

This month we are celebrating the phenomenal success of UOG, which has achieved an impact factor of 5.65 and more than 2.5 million downloads, and is now ranked the third journal in obstetrics and gynecology.

Watch Prof. Stuart Campbell congratulating the UOG team on the outstanding new impact factor.

Publish your work in this leading peer-reviewed journal in the field of ultrasound in obstetrics and gynecology and enjoy online publication within 1 week of acceptance. Practice-changing research of exceptional quality will be considered for fast-track peer review and publication. Randomised controlled trials (RCTs) and meta-analyses of RCTs will be priority peer reviewed and made freely available when published.

ISUOG and the UOG team warmly welcome their new Editor-in-Chief, Anthony Odibo. Join ISUOG as a Journal member for exclusive access to original research articles, systematic reviews, expert commentaries and consensus statements from the top international experts in the field.

The July issue of *Ultrasound in Obstetrics & Gynecology*, has a special focus on fetal weight, with relevant articles on the accuracy of estimated fetal weight formulae, a new birth-weight reference chart that includes fetuses still *in utero*, and the screening and management of small-for-gestational-age fetuses.

Also included in this issue is an [ISUOG Guideline on intrapartum ultrasound](#) providing guidance to practitioners on when ultrasound in labor is clinically indicated and how sonographic findings may affect labor management.

Coming up in the next issue of UOG are two research papers and an accompanying Opinion on fetal aortic valvuloplasty.

### New exciting scientific and social World Congress programs

Included in the [preliminary program](#) for our World Congress are the following masterclasses from some of the [world leading experts](#):

- A. Abuhamad - 6 steps to easy ultrasound
- R. Chaoui - Cardiac ultrasound: the heart of the matter
- L. Valentin - IOTA terminology, rules and models to classify ovarian masses

[Become an ISUOG member](#) to watch the presentations from previous World Congresses with [OnDemand](#).

Singapore is a culturally rich city, and we have organised a [social program](#) to showcase this.

The early bird deadline of 20 August 2018 is fast approaching, so make the most of the reduced early bird rate.

### Relaunch of our fetal biometry calculators

ISUOG's [fetal biometry calculators](#) have been revamped and are now available exclusively to [ISUOG members](#). Basic assessment includes [dating a pregnancy](#), and [assessment of size for gestational age and of weight](#). New formulae have recently been proposed and are hotly debated, so stay up-to-date on this current topic.

To access this ISUOG clinical resource along with other exceptional membership benefits, [become an ISUOG member](#).

Watch this space for more on fetal biometry in the near future!

### Advanced Fetal Neurosonography: when do I need to refer for fetal MRI?

7-8 December 2018

London, UK and live streamed globally

Join us in London for this two day [ISUOG education course](#), providing a state-of-the-art overview of the role of fetal MRI in advanced fetal neurosonography. The course will be chaired by ISUOG Board Members Dr Gustavo Malingier and Prof. Daniela Prayer. Key sessions include fetal neurosonography and fetal MRI examination before and after 20 weeks and an overview of the MERIDIAN study.

You can join us onsite or live stream the course at a time and location that suits you. Find more information on this course over [our website](#), and register now.

### ISUOG Events

[Become an ISUOG member for discounted fees to the following events:](#)

[The Basic Training full theoretical program on ultrasound in obstetrics and gynecology](#), 27-30 September 2018, Chennai, India (available to live stream via [satellites](#))

[28th ISUOG World Congress](#)

20-24 October 2018, Singapore

[Pre Congress Courses:](#)

- ['From genetics to obstetric management: essential genetics in practice'](#)
- [Ultrasound for diagnosis and presurgical staging of deep endometriosis \(DIE\)](#)
- [Basic Training Course: A Practical Approach to the Ob/Gyn Ultrasound Examination](#) (available to live stream via [satellites](#))

[Advanced Fetal Neurosonography: when do I need to refer for fetal MRI?](#)

07-08 December 2018, London, UK and live streamed globally

[Find an ISUOG Event](#)

### Basic Training: Host a live stream satellites

Our two [upcoming Basic Training courses](#) in Chennai and Singapore will be available to live stream via [satellites](#). Hosting a satellite is easy and available at no cost or at a highly reduced cost depending on your region.

Trainee delegates who attend a satellite will receive one year of Basic ISUOG membership for free. We encourage members in all countries to take advantage of this opportunity and join one of our courses - you can find out more about bringing a Basic Training course to you and your peers [here](#).

### International Survey on the Utility of Ultrasound in the Assessment and Management of Endometriosis

The gynecology team at Nepean Hospital, University of Sydney, Australia is looking to better understand your approach to managing patients with endometriosis as an obstetrician-gynecologist at an international level. The study team has identified a discrepancy in the output of published literature on the topic of diagnosis and management of patients with endometriosis which they hypothesize translates to variations in patient care from country to country. They are requesting less than 5 minutes of your time to complete this anonymous electronic [survey](#), which they believe may help shape educational objectives and improve care of patients with endometriosis on a national and international scale.

[Take the survey](#)
