BREAK		
Human stem cells: the new patient? C. Mummery (Netherlands)		
BREAK		
Workshop: The A to Z of Doppler	Workshop: Step by step approach to abnormal placentation	Workshop: How do you investigate and treat women presenting with recurrent miscarriage?
BREAK		
OC: Fetal growth	OC: Saving lives with ultrasound	OC: Managing complications in early pregnancy
BREAK		
Masterclass: How to predict and prevent poor obstetrical outcomes with Doppler	Masterclass: How to save lives with ultrasound: getting to the right diagnosis for AIP and vasa previa	Masterclass: Imaging and oncology: multidisciplinary case discussion of tumours
LUNCH AND SPONSOR SYMPOSIUM		
Self-evidencing babies K. Friston (UK)		
BREAK		
Workshop: Artificial intelligence in imaging	Workshop: How do I diagnose and manage this anomaly?	Workshop: Diagnostic and management challenges with Asherman's syndrome
BREAK		
OC: Advances in imaging	OC: Screening for chromosomal anomalies	OC: Investigating women with abnormal uterine bleeding and possible uterine pathology
BREAK		
Masterclass: Keeping up with the latest developments in imaging	Masterclass: Taking the second trimester anomaly scan a step further	Masterclass: Managing early pregnancy complications
BREAK		
New ideas about risk assessment, prevention, and treatment of patients at risk for spontaneous preterm birth – R. Romero (USA) Latest research on MRI – D. Prayer (Austria) Prediction and prevention of small-for-gestational-age neonates – M.Y. Tan (UK)		18:20-19:20 Progress and challenges in female fertility preservation – R. Anderson (UK) Tips and tricks to improve your gynecologic scans – S. Goldstein (USA)
