

<u>Friday 3<sup>rd</sup> May</u>		
14:00-14:15	Course opening	
Session I: Ultrasound in 1 <sup>st</sup> trimester		
14:15-14:35	The early anomaly scan. ISUOG guidelines	A.Tabor
14:35-14:55	First trimester anomaly screening: the need for protocols	A.Papageorghiou
14:55-15:25	From Nuchal translucency to Cell free DNA testing: an update including ISUOG Guidelines on correct use of CF-DNA test.	A.Tabor
15:25-15:55	First trimester ultrasound in twins	A. Khalil
15:55-16:15	Is early neurosonography feasible?	D. Paladini
16:15- 16:35	Detecting facial clefts in the first trimester	R. Chaoui
16:35-17:05	<i>Refreshment break</i>	
Session II		
17:05-17:25	<b>LIVE DEMO</b>	R. Chaoui
17:25-17:45	Screening & diagnosis of CHD at 12-13 weeks	R. Chaoui
17:45-18:05	Megacystis: management pathways	A.Papageorghiou
18:05-18:25	Outcomes in increased NT with normal karyotype	A. Khalil
18:25	Discussion	

<u>Saturday 4<sup>th</sup> May</u>		
Session III: CNS I		
8:30- 8:50	Fetal Neurosonography. How to...	D. Paladini
8:50-9:10	<b>LIVE DEMO:</b> Brain and Heart – 1	D. Paladini
9:10-9:35	Agenesis of the corpus callosum: how to detect, how to counsel	A.Papageorghiou
9:35-10:00	The cavum septi pellucidi...how to check it?	R. Chaoui
10:00-10:25	Differential diagnosis and update on posterior fossa malformations.	D. Paladini
10:25- 10:40	Discussion	
10:40-11:10	<i>Refreshment break</i>	

<b>Session IV: CNS II</b>		
11:10-11:30	Malformations of cortical development	D. Paladini
11:30-11:50	Spina bifida. From IT to fetal surgery	R. Chaoui
11:50-12:10	CNS: When to think about a syndrome	D. Paladini
12:10-12:30	Contribution of Fetal MRI in cases of brain anomalies	A. Khalil
12:30-12:50	Intracranial cystic lesions and Haemorrhage	D. Paladini
12:50-13:10	Discussion	
13:10-14:30	<i>Lunch</i>	
<b>Session V: Fetal heart</b>		
14:30-14:50	ISUOG Guidelines on cardiac screening	N. Vrachnis
14:50-15:10	<b>LIVE DEMO:</b> Brain and Heart – 1	R. Chaoui
15:10-15:30	Effective screening, every time	A.Papageorgiou
15:30-15:50	Cono-truncal anomalies. Differential diagnosis	D. Paladini
15:50-16:10	Abnormalities of situs and abnormal venous return	R. Chaoui
16:10-16:40	Quiz and Discussion	D. Paladini
16:40-17.10	<i>Refreshment break</i>	
<b>Session VI: Fetal Abdomen. I. Urinary tract – genital anomalies</b>		
17:10-17:30	Dysplastic kidneys. From diagnosis to perinatal management	D. Paladini
17:30-17:50	Hydronephrosis. Differential diagnosis and counselling	A.Papageorgiou
17:50-18:10	Cloacal and bladder extrophy	N. Vrachnis
18:10-18:30	Disorders of sex differentiation. Sonographic diagnosis and diagnostic flowchart	D. Paladini
18:30	Discussion	

*Please note that this is a provisional schedule which may change.*

<u>Sunday 5<sup>th</sup> May</u>		
<b>Session VII: Gastrointestinal tract</b>		
8:30- 8:50	Exomphalos and gastroschisis. Diagnosis and outcome	A. Tabor
8:50-9:10	GI tract obstruction. Differential diagnosis and risks	N. Vrachnis
9:10-9:30	Trachoe-esophageal fistulas and atresias	R. Chaoui
9:30-9:50	VACTER. An insidious diagnosis	A.Papageorghiou
9:50-10:10	Discussion	
10:10-10:40	<i>Refreshment break</i>	
<b>Session VIII: Skeletal dysplasias and muscular disorders</b>		
10:40-11:10	How to deal with a short femur: a simple approach to skeletal dysplasias	A.Papageorghiou
11:10-11:30	Achondroplasia and late onset dysplasias	R. Chaoui
11:30-11:50	Most common lethal dysplasias	A. Khalil
11:50-12:00	Case discussions	N. Vrachnis
12:00-12:20	Synaptopathies, formerly arthrogryposes	A. Khalil
12:20-12:40	Discussion and questions	
12:40	<b>CME test and close of the course</b>	

*Please note that this is a provisional schedule which may change.*
