

28th World Congress on Ultrasound in Obstetrics and Gynecology

20 – 24 October 2018, Singapore

Incorporating ASUM 2018

We are excited to announce that the preliminary program for our 2018 [World Congress](#) in Singapore is now available! Our [day by day Congress program](#) is divided into a variety of sessions, such as plenary lectures, didactic workshops, Masterclass sessions, live scan demonstrations and short oral and poster sessions.

In addition to the main program, our [Pre-Congress courses](#) offer a fantastic chance to explore themes within the main scientific program in more detail.

Accommodation is selling out quickly, so [book now!](#) Remember to register before 20 August 2018 for the reduced earlybird rate.

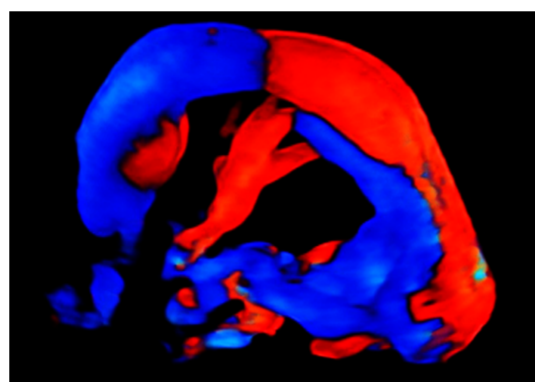

Check out our confirmed international faculty to see which [world leading experts](#) you will be hearing from at the World Congress.

Big questions being answered include:

- How to introduce evidence based medicine in our daily ultrasound practice?
- How to predict preterm labor?
- What is the evidence for using pessaries?
- How to prevent preeclampsia?
- Should all women be offered cfDNA or microarray?
- What is the real risk of miscarriage following invasive procedures?
- When to deliver IUGR babies?
- How to improve ultrasound examination of the fetal heart and the fetal brain?
- Can ultrasound reduce maternal mortality?

[Register now](#)

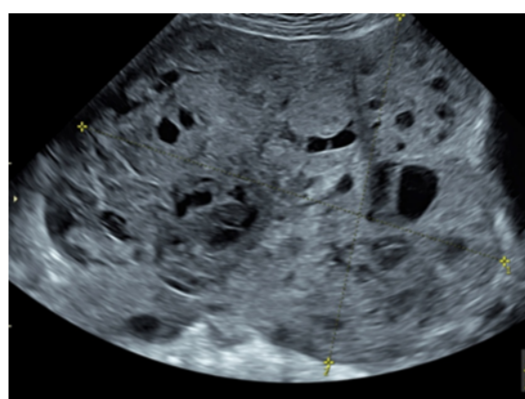

Highlights from the June issue of UOG

The [June issue](#) of *Ultrasound in Obstetrics & Gynecology* has a special focus on pre-eclampsia, with relevant articles on the prediction of pre-eclampsia using serum biomarkers, maternal hemodynamic indices, and models combining these with maternal factors. Other articles in this issue include an Editorial describing a new app for interactive multiplanar navigation through the fetal brain. Coming up in July: an Original Article by Nicolaides et al. presenting FMF birth-weight charts derived using a reference population of all babies at a given gestational age, including those still in utero, and an [ISUOG guideline](#) on intrapartum ultrasound guiding practitioners on when ultrasound in labor is clinically indicated and how sonographic findings may affect labor management. [Become a Journal member](#) of ISUOG for unlimited access to all UOG content.

[Journal Highlights](#)

New VISUOG Chapters

We are pleased to announce that are two new VISUOG chapters now available! VISUOG is being relaunched with two more gynecology chapters:

- [Yolk sac tumors](#) by Elisabeth Epstein and Peter Anfelter
- [Brenner tumor](#) by Erika Fruscella, Dirk Timmerman, Lil Valentin and Antonia Testa

ISUOG members can use our visual encyclopedia to stay informed on accurate sonographic diagnoses and the clinical use of ultrasound in obstetrics and gynecology, through detailed images and accompanying text. VISUOG is a resource which is exclusively available to ISUOG members, so [join online](#) to gain access to VISUOG and other [membership](#) benefits.

Trainee program

We're thrilled to announce that so far in 2018, ISUOG has established 24 new [trainee program partnerships](#), bringing our total number of trainee partnership institutions to 76 partners in over 40 countries. 5 of our new partnerships are in new countries: Iran, Ethiopia, Lithuania, Lesotho and Albania. ISUOG's Trainee Program provides two years free membership to all trainees specialising in ultrasound in obstetrics and gynecology. The initiative was launched to support our [mission](#) to provide high quality education and research information to health professionals in the field. You can help us expand this program by connecting us with your institution: for full details, click [here](#).

[More information](#)

Basic Training

Check out the [second issue of the ISUOG Basic Training newsletter](#). 'Beaming'.

Highlights include a report by the Basic Training Task Force Chair, Reem Abu-Rustum, on Basic Training's latest achievements and goals for the future; updates on our theoretical curriculum and simulation training, and information on upcoming events.

Would you like to organise a satellite for the Basic Training course at our Singapore World Congress for free or a reduced fee?

Countries in [Hinari lists A&B](#) will be able to host a Basic Training satellite for free, and delegates will also receive one year of free Basic ISUOG membership. Members are also encouraged to organise satellites in other countries. For the full fee structure and more details, please [visit our website](#).

ISUOG China Task Force

We are very pleased to announce that the ISUOG China Task Force and its expert committee were launched last month at the ISUOG approved course, the '7th Prenatal Ultrasound Diagnosis of Fetal Birth Defects and Counseling', which took place in Beijing. The local leadership team, Professors Yuxin Jiang, Jiawei Tian, Qingqing Wu and Kwok Yin Leung, will work alongside an [expert committee](#) of over 50 senior clinicians to expand ISUOG's reach throughout mainland China.

We are also glad to announce that ISUOG has now a new member of staff in China. Lin Li will work with the China Task Force and ISUOG team to further ISUOG's [mission and vision](#) in this region.

Upcoming Educational Opportunities for you

[The Basic Training full theoretical program on ultrasound in obstetrics and gynecology](#)
27-30 September 2018, Chennai, India

28th ISUOG World Congress

20-22 October 2018, Singapore

[Pre-Congress Courses:](#)

- ['From genetics to obstetric management: essential genetics in practice'](#)
- [Ultrasound for diagnosis and presurgical staging of deep endometriosis \(DIE\)](#)
- [Basic Training Course: A Practical Approach to the Ob/Gyn Ultrasound Examination](#)

[Advanced Fetal Neurosonography: when do I need to refer for fetal MRI?](#)
07-08 December 2018, London, UK and live streamed globally

Want reduced fees to our events? Become an ISUOG member by [joining online](#) today.
