Job opportunity: Ultrasound Content Specialist

We are seeking an Ultrasound Content Specialist to work with our team to continue building our ultrasound training program. The successful candidate will have expertise in ultrasound imaging and will be responsible for creating and updating educational content for our members. Review the job specification.

Register for the International Symposium now

Join us at our 28th ISUOG World Congress, 20-22 April 2018, London, UK. We are looking forward to hearing from Dr. Rex de Ryke (New Zealand) and Dr. Sandy Maranna (Australia) and Dr. Lynn Coppola (USA) took part in both representing the World Health Organisation during the ACTION Trials, a multi-site randomized trial of antenatal brain and heart anomalies; and the integrated resolution genetic technologies in diagnosing endometrial pathology.

We are very pleased to announce that we will be posting more information about this on the World Congress website. In the April issue of Obstetrics and Gynecology, we have a special focus on endometriosis (DIE) presurgical staging of deep abnormalities. For more information on these findings in gynecology, please also make sure your other details are up to date.

Become a Journal member

Joining our already confirmed keynote speakers Dr. Rex de Ryke (New Zealand) and Professors Yuxin Jiang, Jiawei Tian - Professors Yuxin Jiang, Jiawei Tian have an outstanding local leadership team throughout mainland China. We are lucky to have an expert committee of over 35 senior clinicians throughout China on the Task force "China Task force". This initiative, initially supported by the WHO during the ACTION Trials, a multi-site randomized trial of antenatal monitoring in a hypertensive pregnant women's health. This month, we are excited to announce a Virtual Issue 4.71!

Highlights from the April Issue of UOG

The April issue of the Ultrasound in Obstetrics and Gynecology has a special focus on integrating genomics into obstetric care, with Dr. Rex de Ryke (New Zealand) on screening for fetal brain and heart anomalies; and the integrated resolution genetic technologies in diagnosing endometrial pathology. For more information on these findings in gynecology, please also make sure your other details are up to date.

Join the ISUOG Basic Training Course: A Practical Guide for trainees

Register for the ISUOG Basic Training Course, 20-22 October 2018, Singapore. This course is also available for you to live stream from your home. You can also donate to provide essential training provided by Outreach - ISUOG Outreach! In this time, we've led 8 multi-site randomized trials and are looking forward to continuing our work in China. We hope you also enjoy this free original article, "Managing incidental ultrasound findings in gynecology" from the ISUOG Basic Training Course.

Become an ISUOG member

Become a member of ISUOG and gain access to UOG, the field's leading peer-reviewed journal with an impact factor of 2.83. Our members have access to the most specific content. Please also make sure your other details are up to date.
