

Dear "[FNAM]" "[LNAME]",

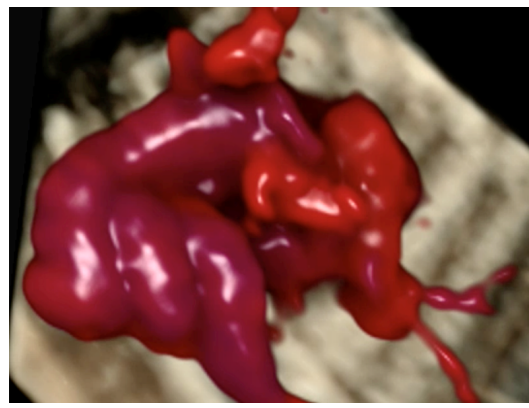

There are plenty of ISUOG news and activities to update you on - such as:

- Why [#ISUOG2019](#) is unmissable, and what to expect from the [pre-Congress courses](#)
- Highlights from the [July issue](#) of the UOG Journal, and our [Virtual Issue on urogynecology](#)
- What's new from [ISUOG Basic Training](#)
- Upcoming [ISUOG events](#), such as [Endometriosis and gynecologic oncology: do they have something in common?](#)
- Which ISUOG courses available to [live stream](#)

We hope to see you at some of our upcoming events!  
The ISUOG Team

### Highlights from the July Issue of the UOG Journal

The July Issue of *Ultrasound in Obstetrics & Gynecology* includes a [Systematic Review](#) on the accuracy of saline contrast sonohysterography in detecting endometrial polyps in women with postmenopausal bleeding, an [Expert Consensus](#) on methods and considerations concerning cardiac output measurement in pregnant women, a [study](#) on echocardiography, clinical outcome and genetic analysis in 53 cases of fetal cardiac tumor, and a [study](#) on the application of artificial intelligence to amniotic fluid metabolomics and proteomics in the prediction of perinatal outcome in asymptomatic pregnant women with short cervical length.

Also new this month is a free access [Virtual Issue on Urogynecology](#), which you can read online now.

Coming up in the next issue of UOG: a selection of papers on different aspects of fetal brain imaging, and a Systematic Review on the effectiveness on fertility outcome of tubal flushing with different contrast media. Read the [EarlyView article now](#) and look out in August for an accompanying video abstract.

To view all UOG content, [join ISUOG](#) as a Journal member today.

### ISUOG2019 pre-Congress courses

12 October 2019, Berlin, Germany

Join us for the following [pre-Congress courses](#) - registration is available via the official 29th World Congress [registration page](#):

[Fetal anomalies: heart and central nervous system](#)

This course will give delegates a comprehensive overview of heart and central nervous system anatomy as well as examination methods of detecting fetal anomalies. View the [program](#) now.

[Ultrasound working together with other technologies for the best perinatal outcomes](#) (in partnership with SMFM). This will provide an update of current technologies for management and care of women at every point during their pregnancy. Check out the [program](#) and [key speakers](#), and [register your interest](#) to live stream this course.

[Endometriosis: diagnostic challenges and surgical planning](#) - develop your expertise in diagnosing and managing women with endometriosis at our gynecology pre-Congress course. Check out the program [here](#).

[Register now](#)

### ISUOG Basic Training

At ISUOG2019, [Basic Training](#) will be hosting a morning hubs series on Monday 14 Oct - Wednesday 16 Oct, which will consist of interactive training on fetal anatomy using live scan demonstrations followed by simulator practice. Additionally at the World Congress, [Basic Training](#) will be hosting two simulation workshops. The first session will be focused on the Fetal Heart Scan and the second on the Basic Anomaly Scan (20+2 approach). [Register to attend ISUOG 2019](#) to take part!

ISUOG is pleased to announce Basic Training in Johannesburg, South Africa on the 24 Oct 2019!

This course will be delivered in conjunction with [SASUOG](#) and delivered entirely in English. [Join us on-site or via-livestream!](#)

Remember that as an ISUOG member, you can [run a Basic Training course](#).

### Early bird registration deadline for ISUOG2019: 18 August

29<sup>th</sup> World Congress on Ultrasound in Obstetrics and Gynecology  
12-16 October 2019  
Berlin, Germany

Join us at our [Berlin World Congress](#) where our leading international experts will answer challenging questions such as:

- How early in the first trimester can we detect fetal anomalies?
- What should we do with incidental pathology during a routine check-up?
- Should we measure nuchal translucency in the era of cfDNA?
- How should we classify and manage ovarian tumors using IOTA terminology?
- What is the best diagnostic pathway for abnormal uterine bleeding?
- Is it possible to screen for and prevent pre-eclampsia and preterm birth?

At [ISUOG2019](#) we will also be offering a [certificate of fetal brain imaging](#) onsite and via live stream.

Watch [lectures from our previous World Congresses](#) to see why you can't miss ISUOG2019.

[Register now](#)

### Endometriosis and gynecologic oncology: do they have something in common?

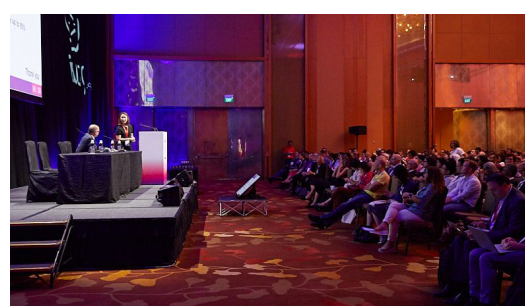

Join us on Friday 29 November in London, UK or via livestream for an essential update on endometriosis and gynecologic cancer. Attend this [course](#) to:

- Discover the risk of malignancy in endometriotic lesions
- Ensure whether it's possible to preoperatively discriminate between malignancy and deep endometriosis in the pelvis
- Learn how to discriminate between decidualized endometriomas and malignant ovarian tumors during pregnancy

This course will be chaired by Dr Antonia Testa and Prof. Lil Valentin - check out the program [here](#).
