### Faculty

E. Epstein (Sweden)

D. Jurkovic (UK)

A. Testa (Italy)

L. Valentin (Sweden)

### About the course

Incidental findings are very common in clinical practice and they often represent a dilemma in defining the most appropriate clinical management.

Targeted at gynecologists, obstetricians and fertility specialists, this one day course will give an update on how to deal with the most frequent incidental ultrasound findings in gynecology. The interactive aspect of the course, based on clinical cases, will give attendees the possibility to share knowledge with our leading faculty of experts.
