatal, Pediatric and Adult Consequences of FGR
- Screening for Preeclampsia
- Screening for FGR
- Treatment Options in FGR
- Preventing FGR
- Surveillance Protocols in FGR
- Gene Therapy in FGR
- Delivery Decisions in FGR
